

## DuoJanus Product datasheet

PKG40029

USD39.00

The DuoJanus™ expansion board sits inline between an DuoVero COM and a DuoVero expansion boards, and provides a Serial-over-USB port for accessing the DuoVero COM console.

With a footprint very close to the DuoVero COM (the USB connector sits vertically outside the COM footprint), the DuoJanus board can be used to debug many expansion board settings where a console port on the expansion board has not been configured.

### Product Features

Inter-board connector	
<b>Board-To-Board Connector</b>	2 x 70-pin Hirose DF40 Connectors
Product series	
<b>Product Family</b>	DuoVero
Communications	
<b>USB Console Port</b>	Included

#### Mating connector

- 2 × 70-Pin DF40 Connectors (Female DuoVero Exp.)
- 2 × 70-Pin DF40 Connectors (Male DuoVero COMs)

#### What's included

- 1 × DuoVero Interposer Expansion Board

#### Key component

- 1 × USB Mini-B Jack (Vertical)
