## **Lyrics:**

I've got a rap that I'd like to share  
About COVID-19 infecting our air  
Making people sick and closing our towns  
Social distancing and lonely lockdowns

Good news everybody, a vaccine is here  
Get the shot and make COVID disappear  
How the vaccine works is pretty cool  
Just follow the science, that's the rule

The vaccine is your friend  
By playing a game of pretend  
With the shot, your body plans to fight  
Making antibodies all day and night

If COVID-19 dares to make you sick  
Your body will be woke to that trick  
Let's all get the shot and work together  
To say goodbye to COVID forever!
