OWNER'S MANUAL

CAUTION: Read all instructions carefully before operating this product. Retain this Owner's Manual for future reference.

LIMITED WARRANTY

Weslo, Inc. ("Weslo") warrants this product to be free from defects in workmanship and material, under normal use and service conditions, for a period of ninety (90) days from the date of purchase. This warranty extends only to the original purchaser. Weslo's obligation under this Warranty is limited to replacing or repairing, at Weslo's option, the product at one of its authorized service centers. All products for which warranty claim is made must be received by Weslo at one of its authorized service centers with all freight and other transportation charges prepaid, accompanied by sufficient proof of purchase. All returns must be pre-authorized by Weslo. Pre-authorization may be obtained by calling Weslo's Customer Service Department at 1-800-99WESLO. This warranty does not extend to any product or damage to a product caused by or attributable to freight damage, abuse, misuse, improper or abnormal usage or repairs not provided by a Weslo authorized service center or for products used for commercial or rental purposes. No other warranty beyond that specifically set forth above is authorized by Weslo.

WESLO IS NOT RESPONSIBLE OR LIABLE FOR INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE PRODUCT OR OTHER DAMAGES WITH RESPECT TO ANY ECONOMIC LOSS, LOSS OF PROPERTY, LOSS OF REVENUES OR PROFITS, LOSS OF ENJOYMENT OR USE, COSTS OF REMOVAL, INSTALLATION OR OTHER CONSEQUENTIAL DAMAGES OF WHATSOEVER NATURE. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. ACCORDINGLY, THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

THE WARRANTY EXTENDED HEREUNDER IS IN LIEU OF ANY AND ALL OTHER WARRANTIES AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS LIMITED IN ITS SCOPE AND DURATION TO THE TERMS SET FORTH HEREIN. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS. ACCORDINGLY, THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

This warranty gives you specific legal rights. You may also have other rights which vary from state to state.

WESLO INC., P.O. BOX 10, LOGAN, UT 84321

WARNING: Before beginning this or any exercise program consult your physician. This is especially important for individuals over the age of 35 or persons with pre-existing health problems. Read all instructions before using. Weslo assumes no responsibility for personal injury or property damage sustained by or through the use of this Weslo product.

IMPORTANT SAFETY PRECAUTIONS

- 1. Always use the Skier/Rower in an open, level area.**
- 2. Be sure that all parts are tightened securely. The pedals should be firmly attached to the resistance strap when in the skier mode.**
- 3. When changing the resistance on the poles or pedals, step off of the machine before making the adjustments.**

BEFORE YOU BEGIN

Thank you for purchasing a Weslo POWERGLIDE 50 XC Skier/Rower. The POWERGLIDE 50 is designed to let you enjoy two of the best forms of cardiovascular exercise in the convenience of your own home.

For your safety and benefit, please read this manual carefully before initial use of the POWERGLIDE 50. If you have additional questions regarding assembly, parts, operation or the 90-day warranty, please call our Customer Service Department toll-free at **1-800-99WESLO** (999-3756), Monday - Friday, 6 a.m. - 6 p.m. Mountain Time. When calling, please refer to the product model number and serial number. The model number is WL610300. The serial number is recorded on a decal on the frame (see the front cover).

ORIENTATION DIAGRAM

To help you clearly understand the descriptions in this manual, please examine the drawing below and familiarize yourself with the parts identified.

The Seat and Rowing Arms are not shown.

ASSEMBLY INSTRUCTIONS

Please read all instructions carefully before beginning assembly. For identification of parts see the exploded drawing and the part list. Assembly can be completed with the tool provided.

1. Place the XC Skier/Rower in a clear area on the floor and remove the packing materials. Be sure that all parts are included before disposing of the packing materials.

2. Turn the Aluminum Rails (38) over so that the Skiing Pedals (not shown) are towards the floor. Attach the Crossbar (15) to the Rails with the four Bolts (26) and Washers (6).

3. Turn the Aluminum Rails (38) over and stand them on the four Protective Pads (24). Insert the Footrest Shaft (8) through the front end of the Rails. Place a Footrest (4) on each side of the Shaft and attach the Footrests with Washers (13) and Nuts (14) as shown.

4. Slide the Skiing Poles (37) onto the Right and Left Arm Mounts (17) and insert the Arm Pins (18).

4

5. Make sure that all parts are securely fastened. Your XC Skier/Power is now ready for use in the skiing mode.

XC SKIER ADJUSTMENT AND OPERATION

CONVERTING TO THE SKIER MODE

Note: Disregard these steps if the unit has just been assembled.

1. Remove the Arm Pins and pull the Rowing Arms from the Arm Mounts. Slide the Skiing Poles onto the Arm Mounts and reinsert the Arm Pins.
2. Lift the Seat from the Skiing Pedals.
3. Slide the Resistance Strap until the Strap Pins are beside the Skiing Pedals. Insert the Pins into the Pedals.

3

SKIING POLE RESISTANCE

Resistance on the Skiing Poles can be changed using the Knobs at the ends of the Crossbar. Turn the Knobs clockwise to increase resistance, or counterclockwise to decrease resistance.

If resistance decreases with time, remove the Knobs, lubricate the insides of the Washers next to the Arm Mounts (#19 on the Exploded Drawing), and retighten the Knobs.

SKIING PEDAL RESISTANCE

Turn the Tension Knob located at the rear of the Aluminum Rails clockwise to increase Pedal resistance, or counterclockwise to decrease resistance.

If the Pedals stick during exercise, rub a small amount of paraffin wax onto the sides of the Strap where it glides around the Brackets (part #5 on the EXPLODED DRAWING). This will also prevent fraying of the strap.

PEDAL STRAP ADJUSTMENT

Adjust the Straps on the Skiing Pedals one at a time, placing one foot on the Pedals and keeping the other foot on the floor. Adjust the Straps so that they are snug, but still allow you to lift your heels as you extend your legs backward.

MOUNTING THE SKIER

Position the Pedals side by side. Hold the Skiing Poles upright for balance and step onto the Rails and then into the Skiing Pedals.

SKIING TECHNIQUE

To simulate the true action of cross-country skiing, move your right arm forward as your left leg moves forward. Begin with short strides until your muscles become accustomed to the skiing movement. Move your arms and legs together in a smooth, rhythmic fashion. Never let the pedals hit against the brackets at the ends of the rails. Stand straight upright, or bend forward slightly at the hips. Always keep your back straight in order to avoid injury. Alternate method: You may vary your exercise by moving your right arm and right leg forward simultaneously. This will work your muscles in a different way than the method described above.

ROWER ADJUSTMENT AND OPERATION

CONVERTING TO THE ROWER MODE

1. Remove the Strap Pins from the Skiing Pedals, and pull the Resistance Strap until one Pin is at the front end of the Aluminum Rails and the other Pin is at the back end.
2. Position the Skiing Pedals side by side. Set the Rowing Seat on the Pedals and press down firmly.
3. Remove the Arm Pins and pull the Skiing Poles from the Arm Mounts. Slide the Rowing Arms onto the Arm Mounts, with the Rowing Arms pointing inwards, and insert the Arm Pins.

2

ROWING ARM RESISTANCE

Turn the Resistance Knobs at the ends of the Crossbar clockwise to increase the resistance. Turn the Knobs counterclockwise to decrease the resistance.

ROWING TECHNIQUE

Position yourself on the seat facing the footrests and strap your feet into the footrests. Hold the rowing handgrips with an overhand grip. Correct rowing form consists of three parts. Follow the procedure outlined below, breathing normally throughout.

- A. **The Catch** is a fully compressed position. Your body should be in a tucked position, your knees fully bent and your upper legs just off of the chest. Arms should be straight and shoulders relaxed.
- B. **The Drive** is started by the legs and back pushing backwards together. Be sure to keep your back straight as you lean back from the hip. Halfway through the drive, pull the handgrips towards your stomach. Try to keep your elbows outwards.
- C. **The Finish** comes as the arms continue to bend until the elbows pass on either side of the chest. At this time your legs should be nearly extended and your upper body leaning slightly back.

After the finish, extend your arms forward and slide your body forward as if following the hands back to the catch. Repeat the sequence. Move your arms and body together in a smooth, fluid motion.

CONDITIONING GUIDELINES

The following guidelines will help you to plan and regulate your personal fitness program. **However, before beginning this or any exercise program, consult your physician.** Remember that adequate rest and good nutrition are also essential to the success of any fitness program.

EXERCISE INTENSITY

To maximize health benefits from exercising, your level of exertion must exceed mild demands while falling short of breathlessness and fatigue. The proper level of exertion can be determined using the heart rate as a guide. For effective aerobic exercise the heart rate must be maintained at a level between 70% and 85% of your maximum heart rate. This is your "Training Zone."

You can determine your Training Zone by consulting the table below. Training Zones are given for both conditioned and unconditioned persons. Use the column that is appropriate for you.

AGE	UNCONDITIONED TRAINING ZONE (BEATS/MIN)	CONDITIONED TRAINING ZONE (BEATS/MIN)	AGE	UNCONDITIONED TRAINING ZONE (BEATS/MIN)	CONDITIONED TRAINING ZONE (BEATS/MIN)
20	138-167	133-162	55	127-155	122-149
25	136-166	132-160	60	126-153	121-147
30	135-164	130-158	65	125-151	119-145
35	134-162	129-156	70	123-150	118-144
40	132-161	127-155	75	122-147	117-142
45	131-159	125-153	80	120-146	115-140
50	129-156	124-150	85	118-144	114-139

To determine whether your heart rate is in your Training Zone, you must first exercise continuously for four minutes. After four minutes, pause briefly and take your pulse. The easiest way to measure your heart rate is to place two fingers on your wrist where you feel a pulse. Carefully take a six-second heart beat count. Adding a 0 to the number will give you your heart beats per minute. (A six-second count is used because the heart rate will drop rapidly after you stop exercising.) Compare your heart rate to your Training Zone. If your heart rate is below your Training Zone increase your level of exertion. If your heart rate is above your Training Zone decrease your level of exertion.

During the first few weeks of your exercise program you should keep your heart rate near the low end of your Training Zone. Over the course of a few months, gradually increase your heart rate until you reach the high end of your Training Zone.

EXERCISE PATTERN

Each workout should consist of a basic 5-step pattern.

1. At rest
2. Warm-up
3. Training Zone exercise
4. Cool-down
5. At rest

Warming up is an important part of your workout and should not be taken lightly. Warming up prepares the body for more strenuous exercise by increasing the circulation, delivering more oxygen to the muscles, and raising the body temperature. This can be done by stretching and light calisthenics for 5-10 minutes prior to exercising.

Begin exercising at a light pace for a few minutes. Then increase the intensity to raise your heart rate to your Training Zone for a period of 20-30 minutes.

Cooling down after vigorous exercise is important in aiding circulation and preventing soreness. 5-10 minutes of light exercise or stretching will allow the body to cool down.

EXERCISE FREQUENCY

To maintain or improve your condition you must work out 2-3 times per week following the pattern described above. A day of rest between workouts is recommended. After several months of exercise the number of workouts can be increased to 4-5 times per week. The key to a successful program is REGULAR EXERCISE.

STRETCHING

The following stretches provide a good warm-up. Each position should be held for 15 counts and performed for three repetitions. Stretch slowly-don't bounce.

HAMSTRING STRETCH

Sit with one leg extended. Bring the sole of the opposite foot in, resting against the extended leg's inner thigh. Stretch toward your toe as far as possible. Hold for 15 counts, then relax. Repeat.

Stretches: Hamstrings, Lower back and Groin.

INNER THIGH STRETCH

Sit with the soles of your feet together and knees pointing outward. Pull your feet as close into the groin area as possible. Gently push your knees as close to the floor as possible. Hold for 15 counts. Repeat.

Stretches: Inner thigh muscles.

TOE TOUCHES

With knees slightly bent, slowly bend forward from the hips. Allow back and shoulders to relax as you stretch toward your toes. Go down as far as you can and hold for 15 counts. Repeat.

QUADRICEPS STRETCH

With one hand against a wall for balance, reach behind you and pull up your foot. Bring your heel as close to your buttocks as possible. Hold for 15 counts. Repeat.

Stretches: Quadriceps, Hip muscles.

CALF/ACHILLES STRETCH

With one leg in front of the other and arms out, lean against the wall. Keep your back leg straight and back foot flat on the ground; then bend the front leg and lean forward by moving your hips toward the wall. Hold, then repeat on the other side. To cause even further stretching of the achilles tendons, slightly bend back leg as well.

Stretches: Calves, Achilles tendons, and Ankles.

PART LIST - Model No. WL610300

Rev. 4/90

Key No.	Qty.	Description	Key No.	Qty.	Description
1	1	Seat	22	2	Arm Mount Cover

See the back cover of this manual for information on ordering replacement parts.

ORDERING REPLACEMENT PARTS

Replacement parts can be ordered by calling our Customer Service Department toll-free at **1-800-99WESLO (999-3756)**, during regular business hours: Monday-Friday, 6 a.m. - 6 p.m., Mountain Time.

When ordering parts, please be prepared to give the following information.

1. The NAME OF THE PRODUCT (POWERGLIDE 50).
2. The MODEL NUMBER OF THE PRODUCT (WL610300).
3. The SERIAL NUMBER OF THE PRODUCT found on the frame (see the drawing on the cover for the location of the decal).
4. The KEY NUMBER OF THE PART from the Part List found in this manual.
5. The DESCRIPTION OF THE PART from the Part List found in this manual.

If possible, place your telephone near the POWERGLIDE 50 for easy reference.
