

Day 9

Transmission: 31:46

Music - [Daniel Schotsborg - Meta Level Violet 1](#)

We continue upgrading your Divine Vehicle. This activation works with all the organs and glands in your physical body to increase their multi-dimensional functionality. The presence of the Architects of the Divine Vehicle take center stage as the physical and Light body mechanisms move into a higher level of operation.

Your body may feel many physical sensations during this recalibration, so remember to breathe and stay in your heart.

The Divine Mothers and Grandmothers gather to show the most appropriate way for you to access higher streams of Light information. Allow them to provide you with clues, guideposts, symbols or instructions on the most direct and accessible path for your conscious understanding and awareness.

Allow them to take you on a journey of exploration into expanded states of reality. Make sure to ask for your Highest potential and joy to be the guiding force during this experience.

If possible, please write down any information you receive after the end of the activation. Set the intention to remember as much as possible.

Breathe, relax and enjoy.
