The BBVA Foundation has recognized three marine biologists — Carlos Duarte, Terence Hughes, and Daniel Pauly — with the Frontiers of Knowledge Award in the category of Ecology and Conservation Biology. Their research has expanded our knowledge about the Earth...

Finally, Daniel Pauly has used computer-based tools to document the decline of global fish populations, thus disclosing the grave loss of marine diversity. Said tools include the online encyclopedia FishBase, a database created in 1990 with data on over 35,00... [+1215 chars]
