

### "Filter 1"

Needs must stem from the child's disability, not just a skill or outcome the district wants to see improved

### "Filter 2"

The "need" must have an adverse impact on daily activities, not just low performance

### "Filter 3"

Need requires specially designed instruction, not just exposure, practice, or maturation

### "Filter 4"

Need must be something that can be acquired within a year of "typical" development
