Course Description

Today's threats are unique, dangerous, and they are everywhere. No one, or place, is immune. Combating today's threats requires an understanding of what the threats are, what creates them, and how to prevent and survive them when prevention efforts fail. Success starts with the right mindset and that's what this short, yet powerful course, focuses on. This course is designed to change the way that you think, bring the level of understanding necessary to know that, regardless of who you are, what you age, size, strength, or gender is, you have what it takes to win and go home with one potential shortfall that must be understood and developed and we bring this to you in this course.

Part 2 - The Foundation of True Security - The Practical Aspects will bring you the practical skills required to "win-and-go-home".

Click on Complete and Continue and the course will start.
