WORK EXPERIENCE

Technical Program/Product Manager @ Uber Jul 2018 - Present

- Led, from initial M&A activity to a successful public launch, the technical integration of the Cornershop acquisition; drove alignment and development of a brand new grocery delivery feature (unlocking \$1 billion+ annual run rate) involving business, technical, operational, and legal stakeholders across both companies
- Managed multiple product and engineering teams across three continents, in partnership with American Express, to deliver a successful, on-time launch of the Corporate Rewards integration; realized brand synergy to create new growth channel driving \$100m+ in bookings
- Organized execution of a major cross-organizational, business critical Earnings service re-architecture. Owned processes including sprint planning, technical roadmapping, and communications across teams and organizations
- Led a major tooling initiative on behalf of Uber's engineering organization, including ownership of timeline, gathering cross-functional companywide feedback, relationship management with external sales teams, and driving alignment with senior leadership
- Authored and maintained an internal task syncing service in Node.js utilized by 50+ teams

Senior Software Engineer @ Poynt Sep 2015 - Jun 2018

- Designed and implemented multiple business-critical terminal and desktop apps used by hundreds of thousands of merchants worldwide
- Developed business-critical tooling for merchant, reseller, and developers in Ember.js and Vue.js, building to address the needs of a diverse set of stakeholders in the B2B and financial industries
- Created an internal testing platform to aid in visualization and automation of regression testing

Product Engineer Intern @ Squarespace Jun 2015 - Sep 2015

- Used React to develop components for Squarespace e-commerce merchants
- Worked closely with product and design stakeholders to develop an intuitive inventory management system

Software Development Engineer Intern @ Microsoft Jun 2014 - Sep 2014

- Designed and wrote a search module for Bing and Cortana
- Created discography section for celebrity musician pages on MSN Entertainment
