

McCormick Construction is honored to be in partnership with Crystal Valley in building their new 500,000 ton per year feed mill, located in Trimont, MN.

Construction of the new feed mill will begin spring of 2021 with completion scheduled for August of 2022.

The mill will feature 250 tph truck receiving for ingredients, 61,000 bushel of whole corn storage above 3 RMS, 12x52 roller mills, 2018 tons of ingredient storage, a 9-ton batching system utilizing a 9-ton dual ribbon Scott mixer, and micro systems by Beta Raven. The mill will also feature a dual lane truck loadout system including 40 loadout bins and two 9-ton Able weigh lorry scale systems. Automation for the mill will be provided by Beta Raven.

Crystal Valley is a leading farm supply and grain marketing cooperative focused on serving the needs of crop farmers and livestock producers in southern Minnesota and northern Iowa. Crystal Valley currently employs 250 full-time employees, across 16 locations, with top quality products and services in our core businesses of Agronomy, Energy, Feed, and Grain

McCormick Construction is an industrial construction contractor providing design-build, general contracting, millwright, concrete and crane services to bulk material storage, handling and processing facilities throughout the United States. Since its founding in 1992, McC's primary mission has been to build the highest quality and most efficient facilities possible for its clients and to stand behind its work in quality of construction, materials installed, and overall satisfaction of its clients.
