# THE IRON LUNG

CUSTOM BUILT BY ICON 1000

She was an accident waiting to happen. 600 pounds of American coke-fired iron riding on weather-checked English rubber. Cracking femurs or rupturing internal organs were her specialties, and she had done both on more than one occasion. The Iron Lung, a 1991 Harley Sportster roadracer, was a vision of what never was, in response to a question that was never asked.

## CHANTILLY™ AIRMADA HELMET

LACE FOR YOUR FACE

Depending on which side of the Atlantic you reside, the word Chantilly can mean numerous things. None of these meanings are particularly masculine or thuggish. Which is precisely why we chose this name for our latest skull-based helmet. It's a dash of high-society class mixed with typical ICON low-brow predilections. Available in a glossy white or matte Rubatone™ black on black to suit your particular savoir-faire.

Available in Gloss White and Rubatone Black // XS-3X \$250

## ***CHANTILLY™ SCARF***

### **VEILED INTENTIONS**

The road can do wonders for one's mind. It can also do a number on one's face. The Chantilly Scarf will have none of it. It's a 30" square of satin luxury to keep your kerosene breath at bay. Other possible uses include the frontal Tupac tie, Hepburn neck wrap, or add a stick and you've got the ultimate hobo carryon. However you decide to use the Chantilly Scarf, always remember—go fast, look flash.

# ***VIGILANTE DROPOUT™ JACKET***

**ALWAYS CHEAT, ALWAYS WIN**

Rarely does a whispered voice carry over the sound of unbaffled exhausts. If you want to be heard at the track, we suggest you shout. The Dropout is just that voice. Chenille embroidered patches, the same style used on letterman jackets, emblazon the chest of the Dropout Jacket. Patched 1000 sleeve graphics are layered into the full-grain leather sleeves. Full D30® impact protectors (elbow, shoulder, back) are included with the jacket, as is the removable insulated SatinCore™ vest liner.

# ICON SPEEDMASTER

CUSTOM BUILT BY ICON 1000

The ICON 1000 Speedmaster is the second collaboration between ICON Motorsports and Triumph North America. Crafted in the ICON garage on the stout chassis of a 2013 Triumph Speedmaster, she was a vertical twin of known repute. While her finned cylinders spoke the refined language of an air-cooled era, the twin fork-mounted nitrous bottles shouted in the most egregious modern slang.

The overall goal of any bike called 'Speedmaster' should be just that. We chose a straightline approach to prove the Speedmaster worthy of her name.

Tuned motor, ram-air intakes, bespoke exhaust and the wet nitrous system perform the lion's share of the go-fast requirements. Period-correct drag slick, swing-arm-mounted battery, and low-slung ergonomics make sure the CG and ETs stay low throughout the entirety of her quarter-mile territory.

## **ODL™ JACKET**

**STAY WARM, LOOK COOL**

One can never be too rich or too handsome or have too many hoodies. If you're looking for something a bit different for this season, then the ODL may be right up your head-covering alley. The ODL, or Ole Dirty Leroy, is a nylon windbreaker shell wrapped over a 160 gram fleece lining, making it all kinds of warm...and cool.

The embroidered applied chest logo says ICON One Thousand the world over.

Now is the time to be rich, handsome, and hooded.

Available in Black // s-3x \$95

## ***STAVANGER™ HOODIE***

### **LAYER UP, NORSKE STYLE**

Stavanger is a fishing community located on the southwestern coast of Norway. Cod, mackerel, and herring can all be found in great abundance in its North Sea fisheries. Along its harbor front are the cafes where the original ICON 1000 ideology and designs were first penned. In homage to our favorite Scandinavian city, we crafted the Stavanger Hoodie. It's a four-button Anorak block with a hidden side-entry zipper. The heathered-finished softshell chassis is perfect for tying up the snekke at the dock, or tying on an overnight drunk in town.

Black ink sleeved across its raw construct shell speaks to the Hard Luck's felonious intent. 13's emblazoned across its flanks sneer politely at the society from which it was ostracized. The Hard Luck will never taste a silver spoon or know the loving embrace of a fat trust fund. It's the helmet for street cowboys looking for anything heavy.

# BUSTED & BROKEN™

The moment when your tires coefficient of friction fails to work in your favor. It is in that instant that good becomes bad, upright becomes laid-down, and factory shine is transformed into shattered and rashed.

Crashing does not discriminate between experienced or newbie. It doesn't care if you're sport, touring, v-twin, or commuter.

If you can accept the inevitability of this occurrence then you've passed the entrance exam into the cult of motorcycling. Dress for the crash is a damned fact. ICON has been promoting this decision since our inception. We build quality gear, with a truly unique flair, designed to take the hit we assure you is coming.

For those who have first hand knowledge of the harsh realities of asphalt, while wearing ICON gear, we have created the Busted & Broken club. A community of brothers and sisters who understand your pain because they've already been through it.

Send us your crash story and receive the Busted and Broken wrist band.

## Navigator™ Collection

### PRODUCT INFORMATION

There was a time, in this fair land, when the railroad did not run. It was not until an international team of laborers, known as navigators, laid the steel rails across the whole of North America that the continent truly came to life.

They carried but a few precious items, kept close to their person, as they moved from station to station.
