- Intestinal Parasite Test
- Basic Bloodwork

Essential Kitten

- 4 Office Exams/Visits
- Up to 6 Vaccines - Including Boosters as Recommended by Veterinarian
- 2 Intestinal Parasite Tests
- Deworming (up to 2 based on test results)
- Feline Leukemia/FIV Test

Essentially this plan covers all the basics to keep your kitten and adult cat healthy!

“The essential feline plan is an excellent plan for young adult cats, whether they are seemingly healthy or showing signs of a problem. It is a basic instinct for cats to hide signs of illness from us, so much so that sometimes we don’t find diseases until they are quite advanced. A thorough physical exam and blood screening allow us to watch for early signs of problems and hopefully prevent them! Even if all is well, it is very helpful to have baseline bloodwork results to compare to, in the event that your kitty does get sick later in life.”

Jaelyn Luckstone, DVM
