

# Legendary Strength.

## Legend .100 Gauge Hull

While most aluminum boat companies use .058 to .090 gauge thickness on comparable models, our .100 gauge hulls are up to 73% thicker! With a super-thick .100 Gauge seamless hull bottom, your Legend boat will last longer with no potential for centre-seam leaks. While our .100 Gauge hulls provide unmatched thickness, our use of 5052 H34 cold-rolled aluminum provides the best combination of flexibility and strength.

## All-Welded Series Construction

### All-Welded Series Transferable Warranty

Every Legend All Welded Series model carries our industry leading Leakproof for Life Warranty. It is remarkably simple: it covers the entire structure of the hull against leaks through the hull for as long as you own the boat.

See page 62 for details.

### Intelliflex Hull Construction

Flexes and adapts to the water by dissipating energy from waves evenly throughout the hull, eliminating any chance of problem areas developing over time.

### Solid Locking Extrusions

Hold each thick hull piece into a solid center for unmatched durability. The center extrusion is over one inch thick providing an extremely solid 1,054 gauge impact zone. This means over 5 times the protection of double plated hulls.

### Interlocking Bow Ribbs

Overlap the front torsion system, eliminating a common weak point on most other aluminum boats.

### Reverse Angled Chines

Are bottom side edges that angle downward to create lift in the back for faster planing and increased stability.

### Thick Lifetime Decking

With a Lifetime Warranty against rotting or warping and delamination. A thicker floor with 7 individually treated layers means a stronger boat.

### Torsion Beam Energy Transfer System

Provides your boat with necessary flexing, while remaining light and strong.
