Dedicated to

Words are inadequate to express my heartfelt thanks to my wife, Jeong Yong-suk, and to my son, Woo-Cheol, for their support and patience. Also, I thank Jonn Jeanneret, who spent much time shooting all the amazing photos, for designing and formatting this book; and keeping me company as I searched for crags many days and nights and whose passion and enthusiasm for this book matched my own. Although there are no tall tales or photos of renowned climbers, we did our very best. Thanks to all of my Busan crew for their support: Robin, Feliz, Grant, Jake, Rob, Mack, Heeran and also to KOTRers. Special thanks goes to Brenna and Vicky, who tediously proofread the text and checked the grammar.

WARNING: Climb at your own risk and take personal responsibility for your actions. Rock climbing is an inherently dangerous activity and the users of this book are presumed to have undertaken the recommended instruction to climb safely. The authors are not responsible for your actions and take no liability for any consequences of the reader's use of this book.

MASTER CRAG LIST

There are 156 crags included in this book. GPS coordinates and maps have been provided for each one. Common map symbols and their meanings are shown below. Route heights are measured in meters. Crag charts are listed with the routes starting from left to right, unless otherwise noted. For information that is unavailable, or if a general consensus was not reached, an asterik “*” is placed. It is also becoming more common for developers to mark their routes at the crag with the name and grade. There are incredible places to climb in Korea. Explore. Discover a line that inspires you. Climb on.

Crag	Routes	Grade	Page
Ami-san, Seoksan-am	아미산 석산암	12 5.9 - 5.12b A0	157

Korean Romanization	300
Korean Phrases	303

South Korea is roughly seventy percent mountainous, making it one of the most rugged rock climbing regions. The protruding and folding of Korea's stunning granite slabs, the limestone bluffs, mass of sturdy basalt, and the porous volcanic rocks will lead you to climb in every nook and cranny of the country. The interest in rock climbing in South Korea has exploded in the past decade, as the people of the country explore outdoor sports and seek adventure more than ever before. Already there are more than two hundred established crags to climb throughout the country, roughly one hundred indoor gyms, nearly eighty outdoor walls and a dozen artificial ice walls. South Korea is also home to a female sport climbing world champion. With this amazing growth has come a rapid increase in the number of climbers and competition to develop new routes among climbing clubs. South Korea, hence, offers something for every climber. The scope of this book includes; ease of access to crags by public transportation, quality of the rock, and the quantity and variety of routes with grades throughout every province based on general consent. My hope is to introduce Korea to foreign climbers, and to provide local climbers with a new climbing perspective. For nine months I have traveled all across the nation to gather information from each crag. However, because I work full time, I wasn't able to include every climbing area. The information assembled in this guide is not intended to be an accurate route guide. Neither is it meant to be a book on how to climb. Rather, it is to provide general information and tips on where to find the crags and the type of climbing that is available. The primary focus is on how to get there without the trouble that navigating to a new place sometimes brings. Regardless of how good or how much information I have included on accessing the crags, it can still sometimes be difficult to get to the crag because things will inevitably change even between the time of this book's publication and the moment you read it. If you have discovered an error, a gem crag you want to add, or anything that needs to be in the guide I would be pleased to hear from you.

The real spirit of climbing should be based on climbing the rock. In the climbing world, it is not about hard climbing or about chasing the grades, but climbing lines that inspire us! Be well, stay safe, and just enjoy climbing.

Transportation

Domestic flights and ferry boats are easily accessible for travel around South Korea. Passenger trains operated by Korail are fast and punctual, with many connecting and feeder lines. Be aware that trains are usually full on weekends. Buses like express, intercity, and city buses are comfortable and affordable. Overall, South Korea has an amazing public transportation system.

Accommodation

For budget travelers, there are jjimjilbangs 찜질방. They are basically saunas that include shower facilities, TVs, computers, sometimes amusement arcades, and sleeping rooms. These will be the cheapest places to stay. Minbaks 민박 are another option where a few people or a group can squeeze into one room. Campsites are also available at many of the crags.

Description

(Buchae-bawi, South) - As one of the first crags developed in Busan, Buchae-bawi has been beloved by climbers for decades. This wall is mainly sport climbing with one trad climb on an overhanging face. It offers cracks, overhangs, roofs, and a crimpy face for climbing. It is in the sun all day.

(Buchae-bawi, North) - The north face is primarily a trad wall. There are great crack climbs to practice leading. It is in the shade all morning.

(Mumyeong-bawi & Seil Gelande) - This crag faces south which makes it good for the cold weather season. Ridge climbing is also available here.

(Eun-byeok) - Eun-byeok faces northeast and offers granite sport climbing.

Directions

(Buchae-bawi) - 35.259541N 129.066149E

(Mumyeong-bawi & Seil Gelande) - 35.264657N 129.064046E

(Eun-byeok) - 35.265331N 129.062791E

Oncheon-dong, Dongrae-gu, Busan 부산 동래구 온천동

(Buchae-bawi) - In Busan, take the subway to Oncheonjang Station 온천장, on the orange line (Line #1). Cross the pedestrian bridge from the subway station, towards Home-plus, and take Bus 203 from the bus stop under the bridge. Get off at East Gate 동문입구 near the top of the mountain. The bus will take twenty minutes to get to the stop from Home-plus. Walk up and pass through the East Gate. Continue on the main trail heading north for twenty minutes until you see some rock array and boulders. Before the trail heads down to a large open area, look for any path that follows the stone wall. Buchae-bawi is just to the right of the stone wall and you will see the butterfly-shaped boulder that is easily recognizable from 500m.

(Mumyeong-bawi & Seil Gelande) - From Buchae-bawi, you can see the long ridge of Mumyeong-bawi to the north. There are two different ways to get to this crag. One is to jump over the stone wall at the big open area between Buchae-bawi and Mumyeong-bawi. Walk down the main trail heading to the left for ten minutes until you reach the beginning of the ridge climb. Another is to hike up, following the stone wall to the end of the ridgeline and then walk down, searching for an off-beaten trail by the crag. Follow it for ten minutes to the front wall.

(Eun-byeok) - From the end of Mumyeong-bawi ridgeline, pass the fourth watchtower and continue on the northbound trail of the stone wall for 50m. You will see the top of this crag on your right. You can either walk down to the top of the crag or top-rope from the anchor to get to the start.

Gear

(Buchae-bawi South) - 7 draws, a 50m rope, and a couple of small cams.

(Buchae-bawi North) - 10 draws, a 50m rope, and a full set of cams.

(Mumyeong-bawi & Seil Gelande) - 8 draws, a 60m rope, and a full set of cams.

(Eun-byeok) - 10 draws and a 50m rope.

Safety

A helmet is recommended for the climbs here as some of the bolts and anchors are old and rusty.

GEUMJEONG-SAN, DAERYUK-BONG 금정산 대륙봉

Description

Daeryuk-bong has two walls that face southeast. The lower wall is on the left and the climbs are relatively shorter than the upper wall. It features granite sport climbing.

Directions

35.240073N 129.062861E

Oncheon-dong, Dongrae-gu, Busan 부산 동래구 온천동

In Busan, take the subway to Oncheonjang Station 온천장, on the orange line (Line #1). Cross the pedestrian bridge from the subway station, towards Home-plus, and take Bus 203 from the bus stop under the bridge. Get off at Sanseong Bus Stop 산성, one stop after East Gate 동문입구. There is a stone arch bridge by the bus stop. The trail, heading south, begins on the east side of the bridge. From the first fork in the trail, take the upper path that branches off to the right. Continue south for five minutes. There will be another fork in the trail. If you continue left, it will lead you to the lower wall and the path to the right will take you to the upper wall.

Gear

10 draws and a 50m rope.

Additional Comments

There are a few campsites available and there is a spring on the trail 10m before the crag. Campfires are not allowed in this area.

AMNAM 암남

Description

(Geobuk-am) - This is the closest crag from the park entrance. It faces northeast and offers easy vertical climbing on sedimentary rock.

(Sangeo-am) - This crag offers steep and challenging climbs. The main wall faces east with one route on the right side facing south. It begins to get shade in the afternoon. Climbing here, with the sounds and sights of the waves, is a simple pleasure that washes all the worries of life away.

(Gorae-am) - Gorae-am hasn't been climbed for many years. It faces southeast. It offers multi-pitch climbing with one aid route.

Directions

(Geobuk-am) - 35.059918N 129.019173E

(Sangeo-am) - 35.057955N 129.018164E

(Gorae-am) - 35.057538N 129.017617E

Amnam-dong, Seo-gu, Busan 부산 서구 암남동

(Geobuk-am) - In Busan, take the bus or subway, orange line (Line #1), to Nampo-dong 남포동. From there, take Bus 7 or 71 to Amnam Park 암남 공원. At the park entrance, follow the main trail that follows the sea side for ten minutes until you see a small wooden suspension bridge. Don't cross the bridge. Look for a trail, on your left and over the fence, 5m before the bridge. Jump over the fence and walk down the trail that heads toward the sea. Geobuk-am is located under the bridge. When the tide is low, it will be easier to get to the crag by walking down the steel staircase after the wooden suspension bridge. Walk down the steel staircase and turn left. Continue down the coast until you reach to the crag. It will take twenty minutes from the park entrance. **(Sangeo-am)** - From Geobuk-am 거북암, walk south along the coast. You'll see a steep trail past the iron staircase. Continue on this trail to the top of the hill, which is actually the top of the overhanging climb at Sangeo-am 상어암. It will take ten minutes from Geobuk-am 거북암. If you are coming from the main trail, there is a fork after the wooden suspension bridge. Go left at the fork and walk down the iron staircase. At the end of the stairs, turn right and continue on the trail that leads to the top of the short, steep hill and to the top of the crag.

(Gorae-am) - You can see the gigantic Gorae-am 고래 wall from the far west side of Sangeo-am 상어암. However, it is almost impossible to traverse the cliff from Sangeo-am 상어암 to Gorae-am 고래암. To get to this crag, take the main trail from the park entrance. After crossing the wooden suspension bridge, take the path that leads to the right. Continue on this trail for five minutes until you reach a pavilion to your left at the top of a cliff. Take the trail on your right from the pavilion. This path has a long fence that heads to the sea. Follow the trail for ten minutes until you reach the crag.

Gear

(Geobuk-am) - 8 draws and a 50m rope.

(Sangeo-am) - 11 draws and a 60m rope.

(Gorae-am) - 12 draws and a 60m rope. If abseiling from the top of the second pitch, two 50m ropes are needed.

Safety

As these crags are sea cliffs, the ledges and edges are easily eroded so be cautious of falling rocks. Some of the bolts may not be secure because of marine erosion. A helmet is recommended.

Additional Comments

Camping is NOT allowed. Soldiers patrol the area regularly at night and are authorized to fire their weapons.

(Geobuk-am) - The ground is sandy. A rope mat is recommended.

Description

This crag is also known as Samagui-bawi 사마귀바위. It didn't have an actual name until KOTR (Korea on the Rocks) members, from Busan, re-bolted and fixed all the anchors in 2011. When they were fixing the bolts and anchors, there were many warts on the wall and Samagui-bawi was named after that. This crag faces south. There is vertical and slab climbing. It's very crimpy and the rock is solid.

Directions

35.110869N 128.97225E

Dangri-dong, Saha-gu, Busan 부산 사하구 당리동

In Busan, take the subway to Hadan Station 하단 on the orange line (Line #1). Take Exit 9 and continue walking straight for 30m. Take the first right, and walk up the steep road until you reach a T-junction on a back street. From there you will see this crag. Hike up the steep trail for twenty minutes. A few KOTR ribbons are still hanging on trees and they will lead you to the crag.

Gear

7 draws and a 50m rope.

Safety

It has been re-bolted and all the anchors are shiny with stainless steel hooks.

Additional Comments

It gets sun all day long and is great for winter climbing.

GADEOK-DO 가덕도

Description

This is the largest sea cliff crag in Korea. Gadeok-do was developed in 2010 and it offers a great view with climbs of various grades and loads of features. The gneiss cliffs are fairly solid even though it sits by the sea. On the harder routes, there are many exotic yoga moves that many will find exciting. It faces south and offers two multi-pitches. The crag is in the sun all morning, but is in the shade after 2 p.m.

Directions

35.019424N 128.8138E

Cheonseong-dong, Gangseo-gu, Busan 부산 강서구 천성동

In Busan, take the subway to Hadan 하단 on the orange line (Line #1). Take Exit 3 and you will see the bus station once you exit. At the bus station, take the bus (58-1 is the best) bound for Yongwon 용원. From Yongwon 용원, which is the last bus stop, transfer to the village bus #1. Get off at the last stop, Cheonseong 천성. From there, take the curvy road that goes underneath the overpass. When you reach a sharp switchback, look for the two concrete drainage ditches that will be on your right. Walk across the small ditch and take the trail that heads to the top of the hill. Then continue down the steep trail that heads down to the sea. There are many guide ropes leading you to the crag. From Cheonseong 천성, it takes forty minutes to get to the sea cliffs.

Gear

12 draws and a 60m rope.

Safety

All the bolts and anchors are solid. However, beware of rockfall, especially the belayer. A helmet for the belayer is recommended.

Additional Comments

When trying to climb on the left side of the crag, look for a reel of string that can be found around the belay spots. As you retrieve your rope after a climb, tie this string on to the end of your rope so you can pull in your rope without it falling into the ocean. On the left side of the cliff, there are a few fun deep water solos available and good cliff jumping spots as well.

Description

(Beom-bawi) - Beom-bawi is relatively small, but offers pleasant climbing on vertical and overhanging granite walls. It faces southeast.

(Tanggeon-bawi) - The granite climbs here are intense with lots of jugs and pumpy holds. It faces south and is in the sun all day. The upper wall is on the right side of the crag.

(Janggun-byeok) - As the main crag of Mucheok-san, this crag has various climbs from a crimp face to an easy, short slab and a hard overhanging wall. It faces south.

(Jeok-byeok) - This crag is right by the trail and the climbs are mostly short slabs and vertical climbing on granite rock. It faces southwest.

(Gaya-byeok) - The crag is also right by the trail. The climbs are mostly short slabs and vertical climbing on granite rock. It faces southwest.

(Sumeun-byeok) - This is a short and small crag with mostly vertical, easy climbs on granite rock.

(Haneul-byeok) - Although the crag offers easy and short climbs, a vast view awaits at the top and is a great place for beginners. It faces southeast and opens to the sky.

(Seong-byeok) - The hard, overhanging climbing here compares to Seonun-san.

Directions

(Beom-bawi) - 35.345744N 128.856208E

(Tanggeon-bawi) - 35.348342N 128.861711E

(Janggun-byeok) - 35.35041N 128.861488E

(Jeok-byeok) - 35.35012N 128.861728E

(Gaya-byeok) - 35.350343N 128.861782E

(Sumeun-byeok) - 35.350838N 128.861478E

(Haneul-byeok) - 35.349935N 128.863229E

(Seong-byeok) - 35.351389N 128.864346E

Sangcheol-ri, Sangrim-myeon, Gimhae 김해시 생림면 생철리

(Beom-bawi) - From the parking lot at the foot of the mountain, there is a small temple called Seokgol-sa 석골사 to your right. Walk towards the temple and head to the Buddha statue. Then walk 5m towards the temple's main building. Look for a drainage ditch to your right. Follow the trail that follows along the drainage ditch and a steel line for five minutes.

(Tanggeon-bawi) - 200m before Moeun-am Temple 모은암, look for a trail on your right at the sharp switchback (and warning sign) on the concrete-paved road. Follow this trail for twenty minutes.

(Janggun-byeok) - From the end of the concrete-paved road, right below Moeun-am Temple 모은암, take the path to your left. Continue for 300m, past the Rescue Mark 3-2, and search for a faint trail on your left 30m before the small rock tunnel. Follow the trail for 50m.

(Jeok-byeok) - Right after passing the trail to Janggun-byeok, continue up the main trail for 50m. The crag will be on your right next to the rock tunnel.

(Gaya-byeok) - Gaya-byeok is located above the rock tunnel on your right, on the main trail past Jeok-byeok.

(Sumeun-byeok) - Continue down the trail past Jeok-byeok. Walk through the rock tunnel on your left and follow the path for 100m.

Photo by Ryou, Dong-il

Kim Cheol-Gui 김철규 on "Delight" 환희/5.12b, Janggun-bawi, Mucheok-san. He has been one of the main developers in Busan and is among Korea's most humblest climbers. Unlike many other climbers in Korea, who do not allow other people to fix or replace anchors at their crag, Kim Cheol-Gui announced that his routes can be fixed, rebolted, or even altered if it makes the climb better. This is unprecedented in Korean climbing culture.

(Haneul-byeok) - Continue hiking on the main trail past Gaya-byeok for 300m. Haneul-byeok is located on the highest point of the main trail, above all the crags except Seong-byeok 성벽. Haneul-byeok can be easily seen from the trail.

(Seong-byeok) - From Haneul-byeok 하늘벽, hike towards the prayer retreat 무척산기도원 until you reach a small waterfall. Walk past the waterfall for 50m and at the fork, take the path to the left. Walk down for 300m until you reach a grave site. From the grave site, look for an off-beaten trail heading downwards. It leads to the top of the crag. Coming from Haneul-byeok, it will take twenty-five minutes.

Gear

10 draws and a 50m rope.

Safety

(Seong-byeok) - The trail to Seong-byeok 성벽 from the grave is very steep and rough. The belay ground is a bit sketchy.

Additional Comments

(Jeok-byeok, Sumeun-byeok) - Because of their location by the hiking trail, these crags are seldom visited. During the weekends, it's hard to find a place to belay because of the hikers.

Water and restrooms are available at the parking lot. It's hard to find great campsites, but there are a few available on the flat rocks.

CHEONTAE-SAN 천태산

Description

Developed in 2000 with three different walls, Siru-bong is a granite bluff that overlooks the longest river in South Korea, the Nakdong River 낙동강.

(Siru-bong, Bukseo-byeok) - This wall is on the north face of Siru-bong. The routes here consists of crack and vertical climbing.

(Siru-bong, Dongnam-byeok) - This wall is on the southeast face of Siru-bong. The climbing on the far right offers overhanging routes with a great view of the Nakdong River. On the south side, there is moderate climbing of jugs and slab. The rock changes, as you ascend further up, to finger-pockets.

(Sumeun-byeok) - This crag is 100m away from the main crags. It is mostly crack climbing. It hasn't been maintained very well and the trail is overgrown.

Directions

35.384653N 128.880107E

Geomsei-ri, Samryangjin-eup, Miryang-si 밀양시 삼랑진읍 검세리

(Siru-bong) - From Samnangjin Station 삼랑진, walk southeast along the river for twenty minutes to Jakwongwan 작원관, a historic site. If you grab a cab, it will save time. From the site, follow the paved concrete that goes above the train tracks. At the end of the concrete path, there is a faint trail that leads off to the right. Keep walking on the relatively flat trail with the train tracks on your right. A pleasant tree-covered trail runs gently up and down for thirty minutes past two small concrete walls and a tiny hut. When the crag comes into view, the trail starts becoming steeper. Hike up the steep trail for ten minutes to the crag.

(Sumeun-byeok) - From the northwest end of Siru-bong, Sumeon-byeok can be seen to the north. It is a five minute walk from Siru-bong.

Gear

10 draws and a 60m rope.

Safety

The belay station on the southeast wall of Siru-bong has limited space on the steep rocky ground. Belayers should be anchored to the guide wire or to the bolts on the ground. Rock falls occasionally on the middle section of the southeast wall.

Additional Comments

Try to get everything you need at the stores by the train station. If you grab a cab, ask the driver to give you his business card so you can call him to drive you back to the train station after you finish climbing.

BIRD'S CHORUS - AMJANG 새들의 합창 암장

Description

This place was developed by a local climbing club in Gimhae 김해. This is a small, but cozy place to climb during winter. The easiest climbing starts at the far left and then gradually gets harder as the routes move to the right.

Directions

35.3704N 128.867826E

Doyo-ri, Sangrim-myeon, Gimhae 김해 생림면 도요리

There is no direct public transportation to the crag. From Gimhae Bus Terminal 김해, take the bus leaving for Doyo 도요. Get off at Doyo 도요 and walk towards the overpass. Walk underneath the overpass and continue on the road alongside the river for 5k until you reach a sign that says "백련암" Baekneonam. Take the unpaved road heading towards the mountain for ten minutes. There will be a sign on your right that indicates the rock climbing area. The crag can occasionally be seen to your right as you hike up.

Gear

8 draws and a 50m rope.

Additional Comments

There is a good wooden belay station and campsites with a restroom. Food and water should be purchased in town.

MUNSU-SAN 문수산

Description

Munsu 문수 was developed from 1989 to 1993. It has about one hundred routes across nine different walls and is divided horizontally by the hiking trail. The routes are made of gneiss rock with various features, lengths, and grades. All of the routes face south and are in the sun all day.

Directions

35.530078N 129.213402E

Yul-ri, Cheongryang-myeon, Ulju-gun, Ulsan 울산 울주군 청량면 울리

From Ulsan or Busan Nopo-dong Bus Terminal, take a bus heading for Munsu 문수. Get off at Yulli, Yeonghae Maeul Bus Stop 울리 영해마을. Go towards Nonghyeop Bank 농협 and hike along the paved road that leads to the mountain for forty minutes until you reach the Munsu-sa 문수사 parking lot. From the parking lot, walk on the main trail for ten minutes until you reach stairs with a steel handrail. Look for a trail on your left, just before the stairs, and take that trail to reach the upper walls. Along the upper section trail you will pass a hut and a small cascade. Past this area is a trail to your left that heads down to the lower section walls.

Gear

10 draws and a 60m rope.

Safety

Be careful not to kick down any rocks because there may be climbers on the lower sections of the wall.

Additional Comments

There are campsites around the crag and water is available from the spring, but it may run dry during the winter. From the lower section of the wall, it will be easier to walk back down to the parking lot by following the rock stairs for ten minutes.

Description

(Hanbaek-am) - This granite crag was opened to the public in November 2008. It offers seventeen routes, including a few multi-pitches with one five-pitch route. It faces south and was developed to honor a member of the K2 expedition team in 2008 from Ulsan Hanbaek Mountain Club 울산한백산악회. This crag used to be called Central Wall 중앙벽.

(Jowa-byeok) - This small crag is 500m to the left of Hanbaek-am. It offers challenging climbs on a steep slab that faces south. The routes are relatively short and have not been named or graded because there have been multiple developers in this area. If attempting the granite routes here, the climbing is like a hard 5.11. This is a good place to warm up before climbing at the main crag.

(Wu-byeok) - This is a training crag for beginners. It is composed of easy, granite slab routes that have not been named or graded because there have been multiple developers in this area. This wall faces south as well.

Directions

35.589504N 128.988272E

Samyang-ri, Sannae-myeon, Miryang-si 밀양시 산내면 삼양리

From Miryang 밀양 or Eumyang 언양, take the bus bound for Euleumgol 얼음골. Get off at the last stop Hobakso 호박소. Go back up the road along the mountain side for 5km until you see the stone sign “밀양얼음골사과주지” Miryang Euleumgol Sagwa Jusanji, by a small noodle tent called Busan Jib 부산집. Across from the noodle tent, the trailhead starts at a point where there are lots of hanging ribbons. Immediately turning right on the trail will take you to Baekun Slab. If you keep hiking up instead of turning right at the trailhead, you will end up reaching the top of the mountain. To get to the Hanbaek-am and Jowa-byeok, look for a small trail that is 7m left of the main trailhead. Follow this trail for thirty minutes.

Gear

10 draws, a 60m rope, and a full set of cams.

Safety

A helmet is recommended.

Additional Comments

A good belay station is set up at Hanbaek-am and good campsites available. Food and water should be gathered beforehand.

GUMAN-SAN AMJANG 구만산 암장

Description

Development began here in 2000. It is an overhanging crag that faces west. It still offers untapped potential.

Directions

35.610156N 128.872054E

Bongeu-ri, Sannae-myeon, Miryang-si 밀양시 산내면 봉의리

From Miryang Bus Terminal, get off at Sannae Elementary School 산내초등학교. Walk along the road to Guman-san 구만산, past Bongeu Bridge 봉의교, for thirty minutes. The crag is at the beginning of the first wooden staircase. It takes ten minutes to reach the crag from the trailhead at Guman Temple 구만사.

Gear

10 draws and a 50m rope.

Safety

There is a waterfall by the crag so the routes are easily dampened and prone to rockfall. A helmet is recommended.

Additional Comments

Since it is located by a rivulet in the valley, it is a good place for a holiday trip in the summer. The crag is still under development and the route names are up in the air.

MIRYANG, BUEONGSAE-BAWI 밀양 부엉새바위

Description

Developed from 2001 to 2002, this granite crag has vertical, overhanging, and small roof climbing. It offers various moves and requires power. There are a couple of short, easy routes on the right side of the wall. It faces northwest.

Directions

35.514806N 128.86817E

Taeryong-ri, Danjang-myeon, Miryang-si 밀양시 단장면 태룡리

From Miryang Bus Terminal, take the bus for Pochung-sa 표충사. Get off at Taeryong 태룡. Head east on the main road for five minutes. You'll reach the restaurant "Noblian". The crag is right behind the restaurant. It will take twenty minutes to reach the climbing wall from Miryang Bus Terminal.

Gear

12 draws and a 60m rope.

Additional Comments

This crag is on private land. In 2009, this climbing area was closed to all climbing due to the inappropriate conduct of climbers using the wall. In 2012, KOTRi (Korea on the Rocks Initiatives) finally succeeded in persuading the land owner to re-open the wall. With the help of local Busan climbers, they repaired the equipment on the wall. All the anchors were replaced with new stainless chains. All of the rusty bolts were removed and new bolts were put in.

PHOCHUNG-SA, JEOK-BYEOK 표충사 적벽

Description

This crag was developed in 1997 and has seven routes. It is located high in the mountain behind Phochung-sa, one of the most famous temples in Korea. There is an A2 aid climb, which can be climbed even in the rain. Jeok-byeok has a dihedral that faces southwest. The position and character of its routes will remind climbers of the climbing at Jeok-byeok on Seorak Mt.

Directions

35.532183N 128.981264E

Gucheon-ri, Danjang-myeon, Miryang-si 밀양시 단장면 구천리

From Miryang Phocung-sa Ticket Counter 밀양표충사, turn right after passing a small bridge. Hike up the main trail that follows along the creek towards Cheungcheung Falls 충충폭포 for forty minutes. Look for the area sign “마-1”, right before the small wooden bridge past Heukryong Falls 흑룡폭포. Look for an off beaten trail to your left from the sign, and scramble up for 100m to the crag.

Gear

12 draws, a 60m rope, and two full sets of cams.

Safety

A helmet is recommended as a precaution against some of the loose rock.

Additional Comments

During the summer season, this area can get overgrown and there are a lot of bugs. Bring bug repellent. There are good campsites under the overhanging section. It offers great shelter when it rains.

PHYOCHUNG-SA, MAE-BAWI 표충사 매바위

Description

This gigantic wall of metamorphic rock faces south and offers a great multi-pitch climb that makes you feel the high altitude. It was developed by Ulsan University. During the Japanese colonial period, rumor had it that there were treasures inside the cave at this crag. The Japanese came up to find the treasures, but all the treasure had turned into falcons. Mae-bawi is named after this story.

Directions

35.543864N 128.950449E

Gucheon-ri, Danjang-myeon, Miryang-si 밀양시 단장면 구천리

From Miryang 밀양시, take a bus bound for Phyochung-sa 표충사. Get off at the end of the line. Walk towards the Phyochung-sa Ticket Counter 표충사매표소. There is a small bridge 20m before the ticket counter. Cross the bridge and hike up until you reach the village “Mae-bawi Maeul 매바위마을”. The main trail to the crag was blocked a long time ago by the local people. However, you can take the dirt road to your left, which is easily seen from the small parking lot in the middle of the village. Follow the road and take the first left at the fork. The trail starts to ascend steeply after a few minutes, scramble up the path for fifteen minutes. When you see the big crag on your right from the ridge, cross the heap of stones in the valley. It will lead you to the main trail which leads to the crag. Follow it for ten minutes to reach the crag.

Gear

15 draws, a 60m rope, and a full set of cams.

Safety

Be careful of falling rocks. A helmet and extra webbing is recommended.

Additional Comments

There are great campsites available with fresh water and restrooms. Take your food when leaving your campsite because goats may eat it! Lots of minbaks are available around the bus stop.

Please respect the local people. The farmers and villagers blocked the main trail to the crag a long time ago. You need to get permission from them to open the gate. It's really hard to get to the crag by hiking up the other trails.

MAE-BAWI 매바위 (2 OF 2)

YANG-SAN, BYEONGPUNG-AM 양산 병풍암

Description

Byeongpung-am was developed in 1992. Its overhanging, gneiss walls face northeast. The crag is in the sun for just a couple of hours in the morning. The rock is very solid.

Directions

35.342295N 129.056311E
Bukbu-dong, Yangsan-si 양산시 북부동

From Yang-san Bus Terminal, take the bus for Yang-san University 양산. From Busan, take the village bus #1 from Nopo-dong Subway Station 노포동. Byeongpung-am is right by the stream, 600m before the university.

Gear

8 draws and a 50m rope.

Safety

The bolts are in good shape, but a few of the anchors are suspect. Bring extra webbing for peace of mind.

Additional Comments

The hardest climb is to the far left side, which actually starts on the water. A belay station should be set up for the climb to keep the rope out of the water.

PALRYONG-SAN 팔용산

Description

(Haebyeongdae-bawi) - This crag faces west in the valley and the climbing ranges from vertical, overhanging, and slab. The Marine Corps train around here.

(Sangsa-bawi) - Sangsa-bawi sits on top of the mountain overlooking a beautiful reservoir and the industrial complex. The routes here are a mix of vertical and slab climbing.

Directions

(Haebyeongdae-bawi) - 35.225665N 128.604831E

(Sangsa-bawi) - 35.232124N 128.597052E

Bongam-dong, Masanhwoiwon-gu, Changwon-si 창원시 마산회원구 봉암동

(Haebyeongdae-bawi) - From any major city, take a bus to Masan 마산. Then transfer to a bus bound for Masan Highway Bus Terminal. From there, walk five minutes towards the Export Free Zone 수출자유지역 to reach the local bus stop. Once there, take a bus bound for Changwon and get off at Sanhaewon 산해원. Follow the pavement that leads to Bongam Reservoir 봉암저수지. After five minutes, you will reach Haebyeongdae-bawi 해병대바위.

(Sangsa-bawi) - The trailhead to Sangsa-bawi starts at the southwest side of the dam at the lake. Follow the northeast bound trail towards the summit for twenty minutes.

Gear

10 draws, a 60m rope, and small to mid-sized cams.

SINBAN 신반

(*Byeongpung-am*) - This metamorphic rock, developed in 1997, faces west. It has three walls. The middle part is hard and overhanging, the left part is a steep face, and the right side is fairly easy with vertical face climbs.

(*Keundeom-bawi*) - This crag was developed in 2009. It features sedimentary rock that faces east.

(*Jakeundeom-bawi*) - This crag is metamorphic-sedimentary rock that faces east. The 5.10's consist of vertical climbing, but the rest are overhanging lines.

Directions

(*Byeongpung-am*) - 35.466979N 128.329453E

(*Keundeom-bawi*) - 35.473707N 128.3057E

(*Jakeundeom-bawi*) - 35.467626N 128.308296E

Sinban-ri, Burim-myeon, Euiryeong-gun 의령군 부림면 신반리

(*Byeongpung-am*) - From Busan or Masan, take the bus for Burim, Sinban 부림 신반. At downtown Burim, cross the bridge Shinbangyo 신반교 and walk under the overpass towards Songam-sa Temple 송암사. The crag is visible from the street.

(*Keundeom-bawi*) - From the village Burim, Sinban 부림 신반, walk west on the main road for 600m and turn left onto a small, cement-paved road that heads towards the mountain. After you cross the stream, you'll see a small sign saying “큰덤바위” Keundeom-bawi. Take the trail to your left. Just 5m after the trailhead, look carefully for a faint path on your right and continue hiking up for five minutes.

(*Jakeundeom-bawi*) - From the village Burim, Sinban 부림 신반, walk towards the intersection by the police station. Take a left towards the elementary school and continue for 1km. Right before the bridge Seodeokgyo 서득교 turn right at Euiryeong Retirement Home 의령군민노인복지회관 and continue on the road for 1.5km. The crag is across from the small village Sangampyeong-Maeul 상암평마을. A big tree will be on your right. Walk through the rice field by the farm and cross the stream. It takes ten minutes to get to the crag from the village and the crag can be seen from the road.

Gear

10 draws and a 60m rope.

Safety

A helmet is recommended.

Additional Comments

(*Byeongpung-am*) - Good campsites and water can be sought at the temple, but always be aware of your surroundings and do not disturb the temple.

(*Keundeom-bawi*) - There are a few great campsites and a simple restroom around the crag.

WARYONG-SAN, SANGSA-BAWI 와룡산 상사바위

Description

Sangsa-bawi 상사바위 used to be a cliff where people jumped off because of unfulfilled love. Sangsa means to anguish over a lover, so Sangsa-bawi is the place to sit and wait for your lover. It was developed from 1980 to 1990. The crag is divided into five walls and faces southeast with an amazing view of the ocean.

Directions

34.978463N 128.097469E

Jukrim-dong, Sacheon-si 사천시 죽림동

From Jinju Bus Terminal 진주, take a bus heading for Samcheonpo 삼천포. The buses run every ten minutes. From there, take the bus for Namyang-dong 남양동. Walk through the small town and continue to the trailhead, past Namyang Reservoir 남양저수지, for twenty minutes from Namyang-dong Bus Stop. At the trailhead, hike up the Minjae-bong 민재봉 trail for twenty minutes until the trail reaches a fork. Take the trail to the right for ten minutes.

Gear

15 draws, a 60m rope, and a full set of cams.

Safety

Rock falls occasionally and a bit of the crag is chossy. A helmet is recommended.

Additional Comments

There are campsites available by the crag.

Description

Ae-bawi 애바위 stands tall and overlooks the captivating coastline of the south sea. It was developed in 2001 and is located on Geoje Island. It is granite rock of mostly multi-pitch routes with face climbing on the first pitches and slight overhangs on the second pitches. The longest route is 62m and the crag faces southeast.

Directions

34.809839N 128.657455E

Mangchi-ri, Ilun-myeon, Geoje-si 거제시 일운면 망치리

From Jangseungpo 장승포, take the bus to Youn Dol 윤돌. It will stop at the Mangchi Samgeori 망치 삼거리 three-way intersection, between Gujora Beach 구조라 해수욕장 and Mangchi Beach 망치 해수욕장. From there, take the north road that leads up to the mountain for forty minutes and there will be a sign to your left, located on the top of a hill, that says “황제의길” Hwangjeeuigil. There will also be a small open area for car parking. Look for a white arrow mark in this area, labeled “애바위” Ae-bawi. Following the arrow, hike past the open area and up the trail for fifteen minutes. Ae-bawi will be on the left side of the trail. For an alternate route, exit at Mangchi 망치 Bus Stop, which is three stops after Youn Dol 윤돌. 400m southwest from the bus stop is a pension house called “박하향기” Bakhahyanggi. There is a trail on the south side of the house. Follow this trail for forty minutes up to the crag, which will be on your right side.

Gear

16 draws and a 50m rope.

Safety

The bolts and anchors have been well maintained. However, some of the rock is loose so a helmet is recommended.

Additional Comments

The view from the crag overlooking the ocean is amazing and there are many campsites around the crag that offer a great stay.

Description

Tongyeong is known as the “Naples” of Korea because of its beautiful coastal scenery. All of the climbing here is similar. The granite rock features crack, overhanging, and vertical climbing with holds ranging from small porous pockets to fist-sized jugs. The main crag here is Ssangsa-bawi. There are two other crags that sit next to Ssangsa-bawi. (*Ssangsa-bawi*) - This granite crag is 50m wide and 80m high with an amazing view of the ocean from the top. There are a total of eight routes. Its name means “Two Snakes”, named for the snake-like cracks running up its face.

(*Buchae-bawi*) - It is located 20m southeast (left) of Ssangsa-bawi and is mainly vertical climbing.

(*Mumyeong-am*) - This crag sits 10m east (right) of Ssangsa-bawi. Unlike the other two, this wall also offers slab climbing.

Directions

34.92901706694599N 128.42039108276367E

Tongyeong-si, Gwangdo-myeon, Deokpo-ri 통영시 광도면 덕포리

From Tongyeong Bus Terminal, take a bus to Deokpo-ri. The bus runs every hour. Get off at Jeokdeokmaeul Samgeori 적덕마을삼거리. Follow the concrete pavement in the middle of the small village for fifteen minutes, until you reach a small dike on your right. There is a little opening for parking to your left. Mantle up the start of the tiny dike and continue up for five minutes. The crag can be seen from the village.

Gear

15 draws with a 60m rope. There is one trad route available here. Bring a rack of mid-sized cams for it.

Additional Comments

Restrooms are available at the crag. There is a map of the routes leaning against Ssangsa-bawi, at the center of the crag.

Description

The island Somaemul-do 소매물도 is located in Tongyeong-si Hansan-myeon 통영시한산면, which is on the southern tip of the Korean peninsula. Somaemul-do consists of the main island and a smaller island to the south which can be reached on foot at low tide. The island has been featured on many TV commercials for its spectacular settings. There are two crags on this island, the one on the main island is called Goraegae Sea Cliff 고래개해벽. Also, there are five monoliths scattered around the island. Goraegae Sea Cliff gets sun all day long. This island is great place for a summer holiday climbing trip.

Directions

34.62879832674262N 128.55185687541962E

From Busan, take an intercity bus heading to Tongyeong or Geoje-do. At the passenger boat terminal, get on a ferry bound for Somaemul-do 소매물도. Once you arrive on the island, walk up the main trail that heads south. When the fork splits, take a left to go to Goraegae and the Monoliths. The path to the Monoliths is only accessible during low tide. During any other time, you can hire a fisherman to take you there by saying “Chotdae-bawi gabsida”, which means “Can you take me to the Monoliths?”

Gear

12 draws, a 50m rope, and a full set of cams.

Safety

A lot of the rock is loose. A helmet is recommended.

Additional Comments

The routes here are not established routes. There are anchors at the top and a few bolts on the routes, but there are many variations to each route. Goraegae can easily be set up for top-rope and may be the best solution for most climbers because of the loose rock and undefined routes. Also, with the changing beta, grades are not set. However, the difficulty will usually be under 5.11a.

GORAGAE 고래개

JEOLLANAM-DO PROVINCE 전라남도

MUDEUNG-SAN, SAEIN-BONG 무등산 새인봉

Description

This was one of the first crags developed by Gwangju 광주 local climbers. It is composed of a variety of climbs including face, crack and a few overhanging routes on granite rock. It is located on Mudeung-san 무등산 and offers a vast view of downtown. Saein-bong faces southeast.

Directions

35.11882N 126.984572E

Hakun-dong, Dong-gu, Gwangju 광주 동구 학운동

From downtown Gwangju, take a bus bound for Jeungsim-sa 증심사. At the entrance of Jeungsim-sa 증심사입구, take the trail for Yaksa-am 약사암 and continue on for twenty-five minutes until you reach a fork called "Saein Samgeori 새인삼거리". Take the right trail and continue for twenty minutes. The top of the crag will be on your left next to a fence. To start the routes, you need to rappel down from the top anchors on the trail because there is almost no way to scramble down to the bottom.

Gear

12 draws with a 60m rope.

Safety

Hikers may cause rocks to fall above the crag. A helmet is recommended.

MUDEUNG-SAN, SEONBI-BONG 무등산 선비봉

Description

Developed in 1998, this crag is 40m high and 150m wide. It faces northwest and is a mix of granite and andesite. At this wall, there is vertical, overhanging, and crack climbing. There are a few boulder lines as well in the middle of the wall.

Directions

35.157916N 127.004871E

Geumgok-dong, Buk-gu, Gwangju 광주 북구 금곡동

Take a bus heading for Chunghyo-dong 충효동 and get off at Geumgok-dong 금곡동. At the three-way intersection, turn right towards the ceramic museum and walk down the unpaved road for five minutes. You will reach a fork and there will be a sign for “광일목장” Gwangil Mokjang. Take a left at the fork and continue up the winding cement-paved road for twenty-five minutes. The trailhead for the crag is 20m off the road and can be seen while walking up the road.

Gear

13 draws and a 60m rope.

Additional Comment

Most of the climbs look vertical, but once you get on the routes they reveal themselves as hard, overhanging climbs. The village is known as Mudeung-san 무등산, which means Watermelon Village. So enjoy the famous watermelon afterwards, and shake off all the sweat from your hard climbing.

SEOKMUN-SAN AMJANG 석문산 암장

Description

This crag is volcanic rock with mostly moderate face climbs. It faces south.

Directions

35.133887N 126.689025E

Samdo-dong, Gwangsan-gu, Gwangju 광주시 광산구 삼도동

From downtown Gwangju, take a bus heading to Daesansamgeori 대산삼거리. Get off at Samdo 삼도 and walk towards Saenalhakgyo 새날학교, which used to be Samdonam Elementary School 삼도남초등학교. Turn left towards Gwaneumjeong-sa 관음정사 and continue walking on the road until you reach a reservoir. At the end of the reservoir, there is a farm. Take the path to the right, in front of the farm, and walk up the road towards the mountain for ten minutes. The crag will be on your right.

Gear

10 draws and a 50m rope.

Safety

Some of the bolts and anchors appear unsafe. A helmet is recommended.

Description

Developed from 1995 to 1998, Yongseo Pokpo is sedimentary rock with seventy-four routes offering loads of features. It faces southeast and boasts a beautiful waterfall right in the middle of the crag. The crag is divided into five walls: Yong-bawi 용바위 (upper and lower part); Waterfall left 폭포좌벽; Waterfall right 폭포우벽; Akdong-byeok 악동벽; and Euidae-byeok 의대벽.

Directions

35.1506N 127.469569E

Geumbyeong-ri, Hwangcheon-myeon, Suncheon-si 순천시 황천면 금평리

From Gurye-gu Station 구례구, take a bus bound for Geumbyeong-ri 금평리 to Yongseo Village 용서마을. Buses run every hour or so. It will save time if you take a taxi. However, if there are several of you, it is a pleasant walk that passes through the countryside and villages, which have certain rustic charm. It takes twenty-five minutes on foot from the station. Walk out the station and turn right. Follow the road towards Yongseo Village. Once you arrive at the village, it is only another five minutes to reach the small restaurant called “Yongseo Pokpo Garden 용서폭포가든”. Follow the trail behind the restaurant. Ideally, the best way to get to the crag is grab a taxi at Gurye-gu Station and ask the driver to take you to Yongseo Pokpo 용서폭포.

Gear

12 draws and a 60m rope. If attempting the multi-pitch route, bring 17 draws, two 60m ropes, and two full sets of cams.

Additional Comment

On the ground, by the waterfall, there are good campsites available and a make-shift restroom. Be cautious of rockfall. While developing all the routes, the locals climbers cleaned the waterfall area, which used to be a mess. This place is now a great spot for climbers and vacationers.

Description

(Gaya-san Amjang) - There are around seventy routes scattered along the west side of the mountain, ranging from 5.6 to 5.12. The rock is granite and varies from face climbing to crack lines and overhanging routes. It faces southwest.

(Bueungi-bawi) - This granite crag is 18m high and 22m wide. There are only six routes.

Directions

(Gaya-san Amjang) - 34.959059N 127.697021E

(Bueungi-bawi) - 34.958963N 127.710207E

Ma-dong, Gwangyang-si, Jeollanam-do 전남 광양시 마동

(Gaya-san Amjang) - From Gwangyang City Hall 광양시, walk east along the main road for fifteen minutes towards the mountain until you reach Jungma High School 중마고교. On the street by the high school, cross the pedestrian bridge. The trailhead begins here. At the end of the pedestrian bridge, take the lefthand trail and continue up, following the signs that read “적벽” Jeok-byeok. After thirty minutes, you’ll reach a wooden staircase with a hand rail. 5m before the top of the stairs, look to the left for a trail. Follow it to reach the crag.

(Bueungi-bawi) - From the road, under the pedestrian bridge mentioned above, keep walking east until you reach a tunnel (there is a parking area and a golf course before the tunnel). Walk up to the trail above the tunnel, turn left and continue for ten minutes. You’ll be able to see the crag from the approach.

Gear

10 draws and a 50m rope.

Additional Comment

(Gaya-san Amjang) - Sometimes people call the crag Byeongpung-am 병풍암, however, there are seven to eight separate crags around Jeok-byeok 적벽 and only one of them is Byeongpung-am. Get everything you need from downtown beforehand.

(Bueungi-bawi) - Since the golf course was set up, it is harder to get to the crag. It has not been maintained well.

BAEALDO 배알도

Description

Baealdo is located on the opposite side of the beach. All the climbs here are steep and overhanging, requiring power and strength. It faces southeast.

Directions

34.9621N 127.752714E

Mangdeok-ri, Jinwol-ri, Gwangyang-si 광양시 진월면 망덕리

From Gwangyang City 광양, take a bus heading for Baealdo Beach 배알도 and get off at Mangdeok 망덕. At the end of the north bound bridge, walk down to the beach on your left for five minutes.

Gear

8 draws and a 50m rope.

Safety

Most of the anchors are bad and there are rusty bolts on the unkempt wall. The path to the crag is overgrown as well.

HORANG-SAN, HORANG-AM 호랑산 호랑암

Description

In 1991, the Yeosu Hangam Mountain Club started developing Horang-am at Horang-san. It opened to the public in 2004. The crag has fifteen routes with a couple of unfinished projects. It faces southeast on a mix of granite and basalt rock, and offers face and overhung climbing with a scenic view of Yeosu 여수 harbor, the site of Expo 2012.

Directions

34.791004N 127.696495E

Bonggye-dong, Yeosu-si 여수시 봉계동

From downtown Yeosu 여수, take a bus for Dundook Intersection 둔덕삼거리 or Yeodo Elementary School 여도초등학교. There are two trails to the crag. One option is to take the trail on the right side of the elementary school, passing a survival training area at the foot of the mountain, and hike up for twenty-five minutes until you reach a marker for “신동아아파트 0.8k” Shindonga Apt and “정상 0.7k” Jeongsang. Just 5m before the marker, look for a faint trail on your right. Follow the trail for five minutes. Another option is to walk through the elementary school grounds to the mountain side and turn left at the parking area, passing a small playground, to a path with an apartment complex on your left. Take the main trail, that has a map of the mountain and continue hiking up until the marker mentioned above.

Gear

13 draws and a 60m rope.

Additional Comment

There is one good campsite and a great bivouac site at the base of the crag. At the top of the crag is a great view of the sea and the city.

WOLCHUL-SAN 월출산

Description

These crags at Wolchul-san 월출산 have been at the forefront of the climbing community in this province and climbers still frequent this beautiful rocky mountain even though a lot of young climbers are flocking to the clip-and-go sport climbing areas.

(Siru-bong) - This crag features primarily slab climbs and crack climbing on granite rock with multi-pitch routes. It faces east.

(Mae-bong) - As the largest crag in Wolchul-san, the crag offers crack and slab climbing on good quality granite. This crag is divided into an upper and lower section. In the middle of the crag, there are some bushes. It faces southeast.

(Yeonsil-bong) - This crag consists of relatively easy routes for training beginners on slab.

Directions

(Siru-bong) - 34.767687N 126.715214E

(Mae-bong) - 34.767351N 126.712832E

(Yeonsil-bong) - 34.766329N 126.714914E

Gaesin-ri, Yeongam-eup, Yeongam-gun 영암군 영암군 개신리

(Siru-bong) - Take a bus that heads for Yeongam 영암 and then transfer to a bus for Wolchul-san 월출산. At the parking lot, walk up the main trail to the temple Cheonhwang-sa 천황사. Facing the temple, take the trail to the left and continue up for twenty minutes until you get close to the pedestrian pass. The crag can be seen as you hike up. It is next to the main trail on your right.

(Mae-bong) - Hike straight up the main trail towards the peak, to the huge rock standing tall near the top. It takes fifteen minutes to get here from Siru-bong 시루봉.

(Yeonsil-bong) - It sits on the left side of Siru-bong and in front of Mae-bong.

Gear

12 draws, a 60m rope, and a full set of cams.

Safety

The bolts and anchors have been replaced on many of the routes. A helmet is still recommended.

Additional Comments

Officially, climbing at this mountain requires a permit. Visit the ranger office to get a permit. There is another crag, called Hyeongje-bong 형제봉, located across from these crags. It can be reached by the trail that branches off to the right at the temple, but is being visited less and less.

YODAL-SAN, KOGGIRI-BAWI 유달산 코끼리바위

Description

This crag is granite rock with 25m high walls that stretch out over 60m. This crag offers moderate face climbs with finger pockets and faces southeast. It is located on the west side of Youdal-san 유달산.

Directions

34.794021N 126.369579E

Jukgyo-dong, Mokpo-si 목포시 죽교동

To access the crag, take a train to Mokpo 목포. From the station, take a bus to Daeban-dong 대반동 and get off at Mokpo Maritime University. Walk north for five minutes, with the sea to your left, until you reach a sharp switchback in the road. Look for a couple of buildings across the road. Hike up the trail that passes through the houses. It will take ten minutes to reach the crag. The crag is visible to the left from the trail.

Gear

7 draws and a 50m rope.

Additional Comments

A route map is available at the base of the crag. Water and food can be bought at the trailhead.

YOUDAL-SAN, IRON PALMS WALL 유달산 아이언팜스월

Description

This granite crag offers overhanging and vertical climbs of cracks and porous holds. It is divided into an upper and lower level with climbs from easy 5.8 to 5.14's. It faces southeast.

Directions

34.789272N 126.372425E

Jukgyo-dong, Mokpo-si 목포시 죽교동

From the main gate at Mokpo University, walk south on the main road for five minutes. The sea will be on your right. Hike up the trail that leads to Soyojeong 소요정 until you reach a stone staircase that heads to the peak. At the bottom of the staircase, take the lower trail that goes east and there will be a faint trail to your left that leads to the crag.

Gear

10 draws and a 60m rope.

Additional Comments

The crag dries quickly after it rains and is climbable in the winter. During summer, the path is overgrown and it may be difficult to reach the crag.

SIN-RI AMJANG 신리 암장

Description

This crag consists of vertical and crack climbing. It faces southeast.

Directions

35.768069N 127.21241E

Sin-ri, Sanggwan-myeon, Wanju-gun 완주군 상관면 신리

From Jeonju, go to Sinri Station 신리. Take the bridge over the railway and turn left immediately after the bridge. The crag is ten minutes from the station.

Gear

10 draws and a 50m rope.

Safety

Although the crag is located in the city, the ground may be overgrown. The bolts and anchors are not in very good shape.

SIRU-BAWI 시루바위

Description

This crag was developed in 2001. It is sedimentary rock that faces south and has a black stripe on the wall. The climbs start on a steep overhang face and morphs into face climbing after a couple of hard pulls. Most of the routes have lots of pocket holds, side pulls and underclings.

Directions

35.609581N 127.203698E

Hagam-ri, Unam-myeon, Imsil-gun 임실군 운암면 학암리

From Jeonju or Wanju, take a bus bound for Unam-myeon 운암면, and get off at Hagam-ri 학암리. From there, walk towards the bridge Singigyo 신기교. Don't cross the bridge. Walk down the side of the bridge to reach the river and then follow it south.

Gear

10 draws and a 50m rope.

Additional Comments

This crag is in the sun all day and is a nice place for family summer outings. Get water and snacks at the village.

Description

Deep in the valley of Seonun-san Provincial Park 선운산, climbers and outdoor enthusiasts alike visit this park frequently. It holds some of the country's best sport climbing. The climbing in Seonun-san is world-class and even the likes of Chris Sharma have tested the overhanging, pock-marked limestone. Developed in the early 90's, this area houses steep test pieces where local hard men battle their egos. With four crags and about two-hundred fifty routes, this place has created the standard of hard climbing in Korea. It is definitely worth a visit that will have you coming back for more. Since this area is within a provincial park, we ask you to be mindful and to respect the temple culture upon your visit.

(Soksal-bawi) - Soksal-bawi faces southwest and although the routes are within meters from each other, each one does have its own unique peculiarities. The steep limestone here will entice the warrior within you to observe, focus and commit.

(Tugu-bawi) - Within the wind tunnel, aptly named for its hair-swirling, skirt-lifting authority you'll find both sides curving inwards providing constant shade throughout the day. The right side of wall holds the arduous overhung climbs, but the left side is moderate.

(Mun-bawi) - While not exactly the same as other crags in this mountain, this crag offers a lot of variety on a vertical face.

(Dosol-am) - The routes are scattered around the temple and have been less and less visited by climbers because the monks here are strongly against the climbing in their area. However, there are still great routes to climb further away from the temple where an intricate carving of Buddha is etched on a rock outcropping.

Directions

(Soksal-bawi) - 35.485759N 126.571915E

(Tugu-bawi) - 35.48634N 126.571662E

(Mun-bawi) - 35.486161N 126.57119E

(Dosol-am) - 35.480994N 126.563079E

Samin-ri, Asan-myeon, Gochang-gun, Jeonbuk 전북 고창군 아산면 삼인리

(Soksal-bawi) - To access the crag, take the main trail from the parking lot until you reach the reservoir. Continue on the main trail to the west and up the steel staircase. Follow the path as it climbs up the hill and you will come to a small fork. You may choose either direction. Soksal-bawi, Tugu-bawi and Mun-bawi adjoin each other.

(Tugu-bawi) - Follow the directions for Soksal-bawi, until you reach the fork with a small sign. Veer to the right and then head left at the top of the hill towards the rock formations.

(Mun-bawi) - There is a trail at the north and south end of Tugu-bawi that wraps around the crag and leads to Mun-bawi.

(Dosol-am) - From Tugu-bawi, take the trail at the bottom of the crag to the west. At the trail intersection, turn left towards the temple. There are routes all around the temple and marked on the rock at the beginning of each route. The approach time will be thirty minutes.

Gear

(Soksal-bawi, Tugu-bawi, Mun-bawi) - 12 draws and a 60m rope.

(Dosol-am) - 15 draws and a 60m rope.

Additional Comments

Camping is not allowed inside of the park. There is a campsite with a restroom available outside of the park.

HALMAE-BAWI 할매바위

Description

This crag was developed between 1994 and 1998. Halmae-bawi is 22m high and has twenty-five routes. It is made of limestone rock with many pockets and jugs on the face and some overhanging rock.

Directions

35.478967N 126.618419E

Gyeosan-ri, Asan-myeon, Gochang-gun 고창군 아산면 계산리

From either Gochang 고창 or Seonun-san Bus Terminal 선운산, take a bus heading to Byeonam Intersection 병암교차로. Walk along the pond by the rice fields to the crag. It will take five minutes from the bus stop and the crag can be clearly seen from the road.

Gear

10 draws and a 60m rope.

Additional Comments

This crag was closed for a while because of issues between climbers and the land owner. Be mindful to respect the locals and leave no trace.

BUAN, JANGGUN-BAWI 부안 장군바위

Description

This crag was developed in 2000 and is armed with the most 5.14 routes in Korea. It is mostly steep, overhanging granite and faces southwest.

Directions

35.693169N 126.633954E

Seoksang-ri, Haseo-myeon, Buan-gun 부안 하서면 석상리

From Gimjae 김제, take a bus bound for Buan 부안 and then transfer to a bus heading to Seoksang-ri 석상리. Get off at Yongwamaeul 용와마을 and walk towards Yeongeun-sa 영은사 for ten minutes. Follow the trail along the temple grounds for another ten minutes. The crag will be on your right.

Gear

15 draws and a 60m rope. Most of the overhanging routes have permanent draws in place.

Additional Comments

Many of the routes here are still projects and require a lot of strength. There are good campsites available around the temple.

SAMCHEON-BAWI 삼천바위

Description

This crag lies at the foot of the mountain that is close to the road. It faces every direction. Samcheon-bawi has huge overhanging climbs on the north and south side. On the east side, the routes are relatively moderate with jugs and pockets.

Directions

35.978805N 127.284036E

Daea-ri, Dongsang-myeon, Wanju-gun 완주군 동상면 대아리

From Wanju 완주, take a bus to Daesumokwon 대아수목원. Get off at Daesamgeori 대아삼거리, next to the bridge Daeagyo 대아교. From there, walk back 500m to where the bus came from. Look for a small restaurant sign “만골” Mangol. With the lake to your left, there will be a trail to the right that leads to Samcheon-bawi.

Gear

10 draws and a 50m rope.

Additional Comments

There are no stores or restaurants so get everything in town before getting on the bus.

DAEDUN-SAN 대둔산

Description

Daedun-san 대둔산 is one of the most scenic provincial parks in Jeollabok-do. Within it exists many crags. This is a very rewarding place to climb. However, as of publication, hikers and climbers are prohibited to use the trail that leads directly to the crag. Wildlife preservation and precaution against falling rocks are the main reasons the trail is closed. This mountain has four major crags located around Yongmun Valley 용문골, featuring everything from sport climbing and aid-climbing, to multi-pitch trad climbing.

(*Sinseon-bawi*) - This crag is a moderate granite slab with many multi-pitch climbs. Most of the routes are well bolted and less run out than other crags, which makes this crag a good place for beginners. It faces southeast.

(*Dwaeji-bawi*) - Most of the climbs are single pitch and offer crimp climbing. It requires balance and finger strength.

(*Chag-bawi*) - This crag offers the most challenging routes in Yongmungol area. The climbs vary from overhanging to face climbing.

(*Wimungongyeon-bawi*) - This crag offers good face climbing.

Directions

(*Sinseon-bawi*) - 36.127234N 127.326543E

(*Dwaeji-bawi*) - 36.127476N 127.326264E

(*Chag-bawi*) - 36.127182N 127.326200E

(*Wimungongyeon-bawi*) - 36.122927, 127.324265

Sanbok-ri, Unju-myeon, Wanju-gun 완주군 운주면 산복리

(*Sinseon-bawi*) - From Daejeon 대전 or Jeonju Intercity Bus Terminal 전주, take a bus bound for Daedun-san 대둔산. Get off at Daedunsan. From there, the crag is reached by either taking the main trail or walking 500m up the road where an off limits sign is located on the side of the road. To access the crag by way of the main trail, walk towards the cable car station for thirty minutes until you reach a fork, before the area where the cable car stops. Take the right hand trail heading to Yongmungol 용문골, that says “off limits”. Continue for fifteen minutes to Sinseon-am 신선암, which is a small mountain temple built halfway into a cave. To access the crag by way of the secondary trail, walk past the off-limits sign and hike the trail for forty minutes until you reach Sinseon-bawi. From Sinseon-bawi, the steep trail to the crag is located to the right.

(*Dwaeji-bawi*) - This crag sits slightly to the left of Sinseon-bawi.

(*Chag-bawi*) - This crag is to the right of Sinseon-bawi. It has a dihedral crack that looks like an open book.

(*Wimungongyeon-bawi*) - Facing the temple, take the main trail to the right for ten minutes. It will be on your right, next to the trail.

Gear

(*Sinseon-bawi*) - 10 draws, a 60m rope, and a full set of cams.

(*Dwaeji-bawi*) - 15 draws and a 60m rope.

(*Chag-bawi*) - 11 draws and a 50m rope.

(*Wimungongyeon-bawi*) - 10 draws and a 50m rope.

Additional Comments

There are many warning signs all over the mountain that say “Rock climbing is not allowed”. The fine is 500,000 KRW. If you choose to climb here, please respect the flora and fauna along the Yongmungol 용문골 trail (the secondary trail). Climbers in Korea look forward to the day that the authorities re-open the trail and create a permit system like those in other National Parks throughout the country.

PALGONG-SAN 팔공산

Description

(*Byeongpung-bawi*) - This crag is located close to the top of Palgong Mt. and faces the south. The peak is called Dong-bong 동봉. Byeongpung-bawi 병풍바위 has eleven granite routes, from 20m to 166m long. It was developed between 1969 and 1987. The climbs mostly consist of face and slab climbing.

(*Bawitgol-amjang*) - Bawitgol-amjang is westbound from Donghwa-sa 동화사 and is separated into three smaller walls. The south wall has eleven routes ranging from 12m to 31m long. Among them is an old aid route. The three 5.7 routes on the crag are perfect for beginners to practice leading for the first time. The slab wall is about 80m long and is also great for beginners. The north face has five routes approximately 30m long. They are mainly crack climbs.

Directions

(*Byeongpung-bawi*) - 36.009655N 128.707345E

(*Bawitgol-amjang*) - 35.997139N 128.683119E

Dohak-dong, Dong-gu, Daegu 대구 동구 도학동

(*Byeongpung-bawi*) - From Daegu 대구, take a bus bound for Palgong-san Donghwa-sa 팔공산동화사 and get off at the entrance of Donghwa-sa 동화사입구. Walk east on the road towards Donghwa-sa Temple until you reach the trailhead by the parking area. Hike, for ten minutes, to Budo-am Temple 부도암 and then take the trail to the right to Yangjin-am 양진암, for ten minutes. Take the trail that veers to the right and up to the ridge. The crag is on your left before the ridge. You'll be able to see the crag when you hike up from the last temple.

(*Bawitgol-amjang*) - From Daegu 대구, take a bus bound for Palgong-san Donghwa-sa 팔공산동화사. Get off at the entrance of Donghwa-sa 동화사입구 and then transfer to the bus bound for Sutaegol 수태굴. If you walk from Donghwa-sa Bus Stop 동화사, it will take thirty minutes to get to Sutaegul. Bawitgol-amjang is thirty minutes from the Sutaegol Rest Area 수태굴 휴게소.

Gear

(*Byeongpung-bawi*) - 10 draws, a 60m rope, and a full set of cams.

(*Bawitgol-amjang*) - 12 draws, a 60m rope, and a set of mid-sized cams.

Safety

(*Byeongpung-bawi*) - There are still old pitons and rusty bolts on some of the routes. Some of the routes are also run out. A helmet and extra webbing is recommended.

(*Bawitgol-amjang*) - On the north wall, rope drag can be a problem so bring a few slings. The drag may also cause rope management to be difficult and it may be hard to communicate with your belayer as well. To descend, rappel from the tree on the face.

Additional Comments

Detailed route beta is currently not available.

(*Byeongpung-bawi*) - You can rappel down from each pitch at the anchor or you can walk down from the top. There are campsites available near the bus stop. Make sure to get water at the temple.

■ Byeongpung-bawi

■ Bawitgol-amjang

Donghwa-sa Temple

Budo-am Temple

DOYAK-DAE 도약대

Description

Doyak-dae 도약대 has five different walls and includes fifty-one routes between 8m and 20m high. It has face, crack, slab and overhung climbing. The wall faces northeast.

Directions

35.970418N 128.629341E

Jimyo-dong, Dong-gu, Daegu-si 대구시 동구 지묘동

The crag may be approached either from Jungri-dong 중리 or by taking buses bound for Yeonggyeong-dong 연경동. Buses for Jungri-dong, from downtown Daegu 대구, run much more frequently than buses for Yeonggyeong-dong 연경동. From Jungri-dong, walk along the stream for twenty minutes to Daewon-sa Bus Stop 대원사. If you take a bus bound for Yeonggyeong-dong 연경동 in downtown Daegu 대구, get off at the Daewon-sa Bus Stop 대원사 and cross the stream towards the crag. The crag is right by the stream.

Gear

9 draws and a 50m rope.

Additional Comments

Given the easy access to the crag, it is one of the most popular sport climbing areas in Daegu 대구. On top of this, this place has lights that can be lit at night. At the entrance of the crag, there is a switch box where you can turn on the lights. However, they automatically turn off at midnight.

DO-DONG, YONG-BAWI 도동 용바위

Description

Yong-bawi is located by the stream at Pyeonggwang-dong 평광동 in Daegu 대구. It was developed in 2002 and offers loads of features on vertical, crack, and overhung routes. It faces north and is good for summer climbing.

Directions

35.931734N 128.682024E

Phyeonggwang-dong, Dong-gu, Daegu 대구, 동구, 평광동

From downtown Daegu 대구, take a bus heading to Pyeonggwang-dong 평광동. Get off at the entrance of Pyeonggwang-dong 평광동입구. From there, head back to where the bus came from for 100m. Keep the stream to your left. Cross the stream at the small dike and scramble up for five minutes. The crag can be easily seen on your left from the road.

Gear

12 draws and a 60m rope.

Safety

The rock is a bit loose. A helmet is recommended.

Additional Comments

The area here is overgrown and the wall is unkempt with a lot of vines running up the face. Bug repellent is recommended during the summer. A metal board is screwed onto the rock in the middle of the wall with the route beta. It's a good place for climbing in the summer, but it seems that the crag hasn't been maintained well.

GYEONG-SAN, UKSUGOL-AMJANG 경산 옥수골암장

Description

This crag was opened to the public in 2006. Uksugol-amjang is relatively small and short, but it offers a few challenging climbs on good overhangs. It faces southeast.

Directions

35.814994N 128.705156E

Uksu-dong, Suseong-gu, Daegu-si 대구 수성구 옥수동

From Daegu 대구, take a bus to Siji 시지. Get off at Deokwon Highschool 덕원 고등학교 or take the subway to Sinmae Station 신매 (Line #2, Exit 4). Walk towards Deokwon High School. It will take twenty-five minutes from the subway and five minutes from the bus stop. At the intersection, turn right and walk past Arima Castle (sauna and jjimjilbang), by Deokwon Middle School, and continue walking down the road that leads to the mountain. The crag will be on your right by the road, past the pond.

Gear

8 draws and a 50m rope.

Additional Comments

The belay stations are a bit uncomfortable. Recently, the bolts and anchors were fixed by KOTRI.

BISEUL-SAN, SURIDEUM-BAWI 비슬산 수리듬바위

Description

Surideum-bawi has four routes of 5.10 difficulty. It is granite rock with face and crack climbing that ranges from 50m to 70m high. It faces southeast.

Directions

35.729792N 128.541884E

Jeongdae-ri, Gachang-myeon, Dalseong-gun, Daegu 대구 달성군 가창면 정대리

From Daegu, take a bus heading to Jeongdae-ri 정대리 and get off at the last stop. Walk along the road leading towards the hill until you reach a security gate. Walk through the iron gate (you need a permit from the guard for climbing) and follow the trail along the stream for ten minutes until you see the crag on your right. Look for the trail that leads to the crag and scramble up for fifteen minutes.

Gear

12 draws and a 60m rope, and a full set of cams.

Safety

The rock is loose. Some of the bolts and anchors are rusty and suspicious. A helmet is recommended.

Additional Comments

The crag doesn't seem to have been climbed for years and most of the protection is bad. The trail in the valley is closed for preservation.

MUNBOK-SAN, DUERIN-BAWI 문복산 드린 바위

Description

Duerin-bawi 드린바위 is 130m high and 100m wide. It was first developed in 1975. In May 1998, it was redeveloped with the addition of five routes, including a couple of aid routes. This crag looks a bit creepy. It is dark granite and the climbs vary from face, slab, crack, and overhanging routes. This is a good place to train for big-wall expeditions.

Directions

35.675252N 129.037364E

Gyeongju Sannae-myeon Jung-ri 경주 산내면 중리

It is hard to get to the base of this mountain by public transportation. From EunYang Bus Terminal 언양, take a bus heading for Jung-ri 중리마을. Buses run every ninety minutes. At Jung-ri 중리, follow the street that runs through the small alleyway across the street from the OK Youth Training House. The trail starts at the end of the alley. The crag can be clearly seen from the trailhead. Instead of taking the more obvious gorge-side trail, take the trail to the right, that heads towards the ridgeline. Continue on until you reach a fork. Follow the trail to the left and you'll reach the crag in five minutes.

Gear

10 draws, a 60m rope, and a full set of cams. Aid climbing equipment is also needed for the multi-pitches.

Safety

The rock is loose and some of the bolts are suspicious. A helmet and extra webbing is highly recommended.

Additional Comments

There are good campsites available.

GUEMSEONG-SAN, MUJIGAE-BAWI 금성산 무지개바위

Description

Mujigae-bawi, located on Guemseong Mt. 금성산 무지개바위, has sixteen routes. The rock looks exactly like a triumphant arch. The routes vary from crack, face, and arête climbing.

Directions

36.263809N 128.71258E

Sujeong-ri, Geumseong-myeon, Euseong-gun, Kyeongsangbuk-do
경북 의성군 금성면 수정리

From Top-ri Station 탑리, take a bus heading to Gaeum 가음 and get off at Sujeon-sa 수정사. Walk along the road that leads to the temple for twenty minutes. At the parking area, before the reservoir, cross the small bridge that leads to the sanctuary. Walk along the fence next to the house and continue up for twenty-five minutes until you see the crag on your left. When you see the crag, look for a trail on your left. You may find a few trails, but only take the trail that you can see the crag from. Hike up for fifteen minutes to reach the crag.

Gear

10 draws and 50m rope.

Additional Comments

Around the crag, there are 160 degree overhanging boulders and a few routes which barely get wet, even in the rain. The base of the crag is overgrown by various wild plants.

YOUHAK-SAN 유학산

Description

(Hak-bawi) - This crag is a mixture of gneiss and moraine rock with forty-eight routes. It is 50m high and 60m wide. It was developed from 1996 to 1997. The dihedral wall is divided into four parts. The far left wall, that is separated a little from the main wall, has seven routes. On the main wall, the left side has seventeen routes. The middle wall has ten routes, plus two aid climbs. The right wall has twelve routes. The crag faces southwest.

(Dungji-bawi) - Developed in 1998, this crag has twenty-four routes between 22m and 52m high. There are a couple of multi-pitches that would be good for beginners and intermediates to train on. Refer to the gear and safety concerns in this book with care.

Directions

(Hak-bawi) - 36.065856N 128.486202E

(Dungji-bawi) - 36.065808N 128.486288E

Seonggok-ri, Seokjeok-eup, Chilgok-gun 칠곡군 석적읍 성곡리

(Hak-bawi) - At Waegwan Bukbu Bus Terminal 왜관북부, take the bus bound for Dogyeo/Chumbyeong 도계/청평 and get off at Haksansamgeo-ri 학산삼거리. Follow the road that leads to Dobong-sa 도봉사 for twenty minutes. Continue past the Potjae Parking Area 팔재 주차장 and hike towards Dobong-sa 도봉사 for another ten minutes. At the temple take the trail to your right. Hike up until you reach a fork. Take the Youhakjeong 유학정 trail on your left. There will be a small trail to your right 5m after the fork. Continue on the path for five minutes to reach the crag.

(Dungji-bawi) - Continue on the trail past Hak-bawi to reach Dungji-bawi.

Gear

12 draws, a 60m rope, and a full set of cams.

Additional Comments

There are good campsites around the crags and a restroom is available before Dungji-bawi 등지바위. Water can be found at the temple.

JUKJANG, HAKDAM-AM 죽장 학담암

Description

Hakdam-am 학담암 is divided into three walls. It is a metamorphosis granite crag that is 100m wide and 45m high. It has forty-five routes. The middle part of the wall has loads of 5.10 face climbs and the left side of the wall is mostly overhanging 5.11's and 5.12's. It faces northeast.

Directions

36.164367N 129.109011E

Maehyeon-ri, Jukjang-myeon, Bukgu, Pohang-si 포항시 북구 죽장면 매현리

From Pohang Intercity Bus Terminal, take a bus for Gigyeo-myeon 기계면, Jukjang 죽장, Sangok 상옥. It takes about an hour and the buses usually run every hour. From the bus stop, walk east along the main road for fifteen minutes. As you walk along the stream, you'll be able to see Hakdam-am to your right. You will have to ford the stream to reach the crag. The water can get waist deep during the rainy season.

Gear

10 draws and 60m rope.

Safety

All of the anchors are cables with rings.

Additional Comments

There are many campsites available by the stream and a restroom on the road. Food and water can be bought at the stores in the village close to the bus stop.

Description

(Gwaneum-am) - This area has many crags of gneiss rock. The biggest crag, and the main crag for Pohang climbers, is Gwaneum-am 관음암. It is the closest crag to Yeonsan Waterfall 연산폭포. This crag offers crack, chimney, and vertical face climbing with a couple of aid climbing routes.

(Yeonsan-am) - Yeonsan-am 내연암 is located over the suspension bridge. It offers good face climbing. The rest of the crags are spaced out gradually along the stream to the temple.

(Sinseondae) - This crag has two 5.9 routes and is 80m high. It is not climbed very often because of the bad access and the poor quality of rock. However, the multi-pitches offer a great view.

(Guimyeon-am) - The routes here are moderate and range from vertical, crack, and overhung climbing.

(Arirang Boulder) - This crag is relatively short and small. It offers steep, overhung routes.

(Seoun-am) - Seoun-am 서운암 was developed with easy routes for beginners.

Directions

(Gwaneum-am) - 36.260262N 129.301486E

(Yeonsan-am) - 36.260418N 129.301314E

(Sinseondae) - 36.260487N 129.301357E

(Guimyeon-am) - 36.258177N 129.306335E

(Arirang Boulder) - 36.255192N 129.308052E

(Seoun-am) - 36.252839N 129.315616E

Jungsan-ri, Songra-myeon, Buk-gu, Pohang-si 포항시 북구 송라면 중산리

(Gwaneum-am) - Buses run from Pohang 포항 to Bogyong-sa 보경사 every hour. It takes forty minutes to reach Bogyong-sa 보경사. From the parking lot, follow the main trail to Yeonsan Waterfall 연산폭포. You will pass a couple of waterfalls before reaching Yeonsan Waterfall 연산폭포. You can't miss the crag though because it is next to the waterfall by the suspension bridges. The approach time will be forty minutes from the parking lot.

(Yeonsan-am) - This crag is located over the bridge by Gwaneum-am 관음암. It will be to your right.

(Sinseondae) - This crag is five minutes down the trail from Gwaneum-am 관음암. It will be to your left.

(Guimyeon-am) - Guimyeon-am 귀면암 sits below Samyong Waterfall 삼영폭. It will be on your right on the main trail towards the temple.

(Arirang Boulder) - This crag is located below Ssangsang Waterfall 쌍생폭. Facing the temple, it will be on your right.

(Seoun-am) - This crag is located in the woods, across from a snack bar. It's only five minutes past the first temple.

Gear

13 draws and a 60m rope. For the multi-pitch, bring 12 draws and two 50m ropes.

Safety

Aside from the main crag, Gwaneum-am 관음암, a few of the bolts and anchors on the rest of the crags are rusty. Also, some of the rock is a little rotten so be cautious. A helmet is recommended.

Additional Comments

The setting around the main crag is spectacular and so is the hiking trail to the crag. There are min-baks 민박 and camping sites on the left side of the entrance.

AMI-SAN, SEOKSAN-AM 아미산 석산암

Description

Seoksan-am is located on a mountain called Ami-san 아미산. It has great views and trails for hikers. This crag was opened to the public in 2007 with nine routes. It is made of rhyolite rock, which is the volcanic equivalent of granite. Most of the routes are slab and face climbing. Seoksan-am faces south.

Directions

36.16855N 128.844824E

Seoksan-ri, Goro-myeon, Gunwi-gun 군위군 고로면 석산리

From Daegu 대구, take a bus to Gunwi 군위 and transfer to a local bus heading to Seoksan-ri 석산리. Get off at Gaamsamgeo-ri 가암삼거리. The mountain can be seen from across the road. There are three protruding rocks on the mountain. The crag is located on the south-side of the biggest rock. At the trailhead there is a hiking map. Follow the trail in the valley for ten minutes. Then, take the trail that branches off to the right and continue up another five minutes to reach the crag.

Gear

12 draws and a 60m rope.

Safety

The rocks are loose and sharp so a helmet is recommended. The first two routes are a bit longer than the others to top-rope and the belay for the second climber should be done at the anchors on the top of the routes. The belay station on the east side of the wall is unstable.

Additional Comments

Ami-san offers good ridge climbing and there are campsites available around the crag. The routes here don't have names, but they have been numbered.

Description

Sangsa-bawi is located on the south foot of Hakga-san, between Andong-gun, Bukhu-myeon 안동군북후면 and Yecheon-gun, Bomoon-myeon 예천군보문면. It is granite rock. Most of the routes are slab and face climbing. There are some nice multi-pitch lines that can be climbed traditionally. However, most of the routes are single-pitch sport climbing.

Dong-il Ryou, the author, climbing Wing 날개/5.11a.

Directions

36.662119N 128.603125E
Sanseong-ri, Bomun-myeon, Yecheon-gun 예천군 보문면 산성리

From Yecheon Intercity Bus Terminal 예천, take a bus bound for Sanseong-ri 산성리. Get off at the last stop and walk to Neureuch Village 느르치 which will take twenty minutes. At the village, hike up the trail on the northside, in the middle of the remote village. The trailhead is hard to find. However, continue making your way through the woods and hike up straight towards the crag, which is visible from the village. The trails behind the village end up converging into a single trail half way up. It will take approximately thirty minutes to reach the crag from the village.

Gear

10 draws, two 50m ropes, and a set of mid-sized cams.

Safety

The top anchor used for rappelling is weathered and sun-bleached so bring extra webbing.

GYEORYONG-SAN 계룡산

Description

(Seonbul-am) - As the premier crag of Chungcheongnam-do 충청남도, Seonbul-am boasts of great slab, crack, and high-angle face climbing on excellent, highly featured granite rock. It is located at Gyeoryong-san National Park. Most of the routes are multi-pitch climbs that face southwest.

(Bagaji-bawi) - Bagaji-bawi is a granite wall with slab, overhanging, and face climbing.

(Hwangjeok-bong OB) - Development began in 1974 with two routes. Since then, six more routes have been added. This crag is 40m high and 40m wide. It is a granite wall of good quality slab climbing with routes that are relatively easy. Also, a superb panorama of the mountains awaits from the belay perch.

Directions

(Seonbul-am) - 36.354917N 127.207539E

(Bagaji-bawi) - 36.349179N 127.243094E

(Seonbul-am) - From Daejeon 대전, take a bus to Donghak-sa 동학사. At the final bus stop, Donghak-sa 동학사, walk past the ticket counter and continue hiking up the main trail for twenty minutes until you reach the Rescue Mark 5-5. Walk past the Rescue Mark 5-5 for 70m and then take the trail to your right. A tiny valley will be on your left as you follow the trail. Continue up for fifteen minutes.

(Bagaji-bawi) - From the parking lot at Gyeorong-san National Park (following the same direction as Seonbul-am to get to the park), walk towards the campsite. Continue to the back of the campgrounds and walk past the blue water tank. Continue past the fence by the tank. Hike straight up the main trail and follow the sign that leads you to the crag. The hike will take thirty minutes.

(Hwangjeok-bong OB) - This crag can be approached by either taking the trail to Bagaji-bawi or by taking the trail around the solitary house that is by the campsite. When taking the Bagaji-bawi trail, take the right trail at the fork by the first trail guide sign. Continue on the trail for ten minutes and cross over the dry streambed. Don't stay on the prominent ridge before the streambed. Make your way up the main trail with the valley on your left for twenty minutes until you reach the crag. When taking the trail by the solitary house, go to the right side of the house and follow the "no trail" sign at the start of the streambed. Follow the trail for thirty minutes to reach the crag.

Gear

(Seonbul-am) - 10 draws and a 60m rope. There is an opportunity for aid-climbing equipment as well.

(Bagaji-bawi) - 12 draws and a 60m rope.

(Hwangjeok-bong OB) - 10 draws, a 60m rope, and a set of small to mid-sized cams.

Additional Comments

To climb here, you need a permit from the ranger office. The process is simple. Step into the ranger office and show your identity card.

BYEONGCHEON-AM 은석산병천암

Description

Although this used to be a gravel quarry, it was developed into a climbing crag. There are currently ten routes with many more still being developed. Byeongcheon-am offers overhanging and face climbing. The routes face southeast and range from 8m to 14m high.

Directions

36.771519N 127.290328E
Gajeon-ri, Byeongcheon-ri, Dongnam-gu, Cheonan-si
천안시 동남구 병천면 가전리

From Cheonan Highway Bus Terminal 천안, take Bus 500 or 42. Get off at Tongilgonggeupsa 통일공업사, which is one stop before the Korea Technical Education University 한국기술교육대학. The crag can be seen from the gas station by the bus stop. Walk towards the gas station. At the gas station, cross the street and walk up the road by the factory for ten minutes to reach the crag.

Gear

8 draws and a 50m rope.

HAGAMPO-AMJANG 학ampo암장

Description

This crag, featured on the cover page of Chungcheongnam province, lies on the northwest coast of Korea. Although the crag is short and small, it offers exciting challenges and adventures on the overhanging granite wall with one of the most beautiful seaside settings.

Directions

36.903217N 126.20259E

Banggal-ri, Wonbuk-myeon, Taeon-gun

태안군 원북면 방갈리

From Cheonan 천안, take a bus bound for Taeon 태안. From there, transfer to Hagampo Beach 학ampo. It takes approximately three hours from Cheonan. At Hagampo Beach Bus Stop, walk towards the west end of the beach and continue to the seawall. At the seawall, hike up the trail on the hill to your left. Continue until you reach the top and then walk down the left trail towards the water. Once you reach the water, turn right and make your way along the coast. The approach time will be thirty minutes from the bus stop. When the tide is low, it can be reached by walking along the coast from the seawall.

Gear

11 draws and a 50m rope.

Additional Comments

There are many minbaks 민박 and amenities around the beach. There are also campsites available at the beach south of Hagampo Beach.

CHEONGSEOKGUL-AMJANG 청석굴 암장

Description

This is the first limestone crag ever developed in Korea. It was developed in 1992. It has wild features on overhanging pockets that will please you very much as you pull through the crux of the routes. The crag has one 40m long multi-pitch on the far right side.

Directions

36.612875N 127.68685E

Unam-ri, Miwon-myeon, Cheongwon-gun, Chungcheongbuk-do
충북 청원군 미원면 운암리

Take a bus from Cheongju 청주 to Miwon 미원. From there, transfer to a bus bound for Boeun 보은 and get off at Cheongseok Maeul 청석마을. Follow the sign that reads “옥화일경” Okhwailgyeong for five minutes. The walk to the crag from the Miwon Bus Stop will take thirty minutes.

Gear

10 draws and a 60m rope.

Safety

The anchor on the multi-pitch is old. A helmet is recommended.

Additional Comments

There is a famous cave next to the crag where a lot of tourists go to picnic by the gazebo.

BAKSUK-AMJANG 백석암장

Description

Developed from 1993 to 2001, this crag consists of three walls. Most of the routes are slab and face climbs. It seems that this crag hasn't been climbed for a long time and all the walls deserve a good overhaul.

Directions

36.560394N 127.782691E

Baekseok-ri, Sanwoi-myeon Boeun-gun 보은군 산외면 백석리

From Cheongseokgul-amjang 청석굴암장, take the bus bound for Sanoe-myeon Baekseok 산외면 백석 and get off at Baekseok 1 Bridge 백석 1 교. Walk five minutes along the river towards the crag.

Gear

12 draws and a 60m rope.

Additional Comments

This crag is located right by the river. It would be a great place during the summer if the surroundings were cleaned up.

HWAYANG GUGOK - AMJANG 화양구곡암장

Description

(**Ul-bawi**) - This crag was developed in 1991. Ul-bawi has two walls. The left side of the dihedral crag consists of somewhat easy face climbs and gradually becomes overhung on the right side with some roof and crack climbing. The crag faces south.

(**Sol-bawi**) - This crag is a great place to practice placing nuts and cams. It offers gem cracks on granite rock. Sol-bawi faces south.

(**Haksodae**) - Haksodae was developed in the late 1980s. It has four small and short routes that offer face and crack climbs.

Directions

(**Ul-bawi**) - 36.664744N 127.837815E

(**Sol-bawi**) - 36.666758N 127.847155E

(**Haksodae**) - 36.662816N 127.825391E

Songmyeon-ri, Cheongcheon-myeon, Goesan-gun 괴산군 청천면 송면리

(**Ul-bawi**) - From Cheongju Intercity Bus Terminal 청주, take a bus heading to Hwayang-dong Hwabuk 화양동 화북. Get off at Hwayang-dong Jayeonhakseupwon 화양동자연학습원. From the bus stop, the crag is 5m to your left by the road.

(**Sol-bawi**) - From the ticket counter, in front of the parking area, walk down the road with the stream on your left for five minutes. The crag will be on your right in the woods.

(**Haksodae**) - The crag is located at the main entrance of Hwayanggugok 화양구곡, and can be reached either by walking along the stream for fifteen minutes from the entrance. Haksodae is across the stream by a steel bridge and can easily be found by the map at the entrance.

Gear

(**Ul-bawi**) - 8 draws and a 50m rope.

(**Sol-bawi**) - 10 draws and a 50m rope, and a set of small to mid-sized cams.

(**Haksodae**) - 5 draws and a 50m rope.

Safety

Some of the anchors are worn out so extra webbing is recommended.

Additional Comments

There are official campsites and facilities available along the clean and beautiful valley. Heaps of boulders are dotted within the valley.

(**Sol-bawi**) - Many bolts have been removed at the beginning of the routes, but there are many micro-lead-nuts placed in the crack which will act as protection.

JAKSEONG-SAN 배바위작성산

Description

(Bae-bawi) - Bae-bawi was developed in the early 1980s. It is mainly vertical climbing on granite rock. The longest climb is 162m long.

(Sol-bawi) - This crag is located near the trailhead of Bae-bawi Valley and has short sport climbing routes. It faces southeast and is in the shade all day.

Directions

(Bae-bawi) - 37.031816N 128.200343E

(Sol-bawi) - 37.029495N 128.198937E

Seongnae-ri, Geumseong-myeon, Jecheon-si 제천시 금성면 성내리

(Bae-bawi) - From Jecheon Intercity Bus Terminal 제천, get on a bus bound for Seongnae-ri 성내리 and get off at Seongnae-ri 성내리. Walk through the village for ten minutes and past Muam Reservoir 무암. Around this area is the only official campsite for Jakseong-san. Follow the trail for ten minutes and you will encounter an old film set. Continue past the set and stay on the main trail until you see a big sign on your left that has the crag information. At the sign, cross the stream and hike up for fifteen minutes to reach the crag. It faces southeast.

(Sol-bawi) - To access this crag, use the same directions of Bae-bawi, until the crag information sign. At the sign, take the left path that follows the valley for five minutes.

Gear

(Bae-bawi) - 10 draws, two 60m ropes, and a full set of cams.

(Sol-bawi) - 10 draws and a 50m rope.

Safety

(Bae-bawi) - Most of the anchors are solid, but a helmet is still recommended.

Additional Comments

(Bae-bawi) - There is an awesome view of Cheongpung Lake 청풍호 and Worak-san 월악산 from the crag. Within the mountains of Mu-am Valley, there are lots of boulders with potential and scattered, short sport climbing routes.

JANGWHOE-AMJANG 장회나루 암장

Description

This crag has fourteen routes and faces southeast. It is located near Jangwhoinaru Wharf 장회나루 선착장 at Lake Chungju 충주호. Most of the routes are face and crack climbing, with aid climbing on a few of the multi-pitches. There are routes next to the bridge called “설마교” Seolma, but most of them look mossy and are covered with ivy. Some of the bolts and anchors look suspicious. The main crag, further down the road, is in good shape. This crag is a hidden gem with lots of climbs on cracks and overhangs with potential for many more.

Directions

36.928076N 128.251433E

Janghoe-ri, Danseong-myeon, Danyang-gun 단양군 단성면 장회리

From Chungju 충주 or Suanbo 수안보, take the bus bound for Jangwhoinaru Wharf 장회나루 선착장. Get off at the wharf and walk for five minutes towards the bridge called “설마교” Seolma, which will be to your left with the lake on your right. Don’t cross the big bridge called “장회교” Jangwhoigyo. From the bridge, the main crag is 300m south. To access the crag, walk down the road for ten minutes with your back to the bridge and the stream to your left. Look for the trail on the right. This crag is visible from the road. It takes less than ten minutes from the bridge.

Gear

12 draws, a 60m rope, and a full set of cams.

Safety

A few of the routes on the main crag are mossy and covered with ivy.

Additional Comments

There are many restaurants and shops at the wharf so you can get anything you need from there. There are tons of boulders around the crags and awesome surroundings.

DUTA-SAN, BYEONGPUNG-AM 두타산 병풍암

Description

This crag sits in the stunning Mureung Valley 무릉계곡, which means “A Valley Of Paradise”. The climbs here offer fun jamming on different sized cracks. A few of the routes are well bolted, but many of the routes can be easily protected by cams. When you get to the top belay anchors, you can tell why this valley is called Paradise. The wall faces southeast on basalt rock with vertical cracks and overhangs.

Directions

37.458372N 129.000456E

Samhwa-dong, Donghae-si 동해시 삼화동

From Donghae Bus Terminal 동해, which can be accessed from all the major cities, take a bus bound for Mureung 무릉. Get off at the end of the bus line and walk towards the end of the road to the ticket counter. Begin hiking on the main trail of Mureung Valley 무릉계곡. As you hike up, check for the sign that says “쌍폭” Ssangpok. It will take fifty minutes to reach Ssangpok 쌍폭. Past the iron bridge and close to Ssangpok, the crag can be viewed above the trees to your right. Look for the tiny path that ascends steeply to reach the crag. Scramble up the trail for five minutes.

Gear

12 draws, a 60m rope, and a full set of cams.

Safety

A helmet and extra webbing is recommended.

Additional Comments

Each route has its own number at the start that shows the grade. The crag is divided by a cave that sits in the middle of the wall. The cave can be bivouacked. There are also many campsites around the crag. Water can be found by Yongchu Falls 용추폭포. There are many minbaks 민박 and great campsites at the entrance of the mountain.

Description

(Janggun-bong) - Seorak-san National Park is Korea's most famous park and is often considered the most beautiful. It is nestled within the northeast coast of the peninsula. In the park there is a twenty minute hike on primarily flat, paved ground that leads to Biseondae Shelter 비전대, that is frequented by climbers. There is a restaurant attached to the shelter. From the shelter, as you walk towards the crag, you'll come across Geumgang Cave 금강굴, which means "Solidity that can blow human anguish away" and "So solid that it never be broken". This granite crag is divided into two walls: Front Wall and Southwest Wall.

(Jeok-byeok) - Its red rock wall may hold some of the most adventurous rock climbing in South Korea. Each route features steep cracks and overhangs from start to finish. Even though this crag is a bit shorter than its neighbor, Janggun-bong, the high view from these routes may give you some shakes. Most of the routes require advanced skill in aid-climbing. Climbs start after an easy 5.7 single pitch. It faces west.

(Youseon-dae) - This crag boasts of interesting slab, crack, and chimney climbing. The climbing is primarily trad on granite rock that faces southwest. Beware of several badly placed bolts. New routes have recently been added to this crag. Climbers visit to climb the famous ridge route Geuriumdul 그리움돌.

(Ulsan-bawi) - Dubbed as the biggest crag in South Korea, Ulsan-bawi 울산바위 teems with mostly trad routes. This crag has been climbed since the 1960s and roughly thirty routes have been established since then. Abseiling can be done by walking down the main trail, with stone steps, from the observation platform. Because of the popularity of Janggun-bong 장군봉 and Jeok-byeok 적벽, this crag gets fewer climbers all year around. Some of the anchors and bolts are old and sketchy so be aware of the hazards.

(Sotowanggol-amjang) - Many climbers travel to this crag because of its relatively shorter approach compared to the other crags on the east side of Seorak Mountain. The climbs vary from cracks, slabs, and steep vertical face climbing with various holds and flakes. The bolts and anchors are pretty good. It faces southwest and there is a beautiful stream that runs past it.

Directions

(Janggun-bong) - 38.164331N 128.46424E
(Jeok-byeok) - 38.164517N 128.465495E
(Youseon-dae) - 38.164821N 128.461525E
(Ulsan-bawi) - 38.193048N 128.473799E
(Sotowanggol-amjang) - 38.164677N 128.495171E
 Seorak-dong, Sokcho-si 속초시 설악동

(Janggun-bong) - From any major city, take a bus bound for Sokcho 속초. Get off at the entrance of Seorak-dong 설악동입구. From there, transfer to a local bus heading to Seorak-dong, which is a different bus stop then the stop at the entrance of Seorak-dong. Get off at the end of the line. Hike on the main trail until you reach the bridge right before Biseondae Shelter 비전대. To access the Front Wall, don't cross the bridge to the shelter. At the bridge, take the trail on your right that is by a warning sign and hike up until you reach a fork. Follow the trail that branches off to the left. Continue on the path for ten minutes to get to Front Wall. The approach time will be fifty minutes from the bus stop. To access the Southwest Wall, use the same directions as Front Wall

until you reach the shelter. Cross the bridge to get to the shelter, continue past it and cross the suspension bridge to hike up to Geumgang Cave 금강굴. Look for a trail on your left just before the cave. Take it and scramble up for five minutes to get to the start of Southwest Wall.

(Jeok-byeok) - The approach for this crag is similar to Janggun-bong. Before the bridge, look for a trail on your right by a warning sign. Follow it and hike up until you reach a fork. Take the right trail and follow this path for five minutes to reach the base of Jeok-byeok. The approach time will be fifty minutes from the bus stop.

(Youseon-dae) - The directions are similar to the Janggun-bong Southwest Wall. Continue past the shelter and across the suspension bridge towards Geumgang Cave 금강굴. Stay on the main trail to Madeung 마등. Do not follow the trail to the cave. Hike up for five minutes past the start of the far left route on the Southwest Wall of Janggun-bong. Look for a faint trail located between Rescue Mark 02-01 and 02-02 (don't hike past 02-02). Follow the trail, by a big flat rock to your left, into the woods. Scramble up for a couple of minutes, following signs and arrow marks, to the start of the routes. The approach time will be an hour from the bus stop.

(Ulsan-bawi) - From the park entrance, walk on the main trail until you reach a bridge. The trail forks before the bridge. Don't cross the bridge. Take the trail to the right before the bridge and follow the signs for Ulsan-bawi 울산바위. The path passes a temple, Sinheung-sa 신흥사, and a few restaurants. It will take you twenty minutes from the temple to reach the crag.

(Sotowanggol-amjang) - Walk towards the cable car station and cross the bridge, Biryonggyo 비룡교, by the ranger station. 150m past the bridge, there is a sign that says "No Trail". Walk up the trail that passes under the sign and continue on for twenty minutes. You will have to cross the stream to get to the crag.

Gear

(Janggun-bong) - 10 draws, a 60m rope, and a full set of cams.

(Jeok-byeok) - 15 draws, two 50m ropes, and a full set of cams and nuts. Extra small to mid-sized cams with foot aiders are required.

(Youseon-dae) - 10 draws, two 60m ropes, and a full set of cams and nuts.

(Ulsan-bawi) - 15 draws, two 60m ropes, a full set of cams and nuts. Aid-climbing equipment is recommended.

(Sotowanggol-amjang) - 12 draws, two 60m ropes, a full set of cams. There is also one aid-climbing route available.

Safety

A helmet and extra webbing is recommended for the climbing in Seorak-san.

(Ulsan-bawi) - Many of the bolts and anchors are old and outdated. Practice extreme caution when using them and back up the anchors with your own gear. Rock fall is common, especially in the couloir.

Additional Comments

Climbing at Seorak-san requires a permit, available at <http://www.knps.or.kr>. Water and food is available at the shelter and the park entrance. Camping and cooking is not allowed in the park except in designated areas.

SEORAK-SAN 2 설악산

Description

(**Agal-bawi**) - Agal-bawi was opened to the public in 2000. This crag is located next to Okyeotang Rest Area 옥녀탕휴게소, 3km west of Jangsudae Ranger Office 장수대 on Hangeoryeong 한계령 from Yangyang 양양. Agal-bawi is named after a mouth because of the strange shape at the top of the rock. Although it faces south, the trees around the crag offer pleasant shade.

(**Mireukjanggun-bong**) - This crag rests on the west part of Seorak Mountain. It is solid granite rock with sweet lines of cracks, face, slab, and some bolted routes for your pleasure. The north part is shorter than the south, but it has some challenging routes on the multi-pitches. It faces west. Routes start from the left by the chart. Spectacular summit views await you at the top.

(**Sinseondae**) - Sinseondae was developed in 2004. It faces southeast. It gets sun for a couple of hours in the morning, but it will be in the shade all afternoon. This crag offers a steep vertical face and partially overhanging climbs on granite rock that faces the gigantic Mireukjanggun-bong. Scenic views from each anchor provide climbers with an enjoyable finish.

Directions

(**Agal-bawi**) - 38.120386N 128.318242E

(**Mireukjanggun-bong**) - 38.125847N 128.338079E

(**Sinseondae**) - 38.125172N 128.33559E

Hangye-ri, Buk-myeon, Inje-gun 인제군 북면 한계리

(**Agal-bawi**) - This crag can be reached by bus from Yangyang 양양, Osaek 오색, or Wontong 원통. Take a bus to Jangsudae 장수대. To save time, you can ask the bus driver to drop you off at Okryeotang Rest Area, before the Jangsudae Ranger Office. At Jangsudae, you can approach the crag by walking east to Okryeotang Rest Area 옥녀탕. Agal-bawi is located directly behind the rest area.

(**Mireukjanggun-bong**) - From Jangsudae 장수대, walk west towards the bridge Jangsu #3 장수 3 교. You will see a sign that says "Trail is off limits". Walk past the sign and follow the trail up into the forest. Continue on the trail to the crag for twenty minutes until you reach a stream. The crag will be on your right.

(**Sinseondae**) - This crag is across the stream from Mireukjanggun-bong 미륵장군봉.

Gear

(**Agal-bawi**) - 10 draws and a 50m rope.

(**Mireukjanggun-bong**) - 12 draws, two 60m ropes, a set of mid-sized cams.

(**Sinseondae**) - 10 draws and a 60m rope. A full set of cams is needed for the route "Until Sun Goes Down 노을이 질 때까지".

Safety

(**Mireukjanggun-bong**) - A few of the routes are run out. A helmet and extra webbing is recommended.

(**Sinseondae**) - The quality of the rock is a bit crumbly and rockfall is common so a helmet is recommended. It will be faster to walk down, rather than abseiling, by following the ridge behind the routes.

Additional Comments

Climbing at Seorak-san requires a permit, available at <http://www.knps.or.kr>. Water and food is available at Jangsudae Rest Area 장수대.

(**Agal-bawi**) - There is a great restaurant and store at the Jangsudae Rest Area 장수대. You can get great meals and snacks at the restaurant before heading down to the crag.

(**Sinseondae**) - There is a variation route between the third and fourth route from the left.

Description

Ganhyeon-am is one of the most popular sport climbing crags in South Korea. It features a ton of fun climbing on easy slab, exciting face climbing, overhanging climbing, and a few multi-pitches with enough grade variations to offer something for everyone. On top of that, the setting, encompassed by the clean river, are outstanding. It is a kind of limestone rock that faces southeast. The wall gets sun all summer long.

Directions

37.368639N 127.822849E

Ganhyeon-ri, Jijeong-myeon, Wonju-si 원주시 지정면 간현리

From Downtown Wonju 원주, take the bus bound for Ganhyeon Park 간현. Cross the bridge from the park and then continue on to the smaller one. Walk for five minutes towards the restaurant and minbak 민박 area. The approach time from the Ganhyeon Bus Stop will be fifteen minutes.

Gear

12 draws and a 60m rope.

Safety

Be aware that the longer routes need safety knots at the end of the rope.

Additional Comments

In front of the crag, across the river, there are lots of amenities and excellent camping sites too. During the summer holiday season, you may want to set up your tent as far away from these sites as possible because parties go on all night and the noise can be terrible.

DAEDAP-BAWI 대답바위

Description
Daedap-bawi is a small crag. It is 15m high and 50m wide. There are twenty-eight routes and the climbs vary from vertical and crack, to overhanging climbing.

Directions
37.430637N 127.896781E
Sanhyeon-ri, Hojeo-myeon, Wonju-si 원주시 호저면 산현리

From Wonju Bus Terminal, 원주 take a bus bound for Sanhyeon 산현. Get off at Sanhyeon Public Health Center 산현보건소. Walk northwest along the road for five minutes. The crag can be seen from the road. Cross the rice field to reach it.

Gear
10 draws and a 50m rope.

Safety
This crag seems to be visited less and less. A lot of the bolts and anchors have become rusty.

Additional Comments
Please respect the farmers during the busy farming season.

BAEKWOON-SAN, SANG-BAWI 백운산 상바위

Description

This crag was developed in 1992 with seven routes. It faces southwest on granite rock. It offers mostly easy slab multi-pitch climbing, except for the route called “Sangseok”. Sang-bawi is usually quiet and is a good place to train beginners.

Directions

37.239246N 127.911243E

Guirae-ri, Guirae-myeon, Wonju-si 원주시 귀래면 귀래리

From Wonju 원주, take the bus heading to Guirae 귀래. Get off at Cheongwon Rest Area 청원휴게소. It will take forty minutes from Wonju to get there. With your back to the rest area, walk left on the forest road that is by a big tomb. The crag can be seen on your right from time to time while walking along the road. Continue on the flat forest road for twenty-five minutes until you see a sign that says “상바위” Sang-bawi. At the sign, look for a trail on your right that starts to ascend steeply. Scramble up for ten minutes to reach the crag.

Gear

10 draws and a 60m rope. The Sangseok 상석 route requires a set of small to mid-sized cams.

Safety

A helmet and extra webbing is recommended. The wall is a bit mossy, but most of the bolts and anchors are in good condition.

Additional Comments

Water and snacks should be available at the shop by the bus stop.

EUIAM-AMJANG 의암암장

Description

This crag is located by a lake with awesome settings. It offers tons of features, but a lot of the holds and edges are sharp. It is a kind of quartz rock that faces southeast.

Directions

37.840652N 127.677602E

Euiam-ri, Sindong-myeon, Chuncheon-si 춘천시 신동면 의암리

To access the crag, take a bus from downtown Chuncheon 춘천 to Euiam Dam 의암댐.

From Euiam Dam Bus Stop, walk down the road with the lake to your left. Walk past the restaurants for 200m until you see a small parking space and hiking map to your right on the road. Past the map, hike up for 20m and when you reach a fork, take the trail that branches off to the right. The approach time to get to the crag from the bus is ten minutes.

Gear

12 draws and a 60m rope.

Safety

The left wall of the crag is a bit loose and mossy.

Additional Comments

I climbed this crag before it was opened to the public. All the bolts and anchors were new. I believe that this crag will draw many visitors. There is a great ridge route near Euiam-amjang. There are also lots of stores and restaurants around the bus stop.

YONGHWA-SAN, SAENAM-BAWI 용화산 새남바위

Description

The name of this granite crag means “Birds are flying”. It offers mostly challenging crack climbs with natural trees in the middle of the routes. As this crag is located in a remote region, it is a quiet place to enjoy climbing. Saenam-bawi faces south and is in sun all day.

Directions

38.037681N 127.743917E

Goseong-ri, Sabuk-myeon, Chuncheon-si (춘천시 사북면 고성리)

To reach the crag, take a bus from Chuncheon 춘천 bound for Yangtong 양통. It will take an hour. Get off at the end of the line. Walk straight up the road to the north until you reach the bridge Sayeogyo 사여교. At the bridge, stay to the left (don't cross the bridge) and hike up for an hour until you reach an unpaved road on the hill. Go right at the hill and you will reach the crag in fifteen minutes. The crag is visible from the bus stop.

Gear

10 draws, a 50m rope, and a full set of cams.

Safety

A helmet is recommended. Instead of abseiling, you can take the trail at the top of the hill to walk down. A few of the bolts and anchors are not in good condition, so bring a few slings to back up the protection.

Additional Comments

Water and food should be purchased beforehand.

Photo Courtesy of Lea Gang, 강레아

The Myth Of Yonghwa Mt. 용화산의전설	5.11b	22

Description

These crags are in the northernmost location near the DMZ, which means this area remains untouched. With a clean stream and fresh air, it is a great place for weekend outings.

(Deokgu-bawi) - This crag consists of single-pitch sport climbing on an easy face and the routes become steeper as you move further to the right. It is granite rock and faces southwest.

(Maewoldae-amjang) - This place offers slab, cracks, and steep vertical face climbs with multi-pitches. It faces southeast.

Directions

(Deokgu-bawi) - 38.198613N 127.481857E

(Maewoldae-amjang) - 38.200081N 127.484879E

Jamgok-ri, Geunnam-myeon, Cheolwon-gun 철원군 금남면 잠곡리

(Deokgu-bawi) - From Dong-Seoul Bus Terminal 동서울버스터미널, take a bus to Uijeongbu 의정부. From Uijeongbu 의정부, take a bus heading to Wasu-ri 와수리 and transfer to a bus bound for Maewoldae 매월대. There is a small restaurant called “매월산장” Maewolsanjang at the end of the line where you can stay the night. At the restaurant, look for the sign that shows you the direction to Maewoldae-amjang. Hike up the trail by the sign (Don't take the main trail by the stream or cross the bridge) for ten minutes until you arrive at Deokgu-bawi.

(Maewoldae-amjang) - From Deokgu-bawi, hike up to the right for five minutes to get to Maewoldae-amjang. It will take roughly two and a half hours to reach the mountain from Seoul.

Gear

(Deokgu-bawi) - 7 draws and a 50m rope.

(Maewoldae-amjang) - 10 draws, two 60m ropes. The routes are bolted, but you can bring a set of cams if you want to place gear.

Additional Comments

It will be hard to go on a day trip from Seoul so a weekend trip is recommended. Water and snacks can be bought at the restaurant.

BUKHAN-SAN, INSU-BONG 북한산 인수봉

Description

When Yvonne Chouinard was a soldier in Korea, he could see the potential of climbable rock. He left his legacy in the mountains skirting the north of Seoul, including the omnipresent Insu Peak 인수 in Bukhan-san National Park 북한산. This balding granite zenith can get mighty crowded on the weekend. So if you are up for the ascent, it is best to go on a weekday or at the crack of dawn on a Saturday or Sunday. Rarely will you see a two-man team scaling this giant geological formation. A team of five to eight is a much more common sight and rightly the more laborious and lengthy of an endeavor. The climbing here is stellar and pitch by pitch, the great city of Seoul is unveiled behind you.

Directions

37.659609N 126.980013E

Ui-dong, Gangbuk-gu, Seoul 서울 강북구 우이동

To access the crag, take Exit 3 from Suyu Station 수유 (Line #4) and take a bus bound for Ui-dong 우이동. Get off at the end of the bus line. From the bus stop, walk for twenty minutes to Doseon-sa Parking Lot 도선사. It will save time if you take a taxi at the last bus stop. If you are in a climbing team, grab a cab directly from Suyu Subway Station to the parking lot. Splitting the cost between a few people will be cheaper and definitely faster than the buses. From the parking lot, take the main trail that passes by the ticket office. The trail leads straight up to the trailhead for Insu-bong 인수봉. After Rescue Mark 20-1, the trail goes down slightly and soon after you will see the magnificent face of Insu-bong 인수봉. Hike right for ten minutes past the ranger station to the base of the crag. Don't hike straight up the main trail past the ranger station. The approach time will be thirty minutes from the parking lot.

Gear

10 draws, a 60m rope, and a full set of cams with extra mid-sized cams.

Safety

This crag experiences a lot of traffic so you might encounter rusty corroded ring-bolts and large sections where routes are run-out. Abseiling can be done at the top of the peak facing the neighboring peak Baekundae 백운대. Rappelling from the right station lowers you to a scary overhang. Helmets are recommended.

Additional Comments

For camping, you need to get a permit from the ranger station. Get water and snacks at the parking lot.

There is a route map at the base of Insu-bong. Detailed beta is also available at: <http://www.nepa.co.kr/Academy/RockNavigation.aspx?mtcode=Mt2&pocode=PO707>

DOBONG-SAN, SEONIN-BONG 도봉산 선인봉

Description

Seonin-bong was first climbed in 1937. It carried out a primary role as a destination for climbers in the initial stages of Korea's climbing history. With battling egos, the climbing community was split into two groups between Insu-bong and Seonin-bong. This crag offers slab, crack and an assortment of face, chimney, and overhanging climbing on protruding, granite rock in the north of Seoul. The climbs here are steeper than Insu-bong, but it has better friction. It faces southeast.

Directions

37.696496N 127.017692E

Dobong-dong, Dobong-gu, Seoul 서울 동봉구 도봉동

In Seoul, take the subway to Dobong-san Station 도봉산 and walk out from Exit 1. Cross the main road and continue towards Seonin-bong 선인봉, which can be seen from the road as you pass the many shops and vendors. Refer to the maps on your way up to the main trailhead. Take the trail that leads you to the Mountain Rescue Office 산악구조대. From the rescue office, take the trail on the right to reach the crag. The approach time will be forty minutes.

Gear

15 draws, two 60m ropes, and a full set of cams with extra small to mid-sized cams.

Safety

Rappelling can be mostly done from the anchors on the routes you climbed, so be cautious about climbers behind you. However, abseiling can also be done at the top of the crag by one rappel and walking down the backside. A helmet and extra webbing is highly recommended.

Additional Comments

Food and water can be bought at the base. For camping, a permit is required. You can get one from the ranger station. On the weekends, some of the popular routes are usually crowded.

SURAK-SAN, DAEJU-AMJANG 수락산 대주암장

Description

This crag offers mainly moderate slab climbs on granite rock. There are face and crack climbs. Daeju-amjang faces south. There is a diagram that describes route beta on the far right side of the wall.

Directions

37.695656N 127.077205E
Sanggyeo-dong, Nowon-gu, Seoul 서울 노원구 상계동

In Seoul, take a subway to Suraksan Station (Line #7) and take Exit 1. Walk straight for 400m. Take the first right at the end of the apartment complex. Continue on the main trail for thirty minutes until you come to an open area called “새 광장” Sae Gwangjang, near a mountain spring. Past Sae Gwangjang 새 광장, take the right path and scramble up to the crag. The crag is visible once you take the right at the open area. From the subway station, it takes fifty minutes to reach the crag.

Gear

15 draws and a 60m rope.

Safety

A helmet is recommended.

Additional Comments

Water can be found at the spring near the open area.

Description

Located in the north of Seoul, the climbs at this crag are comparable with that in Insu-bong 인수봉 and Seonin-bong 선인봉. However, Naewon-am will be an alternative to avoid the large crowds during the weekends. This crag offers slab, vertical face, and crack climbs on granite rock that faces east. The climbs vary from half sport and half trad climbing. On the wall, the routes start from the far right on the front wall. There is another crag called Daeju-amjang 대주암장 on the other side of this mountain. Waterfalls and picturesque scenery along the trail to the crag will give you a pleasant hike.

Directions

37.700919N 127.091925E
Cheonghak-ri, Byeolnae-myeon, Namyangju-si 남양주시 별내면 청학리

In Seoul, take a subway to Danggogae Station 당고개 (Line #4) or to Seokgyeo Station 석계역 (Line #1). Take a bus bound for Chunghak-ri 청학리 and get off at Chunghak-ri 청학리. Head towards Surak-San Amusement Park 수락산유원지 and continue on the road for ten minutes past Okryu Waterfall 옥류폭포. There are many restaurants to your right by the stream. Follow the stream and once you cross the small bridge, look for a sign to your left that says “백호암” Baekho-am. Follow the sign (don’t follow the big temple sign) until you reach the small temple Baekho-am 백호암. At the temple, do not go straight forward. Instead, hike up to the immediate right with the temple to your right. The approach will be fifteen minutes from the temple.

Gear

12 draws, two 60m ropes, and a full set of cams.

Safety

A helmet is recommended even though the quality of rock is pretty good. The anchors and bolts are also in good shape.

Additional Comments

Get water at the mountain spring. As mentioned above, this crag is a good place to avoid a large crowd on weekends. There are good campsites below the crag on the left.

MYEONGSUNG-SAN, CHAK-BAWI 명성산 책바위

Description

Chak-bawi 책바위 is granite rock that offers pleasant slab climbs. Recently, a local climbing club developed two new routes. There is a lot of potential for traditional climbs between the existing routes. It faces south.

Directions

38.073856N 127.333152E

Sanjeong-ri, Yeongbuk-myeon, Pocheon-si 포천시 영북면 산정리

From either Sang-bong 상봉, Dong-Seoul 동서울, or Suyou-ri Bus Terminal 수유리, take a bus to Uncheon 운천 in Phoccheon 포천. From Uncheon, get on the bus to San Jung-Hosu 산정호수 and walk toward temple Jain-sa 자인사. Continue on the main trail for twenty minutes and then scramble to the right past Rescue Mark 3-2. Cross over the small, dry stream and then continue hiking for ten minutes.

Gear

10 draws, a 60m rope, a set of cams, and extra webbing.

Additional Comments

Unfortunately, it is hard to get accurately documented route beta. This crag is 100m high and 80m wide with low-angled slab climbing on granite rock. There are a few unknown routes that had been put up when I went in November 2011. Grades are assumed to be ranging from 5.9 to 5.11 in difficulty. There are good opportunities to develop climbs around Chak-bawi. Trees, in the middle of routes, will give you a great rest point and belay spot.

SORI-SAN, SAMHYEONGJAE-BAWI 소리산 삼형제 바위

Description

This crag is kind of a smaller version of Ganhyeon 간현, but it will not be as crowded as Ganhyeon, even during the peak season. It is a perfect place for a summer vacation with the family, where all can enjoy jumping into the stream. The climbing area consists of two crags. The first crag is called "Three Brothers Rock" 삼형제바위. Climbs vary from face, crack, and overhung climbing on igneous rock that faces northeast. The second crag is located 50m up from the left side of the first crag and has a cool view of the stream with its dark grey color. There are two multi-pitch climbs. The crags were developed from 1996 to 1999.

Directions

37.639451N 127.622037E

Jungdaebang-ri, Seo-myeon, Hongcheon-gun 홍천군 서면 중대방리

There are multiple transportation options to get to the crag. For those from the north, go to Cheongpyeong 청평. From there, take an intercity bus bound for Mogok 모곡 and transfer to a bus bound to Hongcheon 홍천. Get off at Seoksan Gas Station 석산. For those from the south, go to Hongcheon 홍천 and take the bus heading to Seoksan-ri 석산리 and get off at Seoksan Gas Station 석산. From the gas station, you can see the crag by the bridge. It will be hard to get to the crag by public transportation because the buses only run a couple of times a day.

Gear

12 draws, a 60m rope, and a full set of cams.

Safety

A few of the routes are crumbly and mossy so a helmet is recommended.

Additional Comments

There are good camping sites and excellent local restaurants which serve spicy fish broth. There are also minbaks 민박 and a jjimjilbang 찜질방 to stay at.

HANAGAE-AMJANG 하나개암장

Description

Located at Hanagae Beach 하나개 in Mueuido 무의도, the crag is divided into three areas within less than 200m of each other. Most of the routes are facing west with a unique setting. High tide usually comes around 3 p.m. and lasts about an hour, so most of the areas are climbable all day. Many of the routes can be top-roped.

Directions

37.376637N 126.409378E

Mueui-dong, Jung-gu, Incheon 인천 중구 무의동

From Seoul, take a bus or train to Incheon International Airport. Exit from Gate 6 and take a bus bound for Jangjindo 장진도 or take buses bound for the entrance of Mueuido 무의도 and walk twenty minutes to reach Jangjindo. Buses bound for Jangjin-do run every hour and will take you straight to the ferry dock. However, instead of waiting for an hour, it will be faster to take the bus bound for Mueuido Entrance 무의도입구 because the bus runs every ten minutes. Get on a ferry for Mueuido at Jangjindo dock. Hanagae Beach can be approached by either a bus or by walking through the mountain trail from the village 큰무리, where you get off the ferry. To access the crag from Hanagae Beach, take the path that is on your left as you face the sea. Continue walking along the sea for twenty minutes, past a couple of wooden fences, until you see guide ropes heading down to the crag at sea level. When the tide is low, it can be reached by walking along the seaside. The approach time from the ferry dock will be an hour.

Gear

12 draws and a 50m rope. A set of cams can be used on some of the routes.

Safety

Although the crag is a sea cliff, it is good quality stone.

Additional Comments

There are tons of amenities at the beach and great campsites around the crag.

HAMHEUDONGCHEON-AMJANG 합허동천암장

Description

This crag lies on the most sacred mountain in South Korea, where the legendary founding father of ancient Korea used to hold a memorial service for Heaven. It was developed in 2010 with sixteen routes. It is small, but this crag offers hard climbs on a slabby face with thin cracks in all the corners of the routes. The rock is good quality and is the perfect place for practicing cam placements. It faces east, but is shaded by the trees all day.

Directions

37.61362N 126.44819E

Sagi-ri, Hwado-myeon, Ganghwa-gun 강화군 화도면 사거리

From Seoul, take a bus to Ganghwa Bus Terminal 강화 and then transfer to a bus bound for Hamheudongcheon 합허동천. Get off at Hamheudongcheon. At the bus stop, walk to Hamheudongcheon Campgrounds and stay left on the main trail, past the ticket counter. After a ten minute hike from the ticket counter, you will reach a white, rectangular water tank on your left. Go left around the tanker and if you look closely, you will see a path and a black wooden sign with a cross. Follow this path for five minutes and the crag will be on your right.

Gear

7 draws, a 50m rope, and a set of cams with extra small cams.

Additional Comments

Hamheudongcheon is one of Korea's biggest campsites with lots of facilities and good scenery.

Photo Courtesy of Lea Gang, 강레아

JOBİ-SAN, JOBİ-AM 조비산 조비암

Description

Jobi-am 조비암 has a plethora of nice roof routes above the cave, which is located in the center of the crag. It also offers both easy and hard face routes on either side of the cave. The crag is in the sun all day because it faces directly south. The hard roof routes above the cave were added recently. The crux on the roof easily disappears after a couple of hard pulls. Most of the routes have names and grades painted at the bottom. The bolts look very good and the rock quality, for the most part, is excellent. Two easy traditional climbing routes were also established on either side of the cave, where you can place a few cams if you would like to ignore the bolts on the routes.

Directions

37.117904N 127.368472E

Seokcheon-ri, Baekam-myeon, Cheoin-gu, Yongin-si 용인시 처인구 백암면 석천리

From Seoul, take a bus to Yongin Bus Terminal 용인. From Yongin, transfer to a bus bound for Baekam 백암. At Baekam Bus Stop, take a bus heading towards Jangpyeongsamgyeri 장평삼거리. From there, walk straight for five minutes on the road and hike to Jobisan Garden Restaurant 조비산가든. Continue on the unpaved road for fifteen minutes. The crag can be seen all the way from the bus stop.

Gear

10 draws and a 50m rope. Bring some trad gear if you want to practice placing pieces on the multi-pitch routes.

Safety

For the routes on the far right side, a helmet is recommended.

Additional Comments

When the weather is bad, local climbers camp out in the cave, which is large enough for two or three tents. However, there is a spacious area in front of the cave for pitching tents as well. Water and food should be bought at the bus terminal.

DWAEJIGUL-AMJANG 돼지굴 암장

Description

The crag is located on Doderum-san's 도드람산 fourth peak. Dwejigul-amjang 돼지굴암장 was developed in 2003 and has thirteen routes with one crack route in the middle that can be trad climbed. Most of the routes are angled between 80 to 120 degrees and the rock is very solid. Dodeuram 도드람 means "crying wild boar". Legend has it that one day, when a monk was collecting mushrooms at this crag by hanging from a rope, he heard a crying boar at the top of the crag. He climbed up to investigate and when he reached the top, the monk found that his rope was almost cut through by the rock. He looked for the boar that had saved him, but it was gone. Since then, people started to call this mountain Dodeuram-san 도드람산.

Directions

37.269331N 127.39082E

Mok-ri, Majang-myeon, Icheon-si 이천시 마장면 목리

From either Dong-Seoul Bus Terminal 동서울버스터미널 or Gangnam Highway Bus Terminal 강남고속버스터미널, take an intercity bus bound for Icheon 이천. Get off at Icheon 이천 and transfer to a bus bound for Yongin 용인. Get off at Pyogo Elementary School 표고 and then walk for fifteen minutes to the SK Training Center. From the SK Training Center, you can see the five peaks lined up on the mountain. There are two main trails to get to the crag. The middle trail will lead you up to the ridge, but the east trail has an easier approach. Follow the hiking map, at the trailhead, and the signs to the fourth peak. The crag is right below the peak on the east side. It will take thirty minutes to reach the crag from the trailhead.

Gear

7 draws, a 50m rope, and a set of small to mid-sized cams if you prefer placing protection.

Additional Comments

Close to this crag, there is another potential wall that will be developed sooner or later. This seldom-visited area is a pleasant thirty minute hike that offers a lot of sunshine and open space on the rocky ridge. There is also some nice bouldering if you look around the area.

NAMHANSANSUNG, BEOMGUL-AM 남한산성 범굴암

Description

Unlike the other crags in Gyeonggi-do area, this crag has different rock textures with various edges and ledges that offer good angled, overhung climbs. All of the climbs are less than fifteen meters long and face southeast. There are also two bouldering routes on the wall.

Directions

37.45873N 127.208891E
Buldang-ri, Jungbu-myeon, Gwangju-si 광주시 중부면 불당리

In Seoul, take the subway to Sansung Station 산정역 (Line #8) and get out at Exit 2. Transfer to a village bus heading to Buldangri 불당리. The bus lines change occasionally, so be sure to ask someone in the village. Get off at Buldangri. Walk past the first bridge from the road and continue walking towards the village for 100m. Cross the bridge on your right at the mouth of the village. Pass the green fence by a restaurant and walk up the hill until the trail branches. Take the left path that goes towards the gravesite and hike up the steep trail. After a few moderate switchbacks and more gravesites, you will see the crag on your right. The approach time will be twenty minutes.

Gear

8 draws and a 50m rope.

Safety

This crag is well bolted with clamped wire anchors.

Additional Comments

Water should be bought at the village. There are good campsites around the crag.

OBONG-SAN, BYEONGPUNG-AM 오봉산 병풍암

Description

This crag is small, standing at 15m high and 30m wide. It features twelve routes and offers a few moderate overhanging and face climbs. It faces north and is in the shade all day.

Directions

37.344351N 126.964509E
Gocheon-dong, Euiwang-si 의왕시 고천동

In Seoul, go to Gunpo Subway Station 군포 (Line #1) and then take a bus heading to Uiwang City Hall 의왕. There is a good trail behind city hall. Follow the trail and take the right path at the fork. Continue on for five minutes to reach the crag. The approach time will be fifteen minutes from city hall.

Gear

5 draws and a 50m rope.

Safety

The first bolts on a few of the routes are pretty run out, so be careful when leading and use a spotter if possible.

Additional Comments

You can get water and snacks from the shop at city hall.

MORAK-SAN, MIRAE-AM 모락산 미래암

Description

Located in Uiwang-Si 의왕시, Mirae-am 모락산미래암 has thirty routes. It's 10m high and 100m wide. This crag was established in 1992. It has a metamorphic rock texture and angles ranging from 80 to 135 degrees, which makes it ideal for strengthening finger muscles and working on hard, technical moves. All the climbing here is intense, including the easier routes. There is a diagram on the first route with grades for each climb.

Directions

37.367804N 126.973844E

Ojeon-dong, Uiwang-si 의왕시 오전동

From Gumjung Subway Station 금정역, take a bus heading for Shinwon Rotary 신원. Get off at Uhan-Kimberly 유한양행. From Uhan-Kimberly 유한양행, walk towards Hyoseong Elementary School 효성초등학교. Continue past the elementary school, between Jindallae Apartment 진달래 and Shinwon Apartment 신원. Cross the road at the lights after these apartments. There is a spring for water by Hangwang Shine Hill Village Apartments 한광. Hike up the main trail for twenty minutes. After walking up a couple of wooden stairs, there is a Rescue Mark 1-5 near the top of the main trail. This is the top of the crag. Turn left and walk for a couple of minutes behind the sign. It will be much quicker to grab a cab to get to Hyoseong Elementary School 효성. This costs about 3,500 KRW from Geumjeong Station 금정 (Line #1) or Indeokwon Station 인덕원 (Line #4). Also, the LG Apartments Bus Stop, not available directly from the subway, is next to the trailhead.

Gear

10 draws and a 50m rope.

Safety

All the bolts are in pretty good in shape, but a few of the anchors are rusty and somewhat suspicious. Bring some slings and extra draws for lowering.

Additional Comments

This crag becomes overgrown during the summer and some of the belay stations are unstable. However, everything will still be climbable. The crag is in the shade during the morning, but from mid-afternoon it is in the sun.

SURI-SAN, MAE-BAWI 수리산 매바위

Description

Mae-bawi boasts of great high-angle face climbs with highly featured thin crack lines on granite rock. It offers something different to enjoy at every turn. The wall faces south. This crag is a hidden gem among the crags in Gyeonggi Province 경기.

Directions

37.358526N 126.905587E
Sanbon-dong, Gunpo-si 군포시 산본동

Take the subway to Geumjeong 금정 or Sanbon Station 산본 (Line #4). Take a bus heading to Gunpo Library 군포도서관 and get off there. Hike up past two mountain springs and by a big utility pole, following the sign for “슬기봉” Seulgi-bong, until you see a sign that says “임간교실” Imgangyosil. From there, you will see the crag to your right. Hike up for ten minutes. It will take thirty-five minutes to get to the crag from the library.

Gear

10 draws and a 50m rope.

Safety

This crag is well bolted with good anchors.

Additional Comments

Even though it’s a bit of a small crag, I would say it is one of the best sport climbing areas in Seoul.

BYEONGPUNG-BAWI BAC 병풍바위 BAC

Description

About twelve separate crags are spread over the south base of Samseong-san 삼성산. Byeongpung-bawi BAC has nineteen routes that require finger strength and balance. BAC stands for the name of the club that developed this crag.

Directions

37.439361N 126.917324E

Seoksu-dong, Manan-gu, Anyang-si 안양시 만안구 석수동

From Gwanak Subway Station (Line #1), take Exit 2 and walk through the underground pass across the main road to reach the bus stop. Take Bus 6-2 or 20. Get off at either Gyeonggyodae 경인교대 or Anyanghaesol School 안양해솔학교. At the Anyanghaesol School, walk past the iron fence and to the drainage tunnel. Follow the tunnel as it winds around the highway. Once you reach the end of the tunnel, you will see a ribbon, which marks the trailhead for BAC. Follow the trail to the left for five minutes. You will reach a mountain spring. 50m north from the spring you will see BAC.

Gear

8 draws and a 50m rope.

Additional Comments

Water and snacks should be bought beforehand. According to local climbers, there are more than a dozen crags scattered on this mountain. You may possibly encounter one of the crags not described here when you walk along the trails.

Description

Sumeun-am means hidden crag. As the name represents, it is hard to find on the trail because the trees hide the rock and the location hinders the view. Although this crag is relatively small with easy routes, it features various climbs on granite rock. It faces east and is good quality rock.

Directions

37.441558N 126.930531E

Seoksu-dong, Manan-gu, Anyang-si 안양시 만안구 석수동

The approach is similar to BAC. Go to Gyeongnyodae 경인교대. There is a parking lot by the bus stop. Walk 50m past the parking lot and cross the stream on your left. Continue for 20m and cross another stream. Hike right with the stream on your right (don't hike up to the top). Follow the trail along the stream for fifteen minutes and keep an eye out for a rock with a few Chinese characters written on it and a temple mark 卍 in blue by the trail on your left. About 100m past this rock, look for a path on your left. Hike up the trail for a few minutes to reach the crag. From the parking lot, it will take twenty-five minutes to get to the crag.

Gear

10 draws and a 50m rope.

Additional Comments

The crag is in the sun until late afternoon and is easily accessible by public transportation. The belay station is well established and there are also good campsites available.

Photo Courtesy of Lea Gang, 강레아

NOCLES-AMJANG 노클스암장

Description

This crag offers challenging overhanging climbs on granite rock. The grades are a little sandbagged. It faces west and gets shade all day. The rock is very solid.

Directions

37.443765N 126.958839E
Sillim-dong, Gwanak-gu, Seoul 서울 관악구 신림동

From Seoul National University Subway Station (Line #4), take Exit 3 and walk towards Gwanak-san Park 관악산공원. Continue on the main trail until the Rescue Mark K59, past the wooden bridge. Walk down and right to the valley at the end of the small wooden bridge. The crag is underneath the main trail, right before the bridge. Total approach time from the subway station will be fifty minutes.

Gear

10 draws and a 50m rope.

Additional Comments

The crag will be in the shade all day, even in the summer. The belay station offers good campsites.

GWANACK-AMJANG 관악암장

Description

This crag was developed in 1991 and has seventeen routes. The climbs here are less than 13m and offer face, crack, and overhanging climbing on excellent granite stone. It can be reached within half an hour from the subway station and gets sun all day.

Directions

37.43747N 126.976976E

Junang-dong Gwacheon-si 과천시 중앙동

At Gwachun Subway Station 과천 (Line #4), take Exit 7. Head towards Gwachun Middle School 과천중학교. Pass the middle school and walk up to the park office. It will take fifteen minutes from the subway station. Continue to hike on the main trail for another fifteen minutes until you reach a wooden bridge. The trail will start to ascend steeply. After a few minutes of hiking, you'll see the crag to your left. Cross the valley and scramble up to the crag.

Gear

7 draws and a 50m rope.

Additional Comments

There are a few campsites around the crag. Water and snacks should be bought before getting on the main trail.

MUAKJAE ANSAN-AMJANG 무악재 안산암장

Description

Located in the middle of Seoul, this crag was developed from 1986 to 2008 by a tenacious gym owner. A couple of the routes have been used for the gym members' training on the weekends. The crag offers a variety of climbs on good quality granite rock that faces east. The routes vary between slab, crack, face, and overhanging climbing.

Directions

37.576845N 126.948116E

Hongje-dong, Seodaemun-gu, Seoul 서울 서대문구 홍제동

At Muakjae Subway Station 무악재 (Line #3), take Exit 3 and walk straight up the hill Muakjae 무악재 for 150m. Turn right to the small uphill road by an apartment and then continue on the road past the parking lot. Hike up the mountain trail, passing a wooden staircase, until you reach a spring with exercise facilities nearby. Past the spring, take a left on a steep trail to reach the crag. From the subway station, it will take twenty-five minutes to get to the crag. The crag can be seen from the hiking trail.

Gear

12 draws, two 60m ropes, and aid climbing equipment.

Safety

A helmet is recommended.

Additional Comments

According to the gym owner, the multi-pitch routes are mostly 60m long with most of the pitches being approximately 30m long. The belay stations, rest area, and restrooms are well established and maintained by the gym members. Be mindful of your visit to the crag. Water and snacks should be bought beforehand.

GAMAK-SAN, SEOLGWI-AM 감악산 설귀암

Description

This crag is composed of an overhanging upper section and a vertical faced lower section on granite rock that faces south. It offers crimpy face climbing with some blunt holds. Most of the routes, including the crack climb, are sandbagged. This crag is located next to the main hiking trail, so the hikers may be distracting during the weekends, but the rock quality is good.

Directions

37.941482N 126.957407E

Seolma-ri, Jeokseong-myeon, Paju-si 파주시 적성면 설마리

From Euijungbu City Bus Terminal 의정부, take the bus bound for Jeokseong 적성 and get off at Beomryun-sa Temple 범륜사. It will take an hour. At the bus stop, walk up to the temple. Continue on the main trail for forty minutes until you see the Rescue Mark 3-3, that is located next to a spring. The crag is right by the trail, 200m after the mark.

Gear

10 draws, a 50m rope, and a full set of cams

Additional Comments

Water should be readily available at the spring. There are good campsites around the crag.

JEJU-DO PROVINCE 제주도

- Musucheon Gyeongok-amjang
- Oedolgae-amjang
- Dansan-amjang

MUSUCHEON GYEOGOK-AMJANG 무수천 계곡암장

Description

This basalt rock has twenty-nine routes and was developed from 1999 to 2002. This crag is divided into two walls, one at Yaoeumakdang Wall 야외음악당 and the other at Jisangnakwon 지상낙원, which is on the opposite side of Yaoeumakdang 야외음악당. This crag offers powerful challenges for the grade on overhanging routes.

Directions

(*Musucheon North*) - 33.463611N 126.446414E

(*Musucheon South*) - 33.455685N 126.446521E

Gwangryeong-ri, Aewol-eup, Jeju-si 제주시 애월읍 광령리

From Jeju Airport, take the bus bound for Gwangryeong 광령, Goseong 고성, or Yangjamdanji 양잠단지. At Jungang-ro 중앙로, get off at Musucheon Rest Area 무수천휴게소. It will take twenty minutes from the airport and the buses run every fifteen minutes. From the rest area, walk along the northbound concrete road for five minutes until you reach the restaurant called Gohyang Garden 고향가든. You will see a steel door with a path behind it that leads to the stream on your right. Pass through the door and walk down the stairs to the riverbed. Walk south along the stream and you will come across the routes that are scattered in the area.

Gear

10 draws and a 50m rope.

Safety

Beware of flash floods. When the stream swells, it is very dangerous to cross over the stream.

Additional Comments

The routes are scattered along the riverbed. There are also many interesting bouldering problems around the crags with great campsites. Sunshine fades away early, so summer will be best time to climb here. There is another crag that is further south along the stream that is known as Stonebridge Crag. To access the south crag, continue following the stream to the south. It will take twenty minutes. You can also access it from the road by crossing the street from the rest area and walking towards the gas station. Look for a trail on your left 50m before the gas station and follow it with the stream on your left for ten minutes. There will be a very faint trail to your left with a guide rope. Scramble down and walk north once you reach the stream. There are two climbing groups that have been competing for this area so none of the routes have been named or graded at this time.

DANSAN-AMJANG 단산암장

Description

The routes at this crag are mostly easy slab on basalt rock. It is worth a visit because of the pleasant thirty minute approach and the amazing view of the southwest side of the island. On the hiking trail, there are a few historical spots you might enjoy, including a few interesting caves.

Directions

33.242528N 126.288636E

Sagye-ri, Andeok-myeon, Seoguipo-si 서귀포시 인덕면 사계리

From Jeju Jonghab Terminal 제주종합터미널, take a bus bound for Inseong-dong 인성동 and Moseulpo 모슬포. Get off at Sagye-ri Dongdong 사계리 동동. Walk towards Inseong-ri 인성리 for ten minutes and hike past the village. There is a map of the hiking trail near the village. Continue up to the crag on the main trail for thirty minutes. It is easy to get to the crag if you follow the map. The crag can also be easily seen behind the village.

Gear

10 draws and a 60m rope.

Safety

A helmet is recommended in case of falling rocks.

Additional Comments

There are many good campsites around the mountain. Routes start from the left with Big Mountain Slab 거산슬랩.

Description

Oedolgae is a high outcropping rock that was created by a volcanic eruption 1.5 million years ago. Legend has it that during the late Goryeo Dynasty, General Choe Yeoung disguised this rock to appear like a gigantic military general to scare off the enemies lurking on Beomseom Islet. This crag is a basalt sea-cliff around Oedolgae and overlooks the beautiful ocean, which can be seen on the first page of this chapter. Although the crag is 30m high, the bottom part can not be climbed because of the waves.

Directions

33.238741N 126.54359E
Seohong-dong, Seoguipo-si 서귀포시 서홍동

From Seoguipo-si 서귀포, take a bus bound for Oedolgae 외돌개 and get off at the last stop. It takes ten minutes. The crag can be easily reached by following the tourist trail to Oedolgae from the bus stop. Continue along the fence until you reach an open area that is on the opposite side of the fence. Hop over the fence. There is a fisherman’s trail that can be seen close to Oedolgae. If you walk further west along the coast, there are bolts that you can rappel from to reach the crag.

Gear

10 draws and a 50m rope. A few of the routes can be climbed traditionally so bring a set of small to mid-sized cams if you’d like to place your own protection.

Additional Comments

There are tons of tourists walking around so don’t forget to pose for photos when you reach the anchors!

ULLEUNG-DO 울릉도

- Jowan-byeok
- Janggun-bawi
- Samseon-am

One of the furthest places you can go in Korea is the small, rocky island of Ulleung-do. To reach this island, you must take a ferry from either Donghae 동해 or Pohang 포항. For those living in the north, Donghae is closer and for those in the south, Pohang will be the best choice. The ferry from Pohang is larger and will be more stable during rough seas.

JOWAN-BYEOK 좌안벽

Description

Once you get off the ferry, you'll be eager to stretch your legs and take advantage of the small warm-up crag directly behind the ferry terminal. Jowan-byeok provides fun face climbing on volcanic rock with juggy holds. It faces southwest.

Directions

37.48161N 130.909787E

Facing inland, go behind the ferry terminal to the right and you'll see bolts on the rock next to the bathrooms.

Gear

7 draws and a 50m rope.

Safety

Although it is solid volcanic rock, a helmet is recommended.

JOWAN-BYEOK 좌안벽

Route Name	Grade	Height
Terminal 터미널	5.10a	15
Ferry 여객선	5.9	13
Breakwater 방파제	5.10a	13

JANGGUN-BAWI 장군바위

Description

This crag is the most solid amongst the Ulleung-do crags. It is volcanic rock and offers face and overhanging climbing. Janggun-bawi is located by the road and faces northeast.

Directions

37.547291N 130.908054E

To get to the main crag, take a bus bound for Cheongbu 천부. From there, transfer to the small village bus. Here you will wind through the hills and get off at Samseon-am 삼선암. From the ferry terminal, the bus journey will take about an hour. On your right, across from the three monoliths protruding out from the ocean, is the main crag of the island. There is a small sign on the road that explains the myth of Samseon-am.

Gear

12 draws and a 60m rope.

Safety

Due to the ever-changing sea-weathered cliffs, a helmet is recommended.

JANGGUN-BAWI 장군바위 (1 OF 2)

Samseon 삼선	5.10c	25
High Rock 하이락 1	5.10b	25
High Rock 하이락 2	5.11a	25

SAMSEON-AM 삼선암

Description

These three monoliths stand tall over the ocean. Among the three, the smallest has the most solid rock. The medium sized rock, on the far right, has only one four-pitch route that is graded 5.10b. According to the locals, the old natives of Ulleung-do used to scale the monoliths without climbing equipment.

Directions

37.549409N 130.90814E

The monoliths are located across the seawall from Janggun-bawi.

Gear

12 draws, a 60m rope, and a full set of cams ranging from #3 to #0.4 to climb on these colossal columns.

Safety

Due to the ever-changing sea-weathered cliffs, a helmet is recommended.

KOREAN ROMANIZATION

1. Basic Principles of Romanization

- (1) Romanization is based on standard Korean pronunciation.
- (2) Symbols other than Roman letters are avoided to the greatest extent possible.

2. Summary of the Romanization System

- (1) Vowels are transcribed as follows:

• simple vowels

ㅏ	ㅑ	ㅓ	ㅕ	ㅡ	ㅣ	ㅞ	ㅟ	ㅠ	ㅢ
a	eo	o	u	eu	i	ae	e	oe	wi

• diphthongs

ㅕ	ㅖ	ㅗ	ㅛ	ㅜ	ㅠ	ㅝ	ㅞ	ㅟ	ㅠ	ㅢ
ya	yeo	yo	yu	yae	ye	wa	wae	wo	we	ui

Note 1: ㅢ is transcribed as ui, even when pronounced as ㅣ.

Note 2: Long vowels are not reflected in Romanization.

- (2) Consonants are transcribed as follows:

• plosives (stops)

ㄱ	ㅋ	ㆁ	ㄷ	ㅌ	ㅌ	ㅂ	ㅍ	ㅍ
g, k	kk	k	d, t	tt	t	b, p	pp	p

• liquids

ㄹ
r, l

• affricates

ㅈ	ㅊ	ㅌ
j	jj	ch

• fricatives

ㅅ	ㅆ	ㅎ
s	ss	h

• nasals

ㄴ	ㅇ	ㅇ
n	m	ng

3. Special Provisions for Romanization

- (1) When Korean sound values change as in the following cases, the results of those changes are Romanized as follows:
 - The case of assimilation of adjacent consonants
e.g. 백마 / 뱀마 *Baengma* 신문로 / 신문노 *Sinmunno*
 - The case of the epenthetic ㄴ and ㄹ
e.g. 학여울 / 향녀울 *Hangnyeoul* 알약 / 알락 *Allyak*
 - The case of palatalization
e.g. 해돋이 / 해도지 *Haedoji* 같이 / 가치 *Gachi*
 - The case where ㄱ, ㄷ, ㅂ, and ㅈ are adjacent to ㅎ
e.g. 좋고 / 조코 *Joko* 농다 / 노타 *Nota*
 - However, aspirated sounds are not reflected in case of nouns where ㅎ follows ㄱ, ㄷ, and ㅂ, as in the examples below.
e.g. 목호 *Mukho* 집현전 *Jiphyeonjeon*

- (2) When there is the possibility of confusion in pronunciation, a hyphen '-' may be used.
e.g. 중앙 *Jung-ang* 반구대 *Ban-gudae*

- (3) The first letter is capitalized in proper names.
e.g. 부산 *Busan* 세종 *Sejong*

- (4) Personal names are written by family name first, followed by a space and the given name. In principle, syllables in given names are not separated by hyphen, but the use of a hyphen between syllables is permitted.

e.g. 민용하 *Min Yongha* (Min Yong-ha) 송나리 *Song Nari* (Song Na-ri)

- Assimilated sound changes between syllables in given names aren't transcribed.

e.g. 한복남 *Han Boknam* (Han Bok-nam) 홍빛나 *Hong Bitna* (Hong Bit-na)

- Romanization of family names will be determined separately.

- (5) Administrative units such as 도, 시, 군, 구, 읍, 면, 리, 동, and 가 are transcribed respectively as do, si, gun, gu, eup, myeon, ri, dong, and ga, and are preceded by a hyphen. Assimilated sound changes before and after hyphen is not reflected in Romanization.

e.g. 충청북도 *Chungcheongbuk-do* 도봉구 *Dobong-gu*

신창읍 *Sinchang-eup* 퇴계로 삼가 *Toegyero Sam-ga*

- (6) Names of geographic features, cultural properties, and man-made structures may be written without hyphens.

e.g. 남산 *Namsan* 연화교 *Yeonhwagyo*

오죽헌 *Ojukheon* 다보탑 *Dabotop*

- (7) Proper names such as personal names and those of companies may continue to be written as they have been previously.

- (8) When it is recommended to convert Romanized Korean back to Hangeul in special cases, such as in academic articles, Romanization is done according to Hangeul spelling and not pronunciation. Each Hangeul letter is Romanized as explained in Section 2 except that ㄱ, ㄷ, ㅂ, ㄹ are always written as g, d, b, l. When ㅇ has no sound value, it is replaced by a hyphen and may also be used when it is recommended to distinguish between syllables.

e.g. 집 *jib* 짚 *jip*

밖 *bakk* 값 *gabs*

독립 *doglib* 문리 *munli*

KOREAN PHRASES

AUTHOR

Dong-il Ryou

Dong-il is a certified English tour guide and train driver for Korail. He has been climbing for the past twenty-five years and has since become deeply involved with the foreign climbing community in Korea.

PHOTOGRAPHER

Jonn Jeanneret (Jean)

Jean is a climbing photographer. He climbed in Korea during his military career. While stationed there, Jean met Dong-il Ryou and was introduced to Korean climbing.

Initiatives
KOTR

KOTR PROVIDES FOREIGN CLIMBERS WITH AN OPPORTUNITY, AS WELL AS AN OUTLET TO CONTRIBUTE AND BECOME A PART OF THE LARGER SOUTH KOREAN CLIMBING COMMUNITY BY PARTICIPATING IN CRAG MAINTENANCE, CLEANUP, ROUTE DEVELOPMENT AND OTHER SUSTAINABILITY PROJECTS HERE IN SOUTH KOREA.

KOTR Initiatives (KOTRi's) mission is to conduct cross-cultural projects that bridge borders and strive to protect the natural environment that inspires our simple, yet profound passion to climb.

If you're interested in becoming a part of KOTRi or simply learning more, please go to www.kotri.org or email Bryan Hylenski at kotrinitatives@gmail.com.
