

Operational Technology (OT) Cybersecurity Reinforcements

“One of the main cyber-risks is to think they don’t exist. The other is to try to treat all potential risks.”

- Stephane Nappo

Our Strategy

Reinforcements are here. Interstates can help align current site controls with industry leading cybersecurity practices to achieve a solid cybersecurity defense within an operational technology (OT) environment. We offer superior OT Cybersecurity Reinforcements thorough audits, risk assessments, formal policy and plan development. Our team will work alongside you to ensure your operations run safely and efficiently while protecting the integrity of your brand.

With a multitude of cybersecurity related issues in the world, it is crucial to have adequate protection. Interstates can give you that peace of mind. Our modern cybersecurity strategy will secure your mission-critical assets and data by allowing you to better understand your risks and how to remediate those risks. Additionally, our Cybersecurity Reinforcements services will identify and examine OT cybersecurity controls and tailor them to your specific environment. This ensures security gaps and weakness are immediately identified and remediated.

Services That Keep You Covered

Our unsurpassed Cybersecurity Reinforcements services cover all vital OT control areas with the following:

- Weekly communication
- Operational Cybersecurity Training
- OT Asset Inventory Creation and Maintenance
- Business Impact Assessment
- OT Risk Assessments
- Cybersecurity Policy Development
- Operational Cybersecurity Assessments
- Business Continuity Plan, Disaster Recovery, and Incident Response Plan
- Annual Cybersecurity Roadmaps

Pricing

Fixed monthly cost based on organization size + required travel.
