

# Sandy Forster W.W.W.

**No it's not her URL –  
successful author  
& prosperity coach,  
Sandy Forster is a  
Wildly Wealthy Woman!!**

She was once \$100 000 in debt, yet she has turned her life around to generate earnings of over \$1million in just a year. Now Sandy Forster loves to share her secrets through live tele-classes, workshops, seminars and her recently published book, “How To Be Wildly Wealthy FAST!” Although she shows women how to be profitable in real estate investment, her primary focus is in teaching that the power of the mind creates your reality, be it good, bad, or a complete disaster. Changing your attitude can make all the difference. This mindset is a powerful tool in MLM.

Sandy says the laws of the universe will always bring us what we deserve. And, she believes that the more people you help to achieve wealth, the more wealth you will create in your own life. In fact, she claims it will come back to you ten-fold.

“Within network marketing if you’re helping people within your group to become successful the natural progression is that you will become successful. Many network marketing leaders have bought my new book in bulk to give to their groups because the message is so simple to understand, so simple to apply and makes such a huge difference in their lives and in their networking businesses”.

Sandy says that some of the big pitfalls of network marketing are that people working in the industry tend to make a lot of money and quite often they don’t know how to handle it and consequently they spend it, or invest it unwisely and lose it. Or, they just don’t seem to make enough money to live off. It may be their only source of income and they’re continually struggling. Through her millionaire mindset techniques and practical

advice Sandy’s company [www.wildlywealthywomen.com](http://www.wildlywealthywomen.com) teaches women how to make the most of their financial situation through property investing and multiple streams of income, whether they have no money, a little or a lot.

“In all cases we are teaching them long-term wealth creation. And, naturally, the networking they can do within the program is also highly beneficial.”

Forster says she has learned her craft from a variety of sources. She is a self-confessed learning junkie and an avid reader. However some sources have obviously made a bigger impression than others.

“When I started to study the teachings of Abraham Hicks, that’s when I truly began to understand the simplicity of it – that what you think about, what you focus on, what you talk about, becomes the seeds for what

will be your future. So if you change your thoughts and your conversation to what you do want to see in your life, then your whole future will change. The first time I listened to his message it just felt right. It was so simple and made so much sense to me", she said.

Sandy says that although she has a great hit rate most of the time, naturally, not all people are so open to her ideas as others.

"Most people that come to listen to me are drawn to this kind of information and are generally open minded. They take on board what I say and then make changes to their life. Having said that, I've spoken at events where people weren't coming to specifically hear what I had to say, but listened, took it on board and later said to me that when they first heard me they were sceptical. And yet the reason they often come up to tell me this is that even though they were sceptics, they tried out what I suggested and the results in their life were so amazing, they now know it works".

"Then there are others where it doesn't matter how much you tell them, and how much you try and explain it, they will think the way they want to think, and keep getting the same results they've always got.

Forster says however there will come a point in the sceptics lives where they will see people creating success and wealth as a result of what she has taught them that will cause the sceptics to think again.

"My Dad has to be one of the biggest sceptics there is. I teach that what you focus on is what you create, so in the sun visor of my car I have a \$100 note. Every time I see it, I pull it down, kiss it, say 'I love money, and money loves me!' and then I put it back again. Because of this and other techniques I teach in my book, money just naturally flows into my life. But in my father's car I noticed recently he had a speeding ticket tucked behind his visor! When I started saying, 'Dad, what are you doing? If you look at it you're going to attract another speeding ticket into your life,' and he said 'Don't tell me that 'wildly

wealthy' nonsense. I'm too old for that."

Yet when I next went for a ride in his car, I noticed it was gone. I didn't say anything but he noticed that I noticed and said "Mum made me do it".

Perhaps the biggest surprise of Sandy's teachings is that you don't need to have a lot of money to get started. In fact she says it is possible to start from scratch ie zilch.

"You can start with anything including nothing. There's many strategies that you can use that take very little or none of your own money whatsoever," says Forster.

"Having said that, it's obviously going to be an easier road if you have equity in your own house, or cash to invest, but it's not absolutely necessary."

Although happy to help others however, Sandy only teases if you try to dig too deep for all her trade secrets.

"You will have to do our course to find out more!" **MEM**
