

# Felt Ice Skate Ornament Pattern

## What You'll Need for the Felt Skate Ornaments

Embroidery Thread and Needle

Felt

Pattern

Stuffing

Paper Clips for the Blades

## Directions

For each set of skates, you'll need to cut out two on the fold.

To do this I folded the edge of my felt square up just enough for the skate pattern to fit on it. You want to position the skate pattern so that the bottom of the boot is on the folded edge.

With the boot folded and work from one side of the fold to the other.

You'll want to sew up the side to the top and start down the other side and stop to add a little stuffing and then finish off the sewing.

I like to use a blanket stitch to close them up.

With both skate boots fully sewn, you'll need to slip the paper clip into the boot.

There is usually a little hole you can slip it into.

Once the paper clip is slid in I like to secure it with a couple of stitches.

Now with a long piece of a contrasting color of embroidery floss add a few horizontal stitches for the laces on one of the skate boots.

When you reach the top, leave a portion long enough to hang the ornament on the tree between the two skates. Then starting at the top of the second skate add the horizontal stitches for the laces on the second boot. Tie off and the skates are done.
