*There are 1,300 bird species found
in the Amazon Rainforest.*

*Tropical birds are often brightly
colored.*

Tropical birds are omnivores that eat leaves, fruit, nuts, seeds, and insects. Some tropical birds eat small animals and lizards.

Tropical birds scream and screech
and are very loud.

An aviary is a large home for
birds.

Parrots use their beaks as an additional hand and often climb trees to locate food.

The majority of tropical birds live
in the Canopy Layer of the
Amazon Rainforest.

Songbirds spend their summers in the United States of America and migrate south to the Amazon in the winter.

There are many types of tropical birds that live in the Amazon Rainforest, such as parrots, toucans, macaws, hornbills, and more.

About 50 percent of the animals
and plants on Earth live in the
rainforest.
