

Cybersecurity Training Services

"Amateurs hack systems, professionals hack people." - Bruce Schneier

A Powerful Method of Defense

In today's world, we are faced with relentless spam emails, phishing attempts, unsolicited phone calls, and malicious social media posts. Unfortunately, unsuspecting employees inside an organization often fall victim to malicious intents. By exploiting employees within an organization, hackers can easily bypass the most complex and sophisticated cybersecurity technology. Keep your employees and your organization safe with our Cybersecurity Training Services.

Proper cybersecurity training can be a powerful method of defense. Interstates provides customized training and awareness programs based on an employee's role and information they are exposed to within the organization. We offer a variety of training topics and options, each with unique benefits. Upon completion of training, each employee will receive an official Certificate of Completion which will also be reported to management.

Training Topics

- Cybersecurity within the OT Environment
- Cybersecurity Best Practices
- Organizational Security Standards
- Role Training
- Password Security
- Physical Security

Pricing

Fixed cost + required travel.
