

GrandCare is the next generation of resident safety communications at Holly Creek. In case of emergency, staff members can use GrandCare to send messages instantly to residents, directly in their apartments. Everyone will be informed and know exactly what to do.

Residents use GrandCare to easily “check-in” every morning. If a resident misses a scheduled check-in, staff will be notified automatically.

GrandCare uses a wireless network that survives loss of electrical power, telephone service and computer networks, so the system will keep working whenever it is needed.

Details:

- One tablet in each resident’s apartment
- Receives messages from Concierge
- Touch screen interface
- Residents check in using the device every morning
- Additional features include: the weather forecast, games, and the resident directory
