

FakeBook Alert Plugin

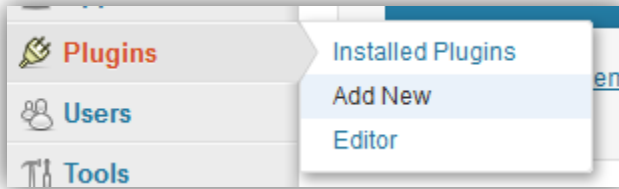

Manual Guide

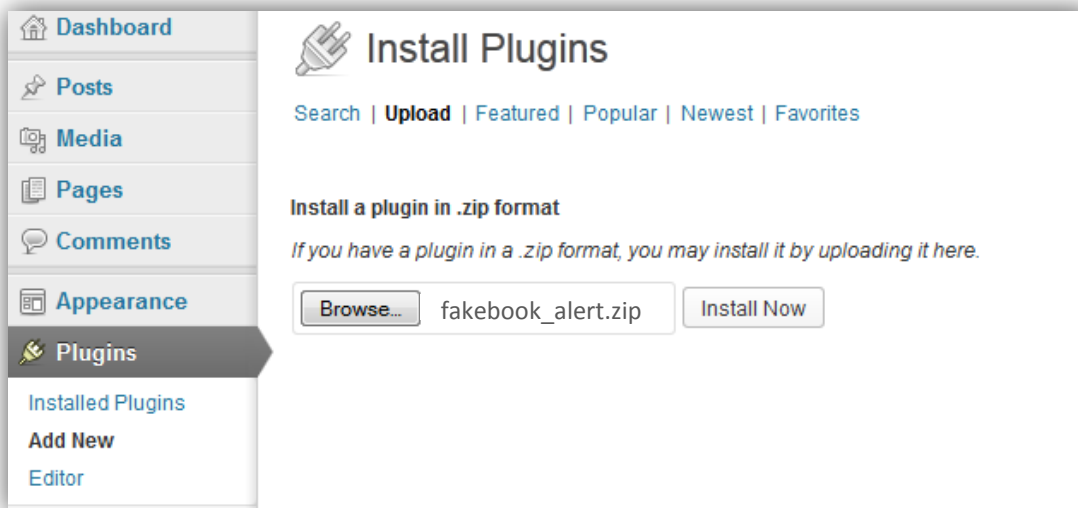

INSTALLATION

Fakebook Alert is like other wordpress plugin. There are no different steps on how to install it into your wordpress site. Follow these steps to continue

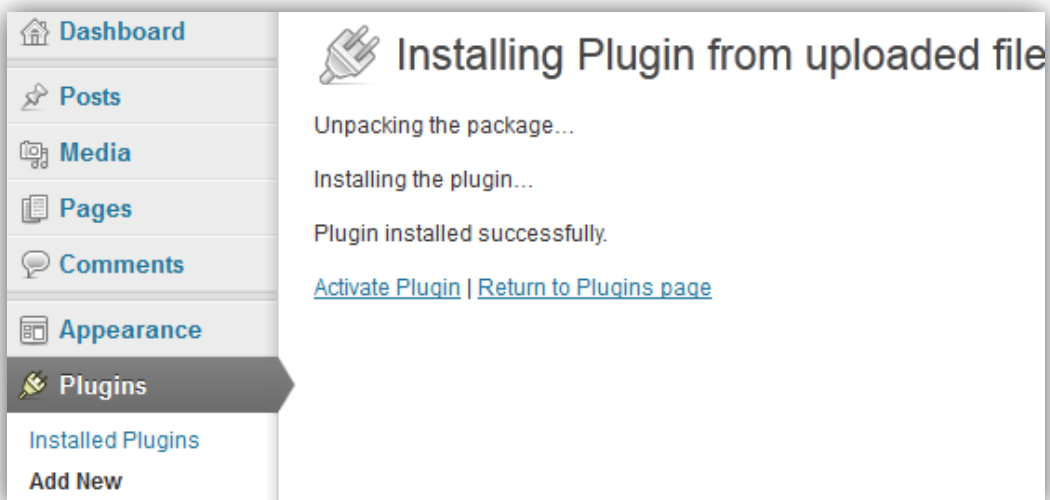

1. Logi to your WP Dashboard (domain.com/wp-admin)
2. Go to Plugins >> Add New >> Upload

3. Browse where you place the downloaded plugin

4. Click on Install Now, then activate plugin

PLUGIN CONFIGURATION

Here is how to use plugin panel.. It's so easy to use

1. Login to your dashboard >> Fakebook Alert

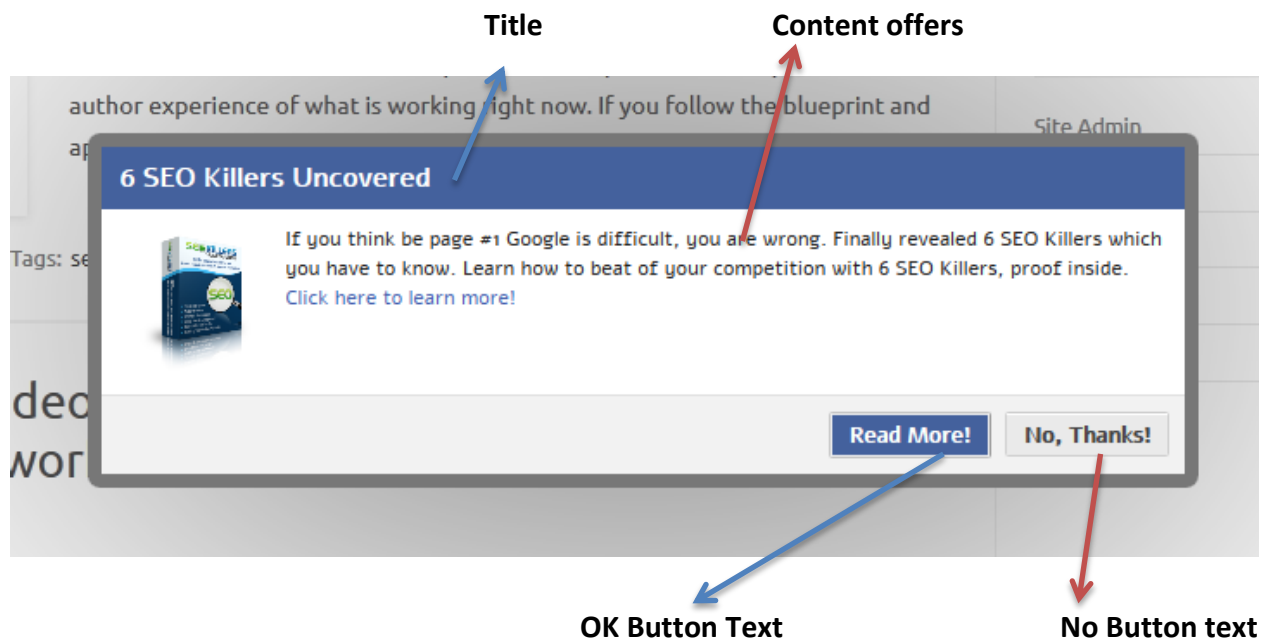

The screenshot shows the WordPress dashboard with the 'FakeBook Alert Demo' header. The left sidebar contains navigation links: Dashboard, Posts, Media, Pages, Comments, FakeBook, Appearance, Plugins, Users, Tools, Settings, and Fakebook Alert (which is highlighted). Below the sidebar is a 'Collapse menu' button. The main content area is titled 'Fakebook Alert Settings' and features an orange 'General Option' header. The settings are organized into a table with two columns: the setting name and its value. The settings include 'Show Alert After (seconds)' set to 5, 'OK Button Text' set to 'Read More!', 'NO Button Text' set to 'No, Thanks!', and five 'Show on' options (homepage, Single post, Page, Archive page) all set to 'Yes'. The 'Theme already included javascript' option is set to 'No'. A blue 'Save Changes' button is located at the bottom of the settings area.

General Option	
Show Alert After (seconds)	5
OK Button Text	Read More!
NO Button Text	No, Thanks!
Show on homepage	Yes
Show on Single post	Yes
Show on Page	Yes
Show on Archive page	Yes
Theme already included javascript	No
