

In this episode, we speak with Dr. Daniel Pauly, an award-winning marine biologist at the University of British Columbia. Dr. Pauly speaks with us about his new book, *Vanishing Fish: Shifting Baselines and the Future of Global Fisheries*, which examines the world's reserves of fish, commercial fisheries, and the various crises they both face.

PLEASE NOTE: Minutes 1:35-4:35 are low-quality audio (but don't worry, it gets better).
