

A basic plan to cover your pet's **ESSENTIAL CARE**

Every cat deserves to live a long and healthy life. Consistent, preventive care is an important step in managing your cat's health and the Essential Plan covers all the basics to help you cat stay happy and healthy.

“The essential feline plan is an excellent plan for young adult cats, whether they are seemingly healthy or showing signs of a problem. It is a basic instinct for cats to hide signs of illness from us, so much so that sometimes we don't find diseases until they are quite advanced. A thorough physical exam and blood screening allow us to watch for early signs of problems and hopefully prevent them! Even if all is well, it is very helpful to have baseline bloodwork results to compare to, in the event that your kitty does get sick later in life.”

Jaclyn Luckstone, DVM
