

FOR IMMEDIATE RELEASE

ASPIRE FINANCIAL TECHNOLOGIES ANNOUNCES THE RELEASE OF A NEW SUITE OF ANALYTICS AND FORECASTING TOOLS FOR THE ASPIRE GATEWAY™ PLATFORM, AT LENDIT USA CONFERENCE.

New York, NY, March 6, 2017– Toronto-based technology company [Aspire Financial Technologies](#) announced today at [LendIt USA](#), the release of a new suite of analytics and forecasting features for the Aspire Gateway™ platform, adding to its already impressive set of data, analytics, reporting and risk tools available to Originators, Investors and Banks in the consumer or small-business lending markets.

The new Virtual Portfolio tool will enable users to create and view multiple “what if” scenarios on existing or hypothetical loan portfolios, back-test a user-configured portfolio algorithm and create multiple benchmarks for tracking performance of their own portfolio on a go-forward basis. The new Forecasting tools enable users to take an existing or Virtual Portfolio, choose a set of performance curves based on a wide range of potential scenarios, and run these through a cash-flow engine to derive forecasted portfolio performance and run-off, across any loan from Aspire’s data partners, which includes Lending Club*, Marlette Funding, Prosper, and Progressa.

“We are excited to be releasing the Virtual Portfolio and Forecasting features on the Aspire Gateway at this year’s LendIt conference. These tools provide Investors, Originators and Banks involved in consumer or small business lending, with scalable high-powered data, analytics, reporting and risk solutions, wrapped in a 21st century cloud-based application”, said Aspire CEO and Co-Founder David Fry. “The combination of these new tools with our integrated technology that connects lending participants through a single portal, really sets Aspire apart from others, and provides users with a fully integrated, holistic solution for accessing, unlocking and empowering lending data on more than 2 million loans (equivalent to \$28+ billion in volume) and 30+ million transactions.”

Earlier this year, Aspire released a “Demo Sandbox” environment of the Aspire Gateway to a select group of banks and hedge funds, allowing them to explore firsthand the unparalleled integrated analytical capabilities of Gateway. “Thus far we’ve had great feedback from our Demo Sandbox users, and with this new release, we plan to invite a wider range of prospective Originators, Investors, and Banks to try out our platform” says David.

About Aspire

Aspire is a Toronto-based financial technology company focused on accessing, unlocking and empowering lending data through advanced data and technology solutions. Led by Co-Founders David Fry and Mark Lecker, the Aspire team is comprised of highly skilled and experienced financial services experts and software engineering talent. Aspire’s inaugural product, the Aspire Gateway platform, provides high-powered data, analytics, reporting and risk infrastructure to Originators, Investors and Banks in the lending arena. Aspire aims to significantly reduce costs and increase efficiency for these user groups using a robust 21st century technology stack. Aspire will be exhibiting this week at LendIt booth #464.
