Infinity ELS Launches ECLIPSE Lending Suite

SPARKS, Nevada — Feb 25, 2017 — This year, Infinity launched the next phase of their evolution: Infinity ECLIPSE. This brand-new platform came as the result of a sixteen-year journey—in answer to feedback, ideas, and solutions from and for hundreds of lenders.

The following is an overview of how ECLIPSE can lift your lending business to the next level.

User-Friendly Interface

In 2014, Google presented a new interface language called Material Design which revolutionized the software industry. It's an intuitive system that uses "quantum paper" to give meaning to each shape and section of the digital world. More importantly, Google open-sourced Material Design, giving access to top developers across the world. And it has become a fundamental part of Infinity ECLIPSE.

Upon loading ECLIPSE, you'll immediately notice a polished interface unlike any you'll see among competitors. It's simple, straightforward, and well organized. This makes it easier for lenders and CSRs to complete tasks within the software. In short, this intuitive interface means higher productivity across the board.

This design infrastructure is also scalable, meaning it's mobile and tablet friendly. So you, your employees, and your customers can gain access anywhere, anytime, on any device.

Data that Works for You

"Big data" has become a catchphrase because of its fundamental role in many of the top tech companies. Basically, the more you know, the better decisions you can make. So ECLIPSE is designed to keep you up to date on everything that matters.

Customizable dashboards immediately show you the data that's most important—whether you're a CEO or a CSR. They also let you take actions on this data, streamlining your workflow so you can finish quickly. You'll also see real-time notifications at the top-right corner of every screen. These facilitate customer communication, so you can address questions as soon as possible.

The analytics portion of ECLIPSE tracks performance in real time. It gives you easy access to past data, which is handy for compiling reports and building accurate trajectories. Time-saving accounting and GL reports are ready to go without any fuss, and you can export them to CSV, TXT, or IFF. Advanced users can get access to customize reports of all kinds. ECLIPSE also has an innovative business-rules engine built into it, which lets your workflows run almost automatically.

Security for Peace of Mind

Digital theft is a rising problem, one that can cause both trouble and worries. ECLIPSE is designed to put these to rest. With cutting edge encryption and data protection, ECLIPSE keeps your confidential information safe. And it's PCI compliant.

ECLIPSE also provides a complete audit trail and tracks all data modification. That way, on the off chance that someone does something they shouldn't have, a detailed record is available of who did what and when. This ensures all your bases are covered.

The platform is also customizable. ECLIPSE gives lenders more control over their loan documents. And it's built on an entirely new codebase, which reduces development times. This new advanced architecture allows for quicker functionality updates than any other LMS system. And when an update happens, a change management program tests it in a replicated environment, virtually eliminating production bugs.

ECLIPSE also includes an API for connecting other financial software to it. And if your team wants to make intricate customer sites, it also has an API for that, providing you flexibility, mobile responsiveness, and complete customization.

Delightful Details

Infinity's ECLIPSE platform is designed to make your job easier, increasing your bottom line and saving you time. This is most prominent in some of the smaller details—the finishing touches, the icing on the cake.

One of these is the integrated CloudSign feature. CloudSign lets your customers sign documents digitally, anywhere and anytime, which opens up a major bottleneck in many lending pipelines. It's amazingly simple yet secure.

ECLIPSE also includes over 67 integrated services. These help with messaging, payments, and everything else. For example, you can integrate with Quickbooks to get a comprehensive look into your company's finances.

As founder and CEO Chris Leyva said, "To increase profitability, Lenders want to do more with fewer people in less time. That's exactly what ECLIPSE makes possible."
