USD25.00

Gumstix Interposer for Intel® Joule™ module

Board-to-board connectors all have a limited life cycle, so Gumstix has provided Interposer boards to allow one Intel® Joule™ module to be reused numerous times without incurring the cost of a mechanical cycle.

This basic board can add an optional expansion EEPROM to one Intel® Joule™ module, and allows in-system test when placed on an expansion board.

Designed by Gumstix in Geppetto
