

Day 7

Transmission: 27:14

Music: [Sean Maher – All Together Now](#)

This transmission of Light continues the formation of new Light pathways from the crown chakra up, anchoring into your Solar-star. This begins the interface and access into the streams of Light coming directly from the Great Central Sun.

As this connection is being formed, you are asked to call forth the highest level of your own Divine essence to engage in conscious communication in a format which is the most natural and easy for you to recognize.

The Solar-star interface is a necessary component for accessing new streams of consciousness and information. It provides a smooth transition of the frequencies into your physical vehicle and provides the framework for future upgrades into your physical matrix of Light.

Please scan your body for any places having difficulty integrating the energy. It is recommended to get ample exercise/movement or stretching during this process. Although this is energy work, the body is the vehicle which embodies the changes and upgrades. Extra care is required to ensure a smooth and graceful integration of this work.
