

Name: _____

Date: _____

Watersheds

Label the following diagram with the following words:

tributaries

headwaters

precipitation

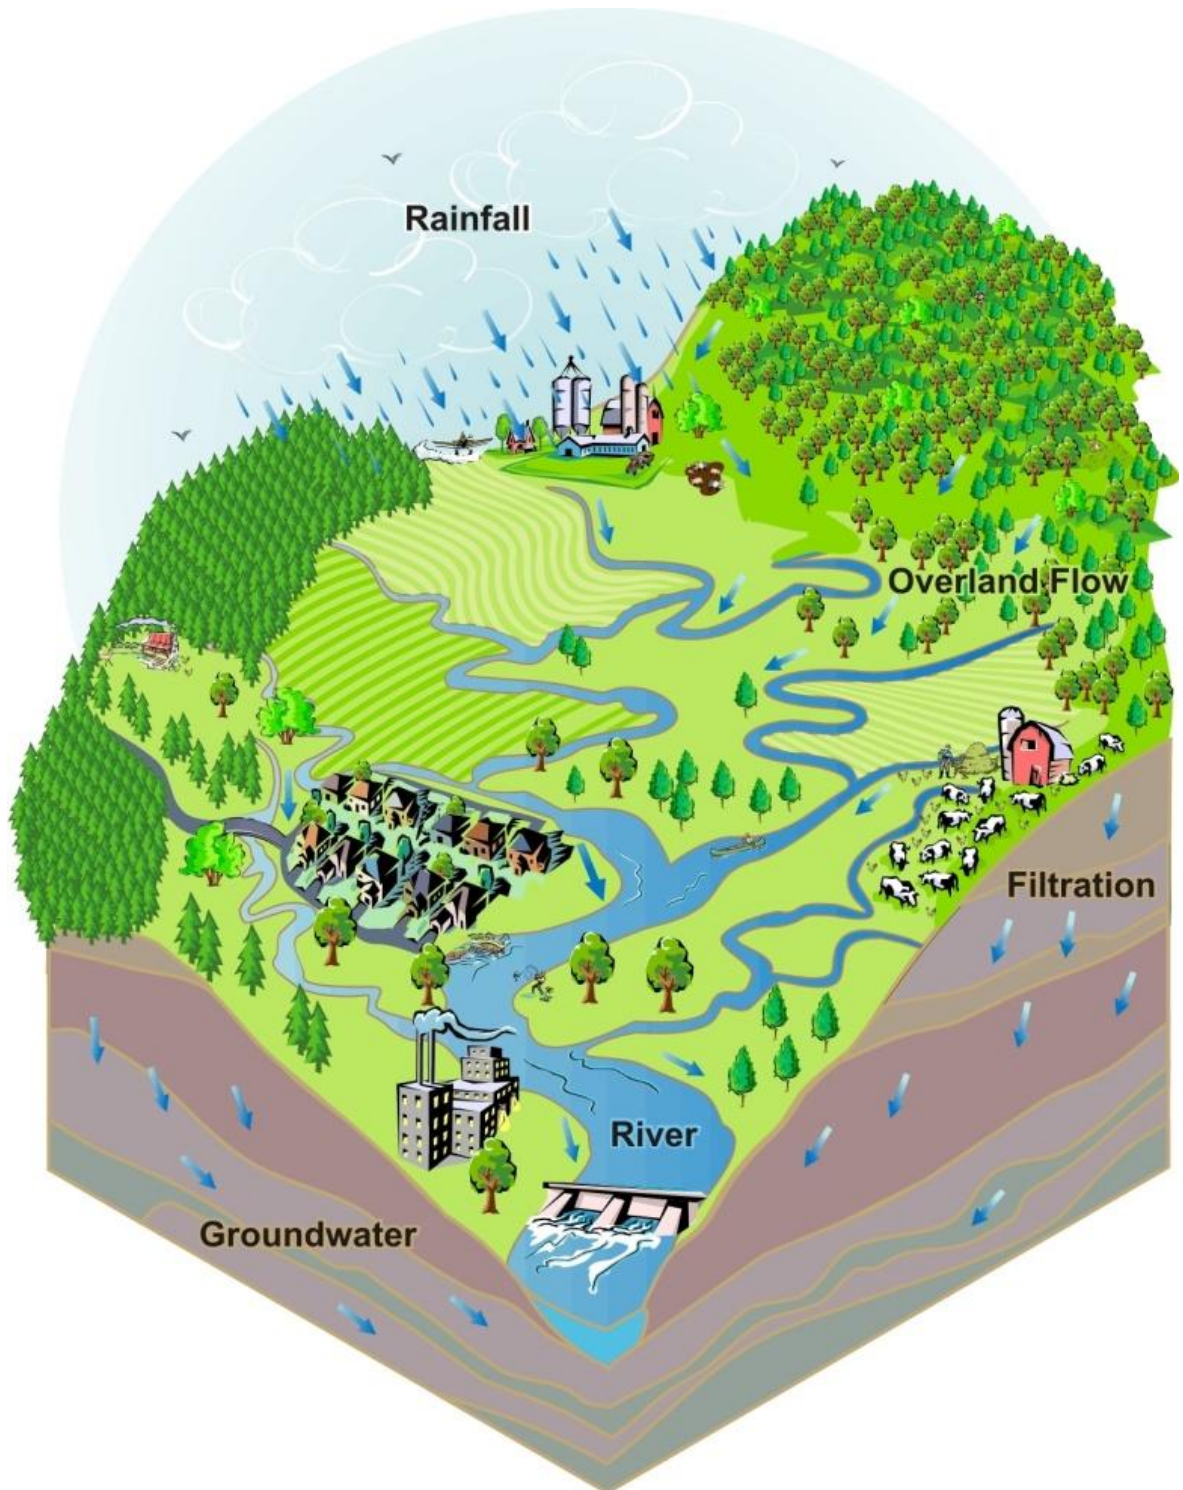

mouth

infiltration

runoff

ridge

main river

Answer the following questions in complete sentences.

1. Thinking back to the videos, our class discussions, and the watershed model we made and provide a definition of the term *watershed*.
2. Do you live in a watershed? If so what is the name of the watershed?
3. What are some of the other states that are in the same watershed as our school?
4. How does water flow in a watershed and what force causes this? What acts as the border of the watershed?
