Validis to Exhibit at LendIt USA 2017

For Immediate Release/ Embargoed February 5, 2017

Austin, Texas - The Validis team is delighted to be exhibiting and performing a live demo at the world's biggest show in lending and fintech: LendIt USA 2017. The event brings together over 5000+ industry executives, and we would love to have you attend and join us at the event. While you are at the conference, please drop by **booth #256** to find out how Validis enables lenders to loan more money, faster, while reducing losses and yielding higher returns.

Validis provides value added solutions that resolve many commercial lending industry pain points associated with data access for both borrowers and lenders. Our software enables lenders to reduce customer onboarding times and increase their lending rates, while borrowers - with very little effort required - receive fast and fair responses to their funding applications. *Unlike other fintech products on the market, Validis can be tailored for different uses within different lending products such as Revolving Credit Facility, Term Loans, Invoice Finance and Leasing. It provides Lenders with the unique ability to receive pre analyzed financial reports with the ability to drill down to transactional level detail in Ledgers as well as offer immediate view on liquidity history and reconciliation.*

Our lending clients have been wowed by the benefits Validis provides. **Loan originators** are reporting less time on-boarding clients, access to real-time, full transactional data, an improved borrower experience, as well as automatic trend analysis and interpretation of data. **Risk managers** are benefiting from reliable and detailed management information (MI), ability to make quicker, more informed decisions, and quick and easy covenant checking. Finally, **operations teams** are enjoying the ability to covenant test and monitor quickly and regularly, MI and reporting standardization for audits, and the ability to feed information to backend systems.

About Validis

Validis cloud-based software extracts and standardizes financial data directly from SMB accounting applications and sends that data to the lender. Our unique intelligence includes data mapping and classification technology that automatically delivers the financial data to our clients in the form of standardized reports. Validis connects to over 70% of the SMB accounting software market and features deep data capture: double-entry level information. Validis software provides value-added benefits to the clients we serve including: time and cost savings, platform simplicity, bank-grade security, transactional detail level sophistication, data extraction and transmission speed, and report standardization. Our team is focused on service excellence and ongoing innovation to stay ahead of the fintech industry and provide our clients with tomorrow's technology, today.

Validis LLC is a proud member of the Information Technology Alliance (ITA), an independent membership association of some of the most highly experienced mid-market technology professionals, consultants, and product/service providers in North America. The ITA fosters a collaborative community in which members share information, learn best practices, improve their service capabilities, and build relationships that improve the way they, and their clients, do business.
