

A FRESH LOOK

We are pleased to introduce our new logo!

At the center of the crossroads is Lancaster Theological Seminary, a regional ecumenical center for theological education. Each year more than 1,500 people utilize resources offered by LTS through its multiple programs.

Our name is set in two font styles – one archaic (we have deep roots in traditions of the past) and one modern/contemporary (we are on the cutting edge of theological education). The colors represent our traditional school colors.

The pathways that lead to LTS are open beyond the design's perimeter to suggest the extended region we serve, including denominations with historic ties to LTS and those with an emerging relationship.

The motif is intentionally Trinitarian and a reminder of the fish design – both ancient Christian symbols.
