

How to use your Custom Registration URL to Help Parishioners Register for FORMED

Never share a difficult-to-remember FORMED Parish Code again! Instead, use a simple Custom Registration URL to help parishioners register for FORMED in one easy step.

A Custom Registration URL is a simple website link that the Admin of your FORMED account can create. You can use your current parish website address to help you choose a Custom Registration URL, as in the example below, but this is not necessary.

Example

Parish Website: www.stmarys.com

FORMED Custom Registration URL: stmarys.formed.org

If you have not yet created a Custom Registration URL, go to leaders.formed.org and click "FORMED Tutorials" on the sidebar to watch a tutorial on how to create it.

Once you have a Custom URL, simply share the URL with users to type into their web browser. When users who are not logged-in go to this URL, they will be prompted to a simple, one-step registration process. Any logged-in users who use your Custom URL will be taken directly to formed.org.
