

DOMINICA

JUNE 27 – JULY 4, 2026

Ft. Young Hotel

Caribbean's Nature Island

Dominica, known as "Caribbean's Nature Island," features 170 species of birds, natural thermal spas, 365 rivers, dramatic waterfalls, well preserved colonial architecture and, of course, world class diving. Dominica's reefs are made of up volcanic formations of ledges, crevices and swim-throughs. These formations give refuge to a myriad of small critters including seahorses, frogfish and batfish. First built in 1699, the Fort Young has been at the heart of the island's story for several hundred years. All rooms feature air-conditioning, cable TV, mini fridges, internet and a terraced or balcony.

Package Includes
