

45° Back Extension

OWNER'S MANUAL

Model No. F206.0

Serial No. _____

Write the serial number in the space above for reference.

QUESTIONS?

If you have questions, or if parts are damaged or missing, please see **HOW TO CONTACT CUSTOMER CARE** on the back cover of this manual.

CAUTION

Read all precautions and instructions in this manual before using this equipment. Keep this manual for future reference.

WARNING DECAL PLACEMENT

This drawing shows the location(s) of the warning decal(s). **If a decal is missing or illegible, see the back cover of this manual and request a free replacement decal. Apply the decal in the location shown.** Note: The decal(s) may not be shown at actual size.

IMPORTANT PRECAUTIONS

⚠️ WARNING: To reduce the risk of serious injury, read all important precautions and instructions in this manual and all warnings on your strength equipment before using your strength equipment. FreeMotion Fitness assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

1. Before beginning any exercise program, consult your physician. This is especially important for persons over age 35 or persons with pre-existing health problems.
2. Use the strength equipment only as described in this manual.
3. Use the strength equipment only on a level surface. Cover the floor beneath the strength equipment to protect the floor.
4. It is the purchaser's responsibility to ensure that there is enough space around the strength equipment for the intended exercise. Do not crowd the strength equipment.
5. Using the 14 mm anchor holes to provide maximum stability, the strength equipment must be anchored to the floor where required or whenever possible.
6. Make sure that all parts are properly tightened before each use of the strength equipment.
7. It is the responsibility of the owner to ensure that all users of the strength equipment are adequately informed of all precautions, have read and understood all warning and caution labels, and are informed of how to use the strength equipment properly.
8. All users of the strength equipment should be instructed to report any injury or strength equipment irregularity to facility staff immediately.
9. The strength equipment is designed to support a maximum user weight of 350 lbs. (159 kg).
10. Keep children under age 12 and pets away from the strength equipment at all times.
11. Always wear athletic shoes for foot protection while using the strength equipment.
12. Over exercising may result in serious injury or death. If you feel faint or if you experience pain while exercising, stop immediately and cool down.

BEFORE YOU BEGIN

Thank you for selecting the FREEMOTION® EPIC™ 45° BACK EXTENSION strength equipment. The 45° BACK EXTENSION is designed to help you develop the major muscle groups of your upper body. Whether your goal is to tone your body or build dramatic muscle size and strength, the 45° BACK EXTENSION will help you to achieve the specific results you want.

For your benefit, read this manual carefully before you use the strength equipment. If you have ques-

tions after reading this manual, please see the back cover of this manual. To help us assist you, note the product model number and serial number before contacting us. The model number and the location of the serial number decal are shown on the front cover of this manual.

Before reading further, please familiarize yourself with the parts that are labeled in the drawing below.

PART IDENTIFICATION CHART

This chart is provided to help you identify the small parts used in assembly. The number in parentheses below each part refers to the key number of the part from the PART LIST near the end of this manual. The number following the parentheses is the quantity needed for assembly. **IMPORTANT: If you cannot find a part in the hardware kit, check to see if it has been preassembled.**

M8 x 30mm Screw (16)–8

M10 x 30mm Screw (15)–2

M10 Locknut
(5)–2

M10 x 85mm Bolt (6)–2

ASSEMBLY AND ADJUSTMENT

To make assembly easier, carefully read the following information and instructions:

- Assembly requires two persons.
- Because of its weight and size, the strength equipment should be assembled in the location where it will be used. Make sure that there is enough clearance to walk around the strength equipment as you assemble it.
- Place all parts in a cleared area and remove the packing materials. Do not dispose of the packing materials until assembly is completed.

- For help identifying small parts, use the PART IDENTIFICATION CHART on page 5.

- Assembly requires the following tools (not included):

an adjustable wrench

a set of metric hex keys

Assembly may be more convenient if you have a socket set, a set of open-end or closed-end wrenches, or a set of ratchet wrenches.

1. Attach the Foot Plate (2) to the Base (1) with two M10 x 30mm Screws (15), two M10 x 85mm Bolts (6), and two M10 Locknuts (5). **Tip: Start both Screws and insert both Bolts before tightening any of them.**

2. Pull the Adjustment Knob (14), insert the Selector Tube (4) into the Base (1), and engage the Adjustment Knob into one of the adjustment holes in the Selector Tube.

See the inset drawing. Tighten an M10 x 15mm Screw (7) into the hole near the lower end of the Selector Tube (4).

3. Attach a Pad (10) to the Pad Frame (3) with four M8 x 30mm Screws (16); **to avoid damaging the Pad, tighten the Screws only until the Pad does not move or feel loose. Tip: Start all four Screws before tightening any of them.**

Attach the other Pad (10) in the same way.

To adjust the position of the Pads (10), pull the Adjustment Knob (14), slide the Selector Tube (4) upward or downward, and engage the Adjustment Knob into one of the adjustment holes in the Selector Tube. **Move the Selector Tube up and down slightly to make sure that the Adjustment Knob is engaged in one of the adjustment holes.**

4. **Make sure that all parts of the strength equipment are properly tightened.** To protect the floor or carpet from damage, place a mat beneath the strength equipment.

MAINTENANCE AND TROUBLESHOOTING

For optimal performance of the strength equipment and to reduce the chances of injury to users, you must perform preventive maintenance on a regular basis. Instruct all personnel to perform the procedures described in this section. Personnel must also record and report any accident. To maintain the strength equipment's warranty, use only FREEMOTION parts for repair or replacement. If there are any questions or concerns, see HOW TO CONTACT CUSTOMER CARE on the back cover of this manual.

DAILY MAINTENANCE

Upholstery and Frame—General Cleaning

1. Clean the strength equipment using a soft cloth dampened with a light solution of mild soap and warm water. If necessary, use a soft bristle brush with the cleaning solution.
2. Rinse the area thoroughly using a soft cloth dampened with clean water. Dry thoroughly.

Upholstery—Difficult Stains

1. Spray the stain with a non-abrasive household cleaner such as FORMULA 409® cleaner, SIMPLE GREEN®, or a similar product. Rub the stained area gently and let the cleaning solution sit for a few minutes.
2. Rinse the area thoroughly using a soft cloth dampened with clean water. Dry thoroughly.
3. Repeat these steps, if necessary, using a soft-bristle brush.

Optional Method for Difficult Stains

1. Rub the stained area gently using a soft cloth dampened with rubbing alcohol.
2. Rinse the area thoroughly using a soft cloth dampened with clean water. Dry thoroughly.

CAUTION: When using any cleaning product, try it first in an unnoticeable place to ensure that there is no damage to the material. Follow the directions and the safety precautions of the manufacturer of each cleaning product used. FreeMotion Fitness and its vendors cannot be held liable for damage or injuries resulting from the use or misuse of cleaning products. **IMPORTANT: Do not use abrasive cleaners, which may scratch the strength equipment. Strong cleaners and abrasives will damage decals; use caution around decals. Do not use solvents such as lacquer thinner, kerosene, gasoline, or similar liquids.**

WEEKLY MAINTENANCE

Hardware

Check all nuts and bolts, and tighten them if necessary.

IMPORTANT: All FREEMOTION cushions have dense plywood supports with tee-nuts that are used to bolt the cushions to the strength equipment. Because the tee-nuts are held by the plywood, they will not withstand the torque that standard nuts and bolts will. When tightening the bolts securing a cushion, turn them only until they are snug and the cushion does not move or feel loose. Overtightening may strip the tee-nuts from the plywood and make it impossible to remove the cushion in the future.

Adjustment Knob

If an adjustment knob sticks, it will need to be relubricated. Unscrew the knob and apply a light coating of lithium grease. Reassemble the knob as shown in the drawing below. If the adjustment knob still does not function properly, the spring may need to be replaced. To order a new spring, see HOW TO CONTACT CUSTOMER CARE on the back cover of this manual.
