

## Day 10

Transmission: 34:28

Music - [Daniel Schotsborg - Meta Level Blue 2](#)

Expanding your perceptions shifts the way in which you experience your reality. As Masters of Light having a human experience, our ability to interpret and perceive our daily reality in a new way is the goal of conscious expansion.

It is only through the Divine Vehicle, our super computer of Light and the way the Light can be utilized and experience through this vehicle that our awakening continues.

Being a walking Master of Light in daily routines, interactions and mundane situations is where the real magic begins. Truly being able to navigate and react in accordance with our true Light and nature, in every day reality, allows our whole experience to shift.

Rather than living in a reactive mode of judgement, jealousy and ego, when you are able to receive the Light information behind the illusion which speaks to the truth of the person or situation, your ability to respond in entirely new ways arise.

Many Masters of Light who have walked upon Gaia join us during this activation. Allow their wisdom to assist you with receiving the appropriate information necessary to shift your outer reality to align with your truth.

The upgrades to your physical vehicle continue through this activation. Remember to give thanks and gratitude to those “friends” and colleagues who have gathered to help you move beyond the illusions of the ego.
