<p><b>State Licensing Requirements</b></p>	<p>If you are interested in pursuing a career in the health and wellness industry, you should consult with the appropriate state board to assure that your credentials will allow you to achieve your professional goals.</p> <p>An aromatherapy degree or diploma provides graduates with useful skills that may enhance a current career path or offer opportunity to work in the holistic health and wellness community, however, graduation from an aromatherapy program does not convey any sort of license to practice. Currently, there are no licensing requirements for aromatherapists in the United States. There are membership and registration options in the industry and these can be reviewed online at <a href="http://achs.edu">achs.edu</a>. Additionally, aromatherapists may not claim to treat, diagnose, or cure any illness, because doing so may be considered practicing medicine without a license and a violation of State Medical Practice Acts. Prior to enrollment, students are solely responsible for confirming that the certificate, diploma or degree program in which they enroll will meet their personal and career objectives.</p> <p>Learn more about ACHS Alumni in Action online at <a href="https://www.achs.edu/alumni/in-action">https://www.achs.edu/alumni/in-action</a>.</p>
