

Mystery at the Hot Pond

Endorsements * Reviews * Testimonials

“Received the book in the mail early afternoon and finished it before dinner. Hard to put down. Well written by the author and he adds humor and drama in his writings which keeps a person interested in each chapter. He has a unique way of writing a detailed description of a person or situation to give the reader a clear picture in his/her mind of the current happenings. Waiting for the release of the 2nd book in the series.”

“It took one day for my daughter to read this book (she kinda hoarded the Kindle until finished...) Best compliment from her that surprised me, 'I think I would rather read a book like this than

(insert common mystery books here that young girls typically choose from library shelves)

It left her asking for the next in the series.

Others in the family plan to read it (now that the Kindle is freed up...).

I think both boys and girls will enjoy it because there's both a male and also a female main character.”

“This is a super enjoyable family time book as it is interesting, engaging, and well written. All the main characters personalities are well defined and easy to imagine which is makes it even more fun to read. Not many authors do that well. It is wholesome and the message and plot are exciting. Definitely a worthy purchase.”
