

Before you begin, you'll want to gather the following:

- Piece of white paper or this template page
- Black marker or Sharpie
- Camera or scanner

Step 1: Write your custom message with the black marker on white paper. Try to keep it under 20 characters. For best results, keep your paper free of smudge and ink blots. Avoid large swirls, scrolls, or extra lines on your text. If using a template sheet, stay within the indicated lines.

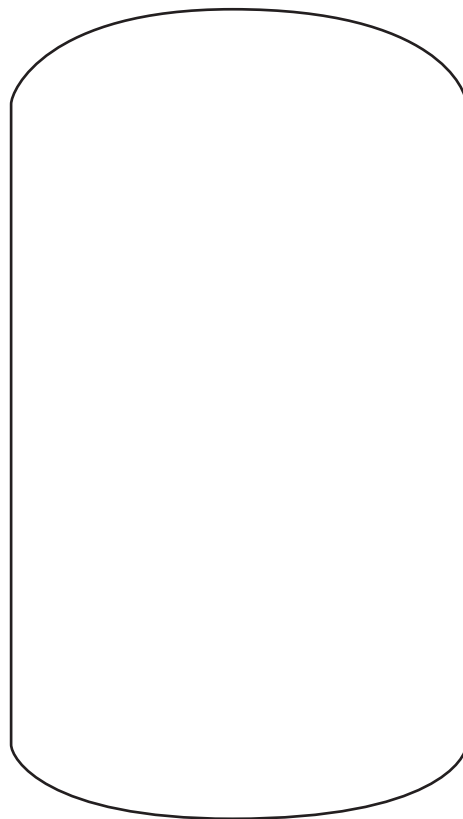

Step 2: Lay the paper on a flat surface, such as a table, desk, or counter top. Natural lighting from a window is ideal.

Step 3: Position your camera (can be a phone camera or from a traditional point and shoot), directly above the paper. Take the photo so the handwriting or artwork is as big as possible in the frame without becoming blurry.

Step 4: Upload the photo directly onto the product page where it says "Upload." Your max file size should be no bigger than 500KB.

Step 5: In the designated text field on the product page, type out your message as you wrote it. This will ensure spelling accuracy for our engravers.

Step 6: Proceed through the checkout process.
