

## **A COMPREHENSIVE PLAN** **to proactively manage your pet's health**

Preventive care makes all the difference. The Comprehensive Plan provides your dog with all of the essentials plus dental care and important screenings to keep your dog at his prime.

” This plan is a great idea for the senior dogs (over 7 years old). It offers a more detailed blood and urine screening to check for conditions that affect older dogs, such as liver, kidney, thyroid disease or diabetes. Early detection is key in preventing diseases and improving quality of life in our older pets. Since a healthy mouth helps maintain a healthy body, this plan also includes a full dental cleaning and dental x-rays, which many older pets need.”

Jaelyn Luckstone, DVM
