

The NMMA Certified label on a Legend boat is your proof that it meets, and often exceeds, the industry's strictest quality and safety standards.

## H34 PerfectFlex

Legend's H34 PerfectFlex aluminum has the perfect balance of strength and flexibility. Although H36 is harder, it is also more brittle. Its strength is reduced by over 80% when stressed during manufacturing or when flexed on the water. In fact, when stressed, H34 PerfectFlex is tested to be more than 2.5 times stronger than H36, making it the ultimate hardness for .100 gauge aluminum boat manufacturing.

Strength Under Pressure (PSI's)

H34 aluminum is tested to be more than 2.5 times stronger than H36, making it the ultimate hardness for aluminum boat manufacturing.

## R-Series Construction

### R-Series Transferable Warranty

Each R-Series Riveted model has a Lifetime main seam hull warranty and an amazing 10 year warranty on most other hull components.

See page 62 for details.

### Side-Facing Rivet Line with Lifetime Warranty

Reduces exposure to side seam stress in comparison to a bottom-facing rivet line.

### Full-Length Molded Splash Rail

Deflects water away from the boat interior, providing a dry, comfortable ride. Fishing lines are able to slide along the hull edge smoothly where this rail is riveted on.

### Full-Length Deep-V Hull with Squared Chines

Provides a smooth and comfortable ride while keeping the hull stable so you can move around without it feeling tippy.

### Internal Lateral Support Ribs Spaced 9" Apart

Gives you more ribs closer together creating greater support and strength.

### Thick Lifetime Decking

With 7 layers, each individually treated, we can offer a Lifetime Warranty against rotting or warping.

### Reinforcing Bow Ribs Attached to Transverse Rib

Are reinforced with .100 gauge aluminum that eliminates a common weak area found in the front of most boats.

### Lap-Straked Side Walls

Full-length ridges pressed into the sidewall reduce flex and make for a stronger and sturdier boat.

### Injected and Level Foam Floatation

Provides a stronger, quieter and safer boat. If filled with water, the boat will not flip or sink, even when loaded to capacity.

### Extra-Wide EZ-Grip Gunnel

Makes holding the boat while getting in or out very easy and increases the overall strength of the hull.

### 3 External Keels

Provide stability, solid cornering and car-bumper-like protection from underwater obstacles.
