Daycare/Boarding Playtime Requirements

Our guidelines are set forth to ensure the health and safety of all daycare participants.

- All dogs over 6 months of age must be spayed or neutered.
- All dogs must be current on vaccinations. Owners must have proof from their veterinarian that rabies, distemper, and bordetella vaccines are current and giardia, fecal and heartworm tests are current to our standard protocol.
- All new daycare attendees must test negative for giardia and other parasites within six months. If tested positive, they must be treated and retested.
- All dogs must be free of fleas and ticks. If external parasites are found, the dog will be isolated for the remainder of the day and treated at the owner's expense.
- All dogs must be in good health. Owners certify that their dog(s) are in good health and have not been ill with a communicable condition for the last 30 days. Upon admission, all dogs must be free of any condition that could potentially jeopardize other guests, including fleas and ticks. Dogs that have been ill with a communicable condition in the last 30 days will require veterinarian certification of health to be admitted or readmitted to daycare.
- All dogs must be non-aggressive toward food and toys. Owners must certify that their dogs have not harmed or shown aggression toward any person or dog.
- All dogs must pass our three-step temperament assessment test: The human interaction test, introduction to day care group through barrier, introduction to day care group setting on leash.

The safety and health of our participants is our primary concern.

Thank you,

Daycare Administrator
