

ANTECEDENTS

Maternal exposure can lead to more congenital issues

CYP-B1 SNP seen in more patients with environ toxicities; as well as methylation SNPs (MTHFR and CBS), as well as glutathione SNPs

TRIGGERING EVENTS

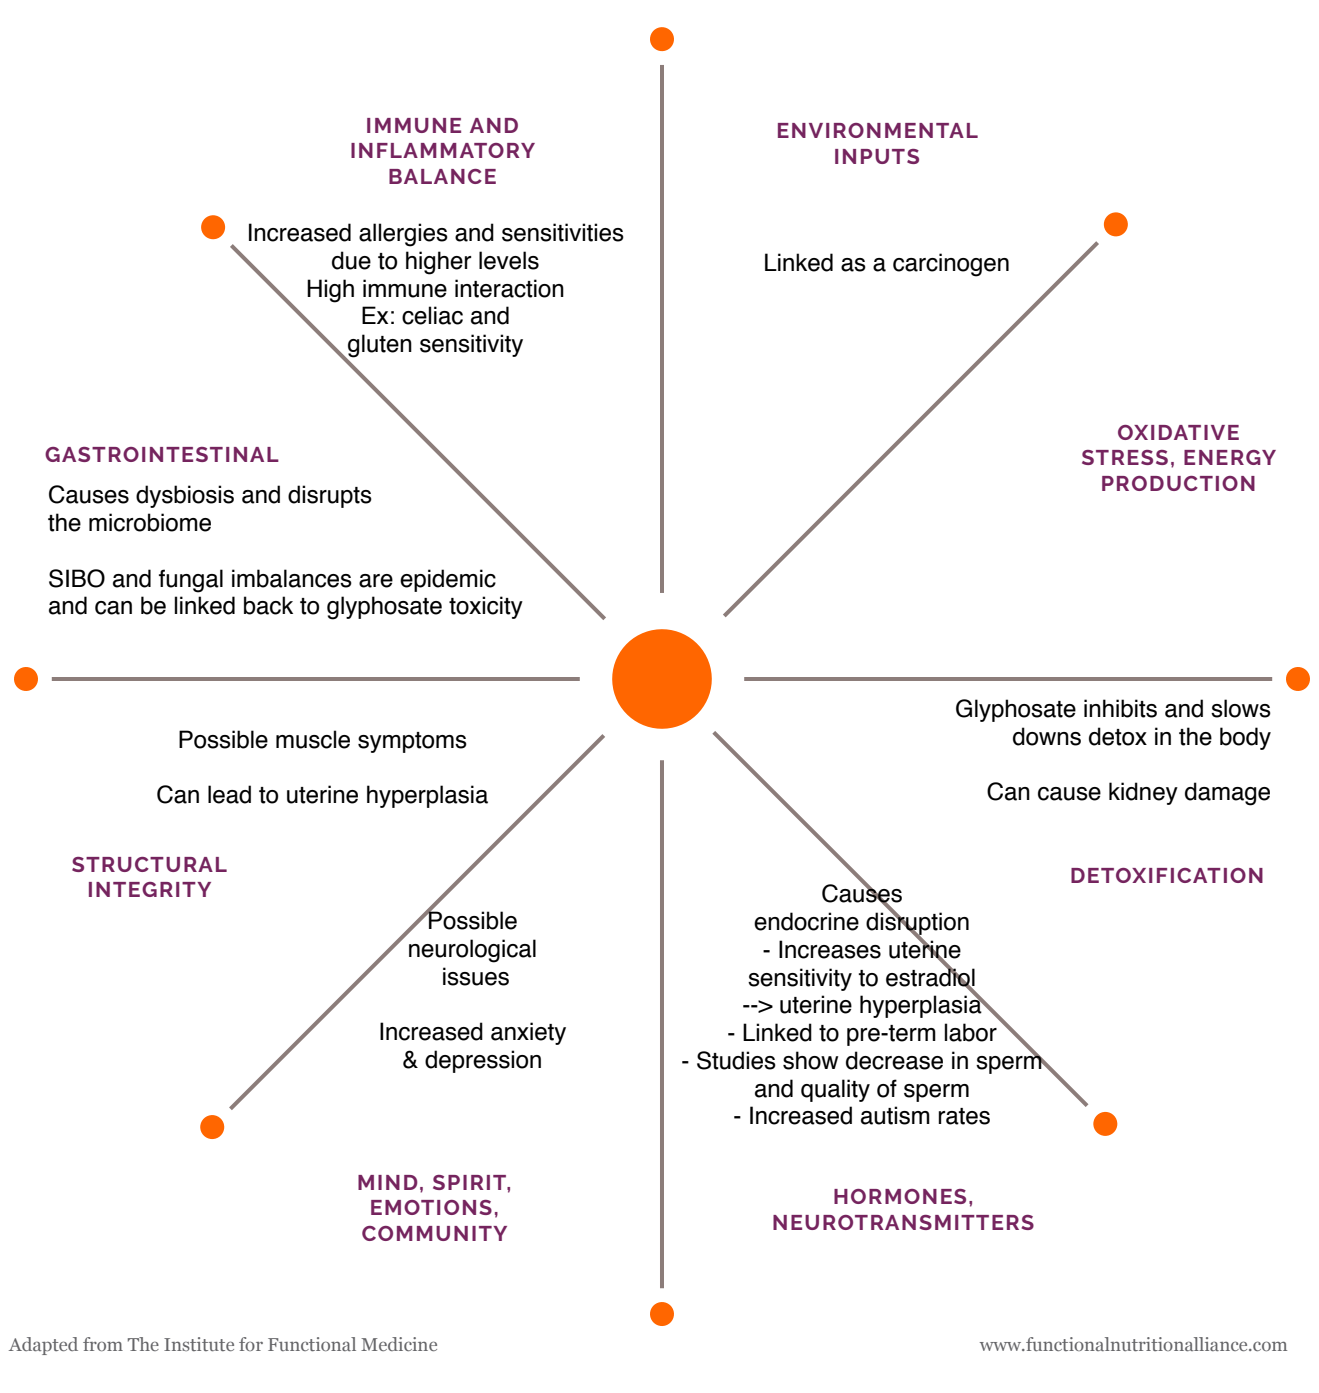

Food is more contaminated due to contaminated soil

MEDIATORS

Liposomal glutathione shown to help the body detox glyphosate

Infrared sauna
Binders (clay; charcoal modified citrus pectin)

Be involved!
Ramazzini Institute

SLEEP/RELAXATION

EXERCISE/MOVEMENT

NUTRITION/HYDRATION

- Glyphosate can deplete amino acids plus minerals such iron, cobalt, molybdenum and copper
- Avoid sugar, wheat, corn and soy even if organic best as possible
- Water systems can be laced

STRESS/RESILIENCE

- + Liposomal Glutathione can be supportive to those with glyphosate toxicity
