Tri-Heart Plus
(Ivermectin/Pyrantel)

Bravecto is not effective against lone star ticks beyond 8 weeks after dosing. Bravecto has not been shown to be effective for 12-weeks' duration in puppies less than 6 months of age.
Tri-Heart Plus: All dogs should be tested for heartworm infection before starting a preventative program. In a small percentage of Ivermectin/Pyrantel treated dogs, digestive and neurological side effects may occur.
