**How We See Creation:
A Faith-Influenced Look at Science & Exploration**

Monday | April 23 | 7:30 PM

marking the three-year anniversary of Pope Francis' Laudato Si
(Laudato Si: encyclical on the environment and human ecology)

Ken Feldt

St. Michael Parishioner

Ambassador | NASA Solar System Initiative

What do Pope Francis
and NASA have in common?

The Earth, of course!

This multimedia presentation will cover a review of the intersection between faith and science. We will discuss how people of faith are called to care for creation. An overview of the exciting work being done by scientists and engineers (NASA/Jet Propulsion Laboratory) will illustrate how our environment works.

Bring your family, teenagers, and friends of all faith traditions to get more in touch with what our Church is asking when it comes to caring for creation. Learn about what our space exploration agencies are doing to help.

Open to everyone who wants to learn more about the Catholic perspective on science. It will be of particular interest to youth considering the role of faith in selecting their careers in science and engineering!
