

July 29, 2009

Dear Representative:

The undersigned organizations, representing millions of America's conservationists and anglers, request your support for the National Fish Habitat Conservation Act (NFHCA). The NFHCA is a national, bipartisan effort to protect, restore, and enhance the nation's fish and aquatic communities through partnerships that foster fish habitat conservation and improve the quality of life for the American people.

Healthy waterways and robust fish populations are vital to the well-being of our society. They provide clean water and sustainable fisheries. They also are vital for less tangible reasons, as anyone who has fished wild waters or canoed a tranquil stream can attest. Unfortunately, in many waters around the country, aquatic habitats and the fish they support have been degraded. This is of huge concern to the 44 million anglers who pursue fish recreationally and countless others who depend on them for subsistence and commerce. The economic contribution of recreational fisheries alone surpassed \$125 billion in 2006.

Research has determined that many fish populations are in decline and half of our waters are impaired. As fish habitats come under increasing pressure, the current efforts to address habitat and population declines are not reversing these trends. The goal of the NFHCA is to foster landscape-scale, regional fish habitat conservation efforts.

The NFHCA will authorize \$75 million for fishery and habitat improvement, maximizing the return-on-investment by targeting much needed funding to priority on-the-ground projects. Based upon the highly successful North American Wetlands Conservation Act, the NFHCA will leverage state, local and privately raised funds to build regional partnerships aimed at fixing the nation's biggest fisheries problems. Funding will be awarded based on habitat need, strength of local and regional partnerships, and the likelihood of success. The NFHCA will put into statute the most comprehensive effort ever attempted to treat the causes of fish habitat decline, not just the symptoms.

We encourage your support for the National Fish Habitat Conservation Act and request your cosponsorship of this landmark legislation. To become a cosponsor of the National Fish Habitat Conservation Act, please contact David DeGennaro (David.DeGennaro@mail.house.gov) in Representative Kind's office. For more information, please visit www.fishhabitat.org. Thank you for your consideration of this important piece of legislation.

Sincerely,
