Herring School

As part of HerringFest 2020, Conservancy Hornby Island brought together a group of Scientists, Conservationists, and Artists to discuss this year's theme, "Herring, Salmon, and Orca, and the Salish Sea."

We are pleased to share these videos with you to further your education, spur your curiosity, and send to friends, family, and colleagues.

We encourage you to [make a donation](#) of \$5 to help us further our conservation and education efforts.

Thanks, and enjoy!

CHI HERRING SCHOOL 2020 - DANIEL PAULY

CONSERVANCY HORNBY ISLAND PRESENTS:

HERRING SCHOOL 2020

WITH DR. DANIEL PAULY

DR. DANIEL PAULY: How fisheries and global warming impact the marine ecosystems in the world and in B.C.

Daniel Pauly is a French-born marine biologist, well known for his work in studying human impacts on global fisheries. He is the world's leading fisheries scientist, a professor and the project leader of the Sea Around Us Project at the UBC Institute for the Oceans and Fisheries at the University of British Columbia. His work has been profiled in outlets such as Science, Nature, and the New York Times, and he has been recognized with numerous awards, including a fellowship with the Royal Society of Canada. His new book, *Vanishing Fish: "Shifting Baselines"* and the "Future of Global Fisheries" offers a thought-provoking look at the state of today's global fisheries—and a radical way to turn it around
