All Eyes on the World Cup

Soccer fans around the globe are gearing up to watch the sport's biggest event, the FIFA World Cup. The monthlong tournament kicks off in Russia on June 14, with the championship game on July 15. The World Cup takes place every four years. Qualifying games are held in the three years prior to determine which teams play in the finals. Out of more than 200 FIFA teams, only 32 make it to the World Cup – 31 qualifiers plus the host country's team, which automatically earns a spot. This year, 64 elimination matches will be played in 11 Russian cities, with Moscow hosting the tournament's first and final games. Due to soccer's global popularity, the World Cup is one of the most widely viewed sporting events. More than 3 billion people tune in for the games. Since the World Cup was first held in 1930, Brazil has the most championship wins, with five titles. Germany is the current defending champion, having won the 2014 tournament.

Essential Exercise Types

Exercising regularly provides an abundance of health benefits, and varying activities is the key when it comes to physical fitness. Here are four types of exercise that experts say should be part of a well-rounded routine. Be sure to consult a doctor before starting a new exercise program.

Endurance: Also called cardiovascular or aerobic exercise, these activities target the heart, lungs and circulatory system by increasing your heart rate and breathing. Walking, dancing and swimming are examples of endurance exercises.

Strength: Muscle mass often declines with age, and strength training builds it back. This type of exercise makes you stronger, relieves joint pain and improves balance. Common forms of strength training include lifting weights, using resistance bands and doing arm curls and leg lifts.

Balance: Maintaining good balance is essential to preventing falls. Balance exercises often focus on the lower body. Tai chi, standing on one foot, and walking heel to toe in a straight line can improve balance.

Flexibility: Movements that stretch your muscles help you stay flexible and limber, making it easier to perform everyday activities, such as bending to tie your shoes. Stretching exercises and yoga improve flexibility.
