IMPORTANT PRECAUTIONS

⚠ WARNING: To reduce the risk of serious injury, read the following important precautions before using the strength equipment.

1. Read all instructions in this manual before using the strength equipment. Use the strength equipment only as described in this manual.
2. Use the strength equipment only on a level surface. Cover the floor beneath the strength equipment to protect the floor.
3. It is the purchaser's responsibility to ensure that there is enough space around the strength equipment for the intended exercises. Do not crowd the strength equipment.
4. Using the four 9/16" anchor holes to provide maximum stability, the strength equipment must be anchored to the floor where required or whenever possible.
5. Make sure that all parts are properly tightened before each use of the strength equipment. Replace any worn parts immediately.
6. It is the responsibility of the owner to ensure that all users of the strength equipment are adequately informed of all precautions.
7. All users of the strength equipment should be instructed to report any injury or strength equipment irregularity to facility staff immediately.
8. Keep children under age 12 and pets away from the strength equipment at all times.
9. The strength equipment is designed to support a maximum user weight of 350 pounds (159 kg); a maximum of 600 pounds (272 kg) of weight, including a barbell (not included); and a maximum total weight of 950 pounds (431 kg).
10. Always wear athletic shoes for foot protection while exercising.
11. Keep hands and feet away from moving parts. Do not lean on or rest your hands on the strength equipment when it is in use.
12. Always exercise with a partner. Your partner should be ready to catch the barbell if you cannot complete a repetition.
13. If you feel pain or dizziness while exercising, stop immediately and begin cooling down.

⚠ WARNING: Before beginning this or any exercise program, consult your physician. This is especially important for persons over the age of 35 or persons with pre-existing health problems. Read all instructions before using. FreeMotion Fitness assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

BEFORE YOU BEGIN

Thank you for selecting the FREEMOTION® EPIC™ MILITARY PRESS strength equipment. The strength equipment is designed to help develop the major muscle groups of the upper body. Whether your goal is to tone your body, build dramatic muscle size and strength, or improve your cardiovascular system, the strength equipment will help you to achieve the specific results you want.

For your benefit, read this manual carefully before using the strength equipment. If you have questions

after reading this manual, see HOW TO CONTACT CUSTOMER CARE on the back cover of this manual. To help us assist you, please note the product model number and serial number before calling. The model number is GZFW2164.2. The serial number can be found on a decal attached to the strength equipment (see the front cover of this manual).

Before reading further, please review the drawing below and familiarize yourself with the parts that are labeled.

ADJUSTMENT

This section explains how to adjust the strength equipment for exercising. Make sure that all parts are properly tightened each time the strength equipment is used. Replace any worn parts immediately.

STORING WEIGHTS

Store unused weights on the weight tubes.

⚠ WARNING: Each short weight tube can hold up to 68 kg (150 lbs.). Each long weight tube can hold up to 68 kg (150 lbs.). Do not place more than a total of 272 kg (600 lbs.), including a barbell (not included), on the racks and the storage tubes. Always place equal amounts of weight on both ends of your barbell.

ADJUSTING THE SEAT

To raise the seat, lift the end of the seat and move the seat to the desired position. To lower the seat, lift the end of the seat and press down on the back of the seat until the seat is at the desired height.

MAINTENANCE

For optimal performance of the strength equipment and to reduce the chances of injury to users, you must perform preventive maintenance on a regular basis. Instruct all personnel to perform the procedures described in this section. Personnel must also record and report any accident. To maintain the strength equipment's warranty, use only FREEMOTION EPIC parts for repair or replacement. If there are any questions or concerns, see HOW TO CONTACT CUSTOMER CARE on the back cover of this manual.

DAILY MAINTENANCE

Upholstery and Frame—General Cleaning

1. Clean the strength equipment using a soft cloth dampened with a light solution of mild soap and warm water. If necessary, use a soft bristle brush with the cleaning solution.
2. Rinse the area thoroughly using a soft cloth dampened with clean water. Dry thoroughly.

Upholstery—Difficult Stains

1. Spray the stain with a non-abrasive household cleaner such as FORMULA 409® cleaner, SIMPLE GREEN®, or a similar product. Rub the stained area gently and let the cleaning solution sit for a few minutes.
2. Rinse the area thoroughly using a soft cloth dampened with clean water. Dry thoroughly.
3. Repeat these steps if necessary using a soft bristle brush.

Optional Method for Difficult Stains

1. Rub the stained area gently using a soft cloth dampened with rubbing alcohol.
2. Rinse the area thoroughly using a soft cloth dampened with clean water. Dry thoroughly.

CAUTION: When using any cleaning product, try it first in an unnoticeable place to ensure that there is no damage to the material. Follow the directions and the safety precautions of the manufacturer of each cleaning product used. FreeMotion Fitness and its vendors cannot be held liable for damage or injuries resulting from the use or misuse of cleaning products.

Important: Do not use abrasive cleaners, which may scratch the strength equipment. Strong cleaners and abrasives will damage decals; use caution around decals. Do not use solvents such as lacquer thinner, kerosene, gasoline, or similar liquids.

WEEKLY MAINTENANCE

Hardware

Check all nuts and bolts and tighten them as required.

Important: All FREEMOTION EPIC cushions have dense plywood supports with tee-nuts that are used to bolt the cushions to the strength equipment. Because the tee-nuts are held by the plywood, they will not withstand the torque that standard nuts and bolts will. When tightening the bolts securing a cushion, turn them only until they are snug and the cushion does not move or feel loose. Overtightening may strip the tee-nuts from the plywood and make it impossible to remove the cushion in the future.

PART LIST—Model No. GZFW2164.2
