

Day 3

Transmission: 27:20

Music: [Chris Deuel – Violet Flame Meditation](#)

We begin once again by coming into the heart and connecting into the zero-point stillness of no time, no space. This prepares the body systems to receive the upgrades and Light flow by slowing down your breath, heart rate, adrenals, etc., to bring you into a deep state of relaxation.

Working with the Architects of the Divine Vehicle, the rewiring of the crown chakra and Light pathways continues. You may sense a large group of Light Beings or energies surrounding you in loving support of this process.

The Light language which comes through is a blessing of your physical system to prepare you for an initiation. The initiation is literally a formal introduction to a new system of Light information. The Light information is streaming from a level of the Buddha Consciousness grids. Breathe and set your intention to receive ALL that is aligned with your highest potential.
