Q-Series LE, Q-Series And V-Series Construction

Wave-Slicing Wide Nose Cones

The wide nose cones deflect spray keeping you dry on the water, while the lifting fins provide the ultimate performance for a smooth ride every time.

Thick Lifetime Decking

A thicker floor means a stronger pontoon. With 7 layers, each individually treated, we can offer a Lifetime Warranty against rotting. Each seam is sealed with LockOut sealing adhesive and is lined up over a cross member for exceptional dryness.

Suspension Seating

This unique suspension seating is made up of a multi-directional stretch substructure backing, an added adhesive layer, followed by a heavy marine grade Matrix vinyl making up for a 50-ounce total vinyl covering, giving your passengers a smoother ride every time.

Thick 40 Gauge Quiet and Raised Fences

All thick .40 gauge fence panels are installed with anti-vibration foam to keep them quiet. They are installed with 3/8" risers to provide water runoff and exceptional ventilation.

Robust Construction

This solid frame construction includes a double bolted transom, double solid full risers that are all connected together with double bolted .190 U-bar crossbeams on 2 tube pontoon models or .125 Hat channel crossbeams on 3 Tube pontoon models. We use .250 gauge U-bars at the bow and stern for unbeatable strength.

Stainless Steel Fasteners

Stainless steel fasteners are used to attach the decking to the substructure. These provide a far stronger hold than pop rivets for years of problem free boating.

Triple-protected Tube Design

Our pontoons are divided into three separate compartments and sealed, making them air tight even in the event of a puncture. If the air can't get out, water can't get in.

EZ-Drain Tubes

Each section of the tubes are connected to one another by a small channel that allows any condensation to drain completely to the back of the tube and out of our Sure-Lock threaded drain plug.

EZ-Flow Ventilation

The aluminum seat frames have external and internal air flow that dries out the seat compartments while underway or at the dock.

Thick Side Protector Keel (3-Tube Models Only)

Our thick side protector keels on the nose cones provide great protection against accidental side impacts at the dock.
