

PHOTO REDUX

Episode 06

- FREE Adobe Lightroom Preset
- Follow-along Photo Download
- Detailed Tutorial Video

Thank you for joining Inbox Inspiration! You being a part of this program means a lot to me and offering free stuff—like these downloads—is my way of saying THANKS for being here! But, just in case you got this download somewhere else, you can still join Inbox Inspiration for free by clicking the button below. I'd also love it if you subscribed to my YouTube channel, as that's where I share all of my tutorial and product review videos. There's a button below for that, too. :)

ADOBE LIGHTROOM

Preset Installation Instructions

1. First, download your preset and unzip/extract the file.
2. Next, in Lightroom, go to the Develop module (click on Develop from the Module Selector on the top right or press 'D').
3. In the "Presets" panel on the left, select or create a new folder where you'd like to place your new preset and give it a name. (To create a new folder, right-click anywhere within the Presets pane and choose "New Folder".)
4. Right-click on the folder and select "Import...".
5. Navigate to the new preset folder, highlight all files under the Lightroom Presets folder and click the IMPORT button in the window. Your new presets will now appear inside of Lightroom.

ADOBE LIGHTROOM

Applying a Lightroom preset To Your Photo

1. In Lightroom, select an image you would like to work on so that you can view it in the preview window.
2. Press 'D' on your keyboard to enter the Develop module.
3. On the lefthand column, make sure that the Presets pane is expanded.
4. Locate the folder that you imported your Preset Pack into and click on the disclosure triangle to reveal all of the presets.
5. Finally, click on any listed preset. The preset will then be applied to your image.
6. You can further refine the look of the preset by using the Develop tools on the righthand column.
