1997 Alberta Answer Book

The services you need,
the solutions you want,
from the company that's
grown up with Alberta.

It is true that we are changing. We are constantly moving ahead to improve the services we provide. To offer you more choices, better solutions and greater value. We're working to keep you connected with the best the world of technology has to offer. Yet at heart we're still the company that's grown up with Alberta. We're here for you.

Rate	Qty	Rate

Common Phone Problems

Common Phone Problems and how to fix them

TELUS can test your line. In some cases, we won't know what's wrong without sending a repair technician to your home or office. If a technician is dispatched and the trouble is proven past the Network Interface Device (this will include premise wiring, jacks and your equipment), there will be a minimum charge of \$54.00 (subject to change) for this repair visit.

If you locate the problem after placing a trouble report to TELUS Repair, please cancel the trouble report to avoid unnecessary service charges.

No dial tone

The most frequent problem reported by residential customers is no dial tone, and, when the telephone number is called from another telephone the caller gets a busy signal. The cause of the problem may be a receiver off the hook, a cordless telephone with dead batteries, or an answering machine that is not working properly. Before calling TELUS Repair, please perform these steps:

A. If you have had a test jack installed at your location, check the following before you call:

The test jack would most likely be on your electrical panel in the basement or located on the outside of the house.

- ☐ 1. Unplug the connection in the test jack and plug in a basic telephone.
- ☐ 2. Check for dial tone.
- ☐ 3. If dial tone exists on the test jack, but you still have no dial tone inside the premises, the trouble is caused by internal equipment (telephone devices, jacks or inside wiring). Follow section B. or C. whichever applies to you.

- ☐ 4. If there is no dial tone on the test jack, use a different line, and call TELUS Repair to report the trouble.

B. If you have only one telephone set, check the following before you call:

- ☐ 1. Check to ensure the receiver is properly in place.
- ☐ 2. Check your batteries if using a cordless phone.
- ☐ 3. If you have an answering machine, ensure it is properly connected.
- ☐ 4. Unplug the telephone.
- ☐ 5. With the telephone unplugged, call the problem telephone from a friend's house. If you get a busy signal, call TELUS Repair. If you get a ringing signal, the telephone set was likely causing the problem and may need to be repaired or replaced.

C. If you have two or more telephone sets, check the following before you call:

- ☐ 1. Check all telephones to ensure receivers are properly in place.
- ☐ 2. Check your batteries if using a cordless phone.
- ☐ 3. If you have an answering machine, ensure it is properly connected.
- ☐ 4. Unplug each telephone device one at a time. (A telephone device may be a telephone set, cordless telephone, answering machine, computer modem or FAX machine).
- ☐ 5. After unplugging the first telephone device, wait for five minutes, then check the next telephone for a dial tone. Continue to unplug the remaining telephone devices, one at a time, waiting five minutes each time.
- ☐ 6. Still no dial tone? Call TELUS Repair. Should dial tone be returned at any step of this trouble-shooting process, the telephone device that was last unplugged was probably

causing the problem and will need to be repaired or replaced.

Other common problems

Line Interference - If you are experiencing noise, static, crackling or other conversations on your line it may be caused by a cordless telephone. To remedy this, unplug the cordless telephone's base unit completely and, using a basic telephone, check for interference. Call TELUS Repair if you do not own a cordless telephone or if the interference still exists when the base unit is unplugged.

High Pitch Tone - If you experience an intermittent high pitch tone on your line when you answer, it is most likely a fax transmission or a modem. These devices have incorrectly dialed your number. Unplug your telephone for 30 minutes. Please be patient. If you continue to experience this difficulty, please contact TELUS Repair for further assistance.

Fast Steady Dial Tone - If you hear what sounds like a busy signal when you pick up the telephone, you have just received a TELUS TalkMail** service message. All telephone lines in Alberta have the ability to receive TELUS TalkMail service and receiving and listening to the message is a free service. Simply press *98 on your Touch-Tone line or dial 1198 on your rotary dial. For more information on sending and retrieving messages, call the TELUS TalkMail Help Line at 1-800-661-3162.

TELUS Directory Assistance

Use the following numbers to obtain phone numbers for your local area and distant locations:

Local* 411

There is a charge for numbers listed in the White Pages. After you have received the local number, you will be offered the option to complete your call for an additional charge.

403 Area Code* 1+403+555-1212

There is a charge for each number received.

All Other Area Codes* 1+Area Code+555-1212

A charge will apply to all out of province calls to Directory Assistance.

Toll-free Numbers 1+800+555-1212

Requests for these numbers are free of charge.

International Dial '0' for Operator

Requests for all international numbers may have a charge applied. Please check with the Operator.

*Motion and vision impaired customers registered with TELUS will be allowed a specific number of Directory Calls at no charge each month.

How to find a name and number in the Phone Book

Listing by Alphabet

Names are listed alphabetically by:

Surname Smith

Initials Smith A D

or

Given Name

Smith Alfred

Company Name

Smith Arnold

(Canada) Ltd

Smith Aurora B

Looking For a Name

Locate desired page by checking first three letters on the upper outside corner of each page. Locate column by scanning columns across the top. Select the column where the name would likely appear. Locate the name by checking down the column to the name you're looking for.

Letters Used as Names

Letters when used as names are considered as words and are usually spaced and inserted alphabetically, starting with the first letter, unless the letters are together, then they appear as one word.

Example:

A Transport

A A Transport

A A A A Transport

A A B Transport

A A T S Transport

A B Transport

(See beginning of "A")

XYZ Transport

(See "XYZ" as one word)

Hyphens, Numbers and Abbreviated Names

Hyphenated words or letters are inserted alphabetically as two words.

Example:

Mid-Western
(Listed as Mid Western)
Smith-Jones-Black
& Associates
(Listed as Smith Jones
Black & Associates)

Hyphenated surnames and multi-part surnames without hyphens are treated as one word.

Example:

Smith-Jones T
(Sequenced as
Smithjones T)
Van den Brink T
(Sequenced as
Vandenbrink T)

Numbers are sometimes used as names. Check for them as if they are spelled in full:

Example:

66 Restaurant
(Sequenced as
SixtySix Restaurant)

Certain abbreviated words appearing at the front of another word are treated as if spelled in full.

Example:

St. Albert
(Sequenced as
Saint Albert)

Federal and Provincial Listings

Dialing TELUS Long Distance

Area Code

Your area code is 403

This designation includes all of the Province of Alberta, the District of Mackenzie NWT and the Yukon Territory.

Wrong number? Poor connection? Or other calling problems

Hang up right away. Dial '0' and tell your TELUS Operator. The TELUS Operator will attempt to connect the call for you, or arrange for an adjustment

Direct-Dialed Calls (Station to Station)

When you wish to speak to anyone at any seven digit number in Alberta, Canada, the U.S. and the Caribbean:

Dial 1 + Area Code + Number

A minimum message charge may apply

Automated TELUS Long Distance Service

- available throughout Alberta when used with a Touch-Tone phone
- lower transaction fee than operator assisted calling
- when you hear the bong tone, simply follow the applicable instructions provided
- if you need assistance after the bong tone, please stay on the line or dial '0' for an Operator
- if you encounter difficulties when using this service from the U.S., you can now call the North American Toll-free Access Number (Canada Direct from the U.S.): Dial 1-800-555-1111.
- Call-Me[®] service, Calling Card, Collect, Third Number calls can all be placed through this service:

Dial 0 + Area Code + Number

TELUS Operator Assisted Calling

- available throughout Alberta when used with a Touch-Tone phone
- if you need assistance after the bong tone, please stay on the line or dial '0' for an Operator
- transaction charges apply and may be higher than using the automated service where both services are available
- Call-Me service, Calling Card, Collect, Third Number calls can all be placed through this service

- Time and/or Charges and Person to Person calls must be placed through this service. Dial 0 + Area Code + Number

TELUS Calling Card Service

- only 10 numbers may appear on the card as the PIN (4 digits) is not displayed on most cards; however, the PIN number must be entered for the call to be completed
- to make another call: wait for the called party to hang up; then press # sign and enter the next telephone number
- up to 5 calls may be placed without re-keying the card number
- after the last call is placed, hang up the phone receiver to cancel storage of your card number

TELUS Call-Me Service

- this card can only be used to call the number that appears on the card

Types of Long Distance Calls

Person to Person

Charges apply only if the specific person/department is reached.

Collect Calls

Called party agrees to accept the charges.

Third Number

The charges for the call will be billed to another number - the operator will confirm that the charges will be accepted.

Time and/or Charges

The operator will call you back with the duration and cost of your call.

Marine

To communicate with ships, dial '0' and provide the details to the Operator.

**[Dial '0' and ask the
TELUS Operator
for up-to-date
rate information.]**

Other Services

Telecommunications Device for the Deaf (TDD)

TDD to Voice	711
TDD to TDD	1-800-855-1155
Voice to TDD	1-800-855-0511

Applicable long distance rates will be charged at a 50% reduction. This discount applies only to calls within Canada using the TELUS Relay Service. Long distance calling between TDDs also qualifies for the 50% discount only when connected through the TELUS Relay Service.

Rates quoted are subject to change. Goods and Services Tax will apply.

ADVANTAGE™

Telephone numbers beginning with '800' or '888' tells you the call to these numbers is free of charge. If you'd like your customers to contact you Toll-free, order TELUS Advantage™ Toll-free service by calling

1-800-661-1800.

TELUS Advantage Teleconferencing Service

Save time and money by talking with several people in several different locations at the same time. Do it yourself or have the operator assist you. TELUS Advantage™ Teleconferencing offers superior sound quality without special equipment. For more information or to book a Teleconference, please call

1-800-667-8517.

TELUS PLANet Internet service

Information/Ordering/Repair

1-800-773-2121

For local internet access, please check the white pages under TELUS Communications.

TELUS Advantage 900 Service

When calling from other than a pay phone or hotel/motel, you may direct-dial customers who advertise TELUS Advantage™ 900 service numbers. Special charges are applicable for using this service.

TELUS Advantage Videoconferencing Service

Simultaneously see, hear and speak with participants in multiple locations. TELUS Advantage™ Videoconferencing offers professionally staffed facilities for quality face-to-face meetings without the expense and time commitment of travel. Or use our multi-point bridging service with your own private videoconference equipment to connect several locations. For more information or to book a Videoconference, please call

1-800-272-9628.

TELUS General Information

Busy Line Verification/Interruption

A busy condition on a line may be verified by dialing '0' for a TELUS Operator and requesting this service. A \$2.00 charge will apply if the called number is determined to have conversation on the line. The line may also be interrupted by the TELUS Operator upon request, to inform the called party of the waiting call, for a total charge of \$4.25.

Local Calls from Payphones

Local calls placed from payphones may be charged to a TELUS Calling Card, placed collect, or billed to a third number. They can be placed either through the operator, or by using TELUS Automated Long Distance service. Each call is charged a transaction charge, in addition to the regular payphone charge. This service is available throughout Alberta. For more information, please see TELUS Long Distance Calling.

Rural Telephone Service

Call us early - as soon as you start your foundation. Rural lines are installed underground and we need plenty of advance notice so your phone service will be ready when you are. To apply for rural telephone service, call TELUS at 310-2255.

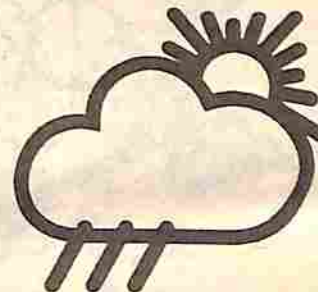

Cable Pedestals

These are located in rural areas, alleys, along highways, on private property, and wherever there are underground telephone services. They're marked with TELUS identification. If one is damaged, disrupted communications can result. If you notice a damaged pedestal, please call our TELUS Repair Service at 611 or call Alberta One-Call at 1-800-242-3447.

Building Industry Consulting Services (BICS)

Owners, developers, architects, engineers, contractors... Prevent delays and hidden costs, and ensure your projects are ready for your tenants to obtain telephone service. Call TELUS Communications in the pre-planning stage for free consultation on network provisioning requirements. For further information, call (403) 382-2530 (please call collect).

Buried Cable Location Service

Before you operate any heavy equipment, or dig in your own backyard, have the underground cables in the vicinity located. Call Alberta One-Call at 1-800-242-3447 at least TWO working days in advance. We will be notified and will locate any cables in the area, at no charge.

TELUS Long Distance charges will apply to calls placed from outside the local calling area.

TELUS International Service

Canada Direct

Canada Direct[†] service eliminates dealing with foreign operators and may reduce hotel surcharges. **To use Canada Direct, you must have obtained the free wallet card.** With the free card, Canada Direct service is available in over 120 countries. Use it to call back to Canada, between two locations within and between some foreign countries with billing to your TELUS Calling Card number, Call-Me service, Hello[‡] Phone Pass and collect calls that terminate in Canada. Some restrictions may apply. Automated Canada Direct Service is now available. You will reach a bilingual Automated system that will validate your Calling Card, Call-Me service, collect or third party billed call (live operators are available by pressing '0'). For more information call

1-800-561-8868.

TELUS Home Country Direct

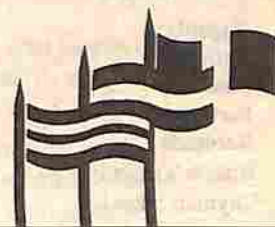

Phoning home from Canada is easy too. The call must be billed to your home country phone card or billed collect (where available). You'll be billed on your return at the operator-assisted rate in effect in your home country, at the time the call was placed. For more information on Home Country Direct service, and the more than 60 countries you can reach, call

1-800-561-8868.

Canada World Calling Service

When living overseas, Canada World** Calling Service helps make it easier than ever to keep in touch with friends and relatives in Canada. This service is available from countries where Canada Direct service is available and provides a Calling Card for billing calls. Calls are billed at our existing overseas rates, which are often cheaper than foreign telephone company rates. You are billed in Canadian Dollars and most calls qualify for a long distance savings plan. Pre-authorized billing is set up, with the telephone bill amount automatically charged to your VISA, Mastercard or American Express Card.

To apply:

Before you leave Canada, call

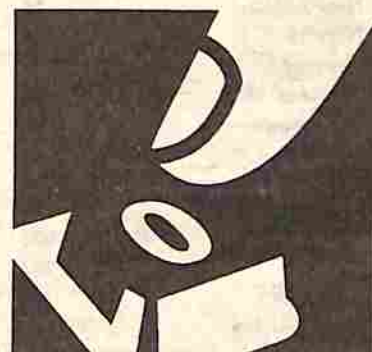

1-800-738-3484

to arrange for non-interrupted telephone service.

If calling from overseas, call

613-781-8080

collect, through Canada Direct

Call the TELUS Operator (Dial '0') if you need:

- a telephone number - charges may apply
- country and city routing codes (limit 3 routing codes per call)
- international rates
- assistance on international calling
- time zone differences
- discount call periods - which vary from country to country

A transaction charge applies to all non-DDD calls. Goods and Services Tax will apply.

Overseas Dialing

International Calling

You can call virtually anywhere in the world on your phone. While most of these calls can be dialed direct, some may require TELUS Operator assistance.

To Dial Direct:

011	+	Country Code (1-3 digits)	+	Routing Code (1-5 digits)	+	Local Number (2-9 digits)
-----	---	------------------------------	---	------------------------------	---	------------------------------

*Automated Special Bill and Operator Assisted Calls

01	+	Country Code (1-3 digits)	+	Routing Code (1-5 digits)	+	Local Number (2-9 digits)
----	---	------------------------------	---	------------------------------	---	------------------------------

*This includes TELUS Calling Card Service, or third number calls billed to another North American number. Transaction charges per call are less than operator assisted transaction charges.

If operator assistance is required for TELUS Calling Card service, collect, third number billing, person to person or time and charge calls, transaction charges may be higher than using the automated service where both services are available.

Points to remember when dialing overseas:

- there are time differences
- it may take up to 45 seconds for an overseas phone to ring
- overseas ringing and busy signals are often different from those in Canada
- rate discounts may apply. Call the TELUS Operator for information
- direct dialing to foreign country directory assistance operators is subject to regular charges

Note: Canada's Country Code is 1 and the Routing Code is the Area Code.

**Dial '0' and ask the TELUS Operator
for up-to-date rate information or
for country codes not listed.**

Telephone Security

Unlawful Telephone Calls

The Criminal Code provides for up to six months in prison or \$2,000 in fines for making obscene or harassing calls, and for a maximum sentence of up to five years for making threatening calls.

TELUS Security co-operates with police in the identification and prosecution of these callers.

We will only release Call Trace information to the police for their investigation.

Call Trace

This service lets you and the police work together to trace unlawful or unwanted calls. If you receive harassing, threatening or obscene calls, activate Call Trace and call the police.

How to trace your last incoming call:

1. Hang up for several seconds, then pick up the telephone hand-set, listen for dial tone, then press *57 on your Touch-Tone phone (1157 on a rotary dial set). A recording will guide you through the steps.
2. Write down the date(s) and time(s) of the call(s), and anything that was heard on the call(s).
3. A recording will instruct you where to report successful traces.

TELUS will only release information to the police to assist their investigation. Call Trace will work even if the call is blocked. No action can be taken based on Call Display or Call Return. Call Trace must be activated. A charge applies for each successful trace. See TELUS SmartTouch[†] services on page 17, or refer to the Alberta Answer Book for more details.

Fraud

It is illegal for anyone to charge TELUS Long Distance calls to another person's telephone number or TELUS Calling Card service number without their permission. Persons placing such calls, or using any device to avoid payment of calls, are subject to prosecution and, if convicted, are subject to fines and/or imprisonment.

Privacy Options

TELUS has a number of privacy options available to protect the rights of our customers and help enhance your privacy. However, as the TELUS network is now capable of displaying your phone number (including unpublished numbers) to the people you call, you may need to change how you think about using your phone. If you require more information about our privacy options, or have any concerns about the privacy of your phone number, call TELUS at

Residential Customers	310-2255
Business Customers	310-3100

Call Display

Using a digital display phone, this service shows you the caller's number before you answer, so you can decide whether or not to take the call. See TELUS SmartTouch services on page 17 or the Alberta Answer Book for more details.

Name Display

Before you answer your digital display phone, you'll see both the name and number of the caller. See TELUS SmartTouch services on page 17 or the Alberta Answer Book for more details.

Call Block

Universal Selective Call Blocking allows you, on a per-call basis, to prevent your name and number from appearing on the display screen of the number you are calling. Each time you wish to block the display of your number, simply dial *67 (dial 1167 on a rotary dial set) and the word "Private" will appear instead of your name and number.

Permanent Name Blocking will display the words "Private Name" and your telephone number on display screens of the numbers you call. Contact TELUS at the telephone numbers listed under Privacy Options for more information.

Identification of TELUS Employees

Every TELUS employee carries a photo identification card. This plastic I.D. card shows our company name, employee's name and photograph. **If in doubt, ask to see this I.D. card - our employees will show it to you without hesitation.**

What to do when you're away from home

A phone off the hook may alert burglars that you are not home! A continuous busy signal is a giveaway.

If you use an answering machine, your message should say that you "can't come to the phone" NOT that you're not at home.

TELUS Calling Card Security

You are responsible for the protection of your TELUS Calling Card.

Do not give your number to anyone, and make sure when you use your card that the number cannot be overheard or seen by anyone nearby. (Unscrupulous persons are notorious for acquiring TELUS Calling Card numbers in public places such as airports, bus terminals, etc.)

If the TELUS Calling Card is lost or stolen, report it immediately to

1-800-561-8888 (24 hours).

The card will be cancelled immediately.

For inquiries or to apply for a card, please call:

Business Customers	310-3100

Home and Office Wiring

Repair of Non-functioning Home or Office Telephone Equipment:

TELUS rental equipment: Call TELUS Repair service.

Customer-owned equipment: If it's still under warranty, return it to the vendor for exchange or repair.

Telephone Wiring for Home or Office

Telephone wiring is the wiring between the point where the telephone line enters your home or building and your telephone or telephone jacks. The home or building owner is responsible for the installation and repair of the telephone inside wiring in the same way as for the electrical inside wiring. Telephone wiring must meet Canadian Electrical Code and TELUS Terminal Attachment standards to ensure user safety and quality voice transmission.

Wiring Options

Our telephone wiring program allows you to choose who will install the wiring inside your home or building. Most residential and single-line business customers have three options for installing telephone wiring and jacks on their premises:

- You can do the work yourself
- You can hire an independent contractor
- You can have TELUS install at current hourly rates

Pre-wiring Your Home

If you are building or renovating your home, have your telephone outlet locations pre-wired before the insulating and dry-walling stages; this will ensure your telephone wiring is concealed. Also, be sure to run a separate electrical wire from the power panel location to each individual telephone outlet location to power your display phone or telephone accessories. Be sure to leave enough excess wire at both ends for doing terminations.

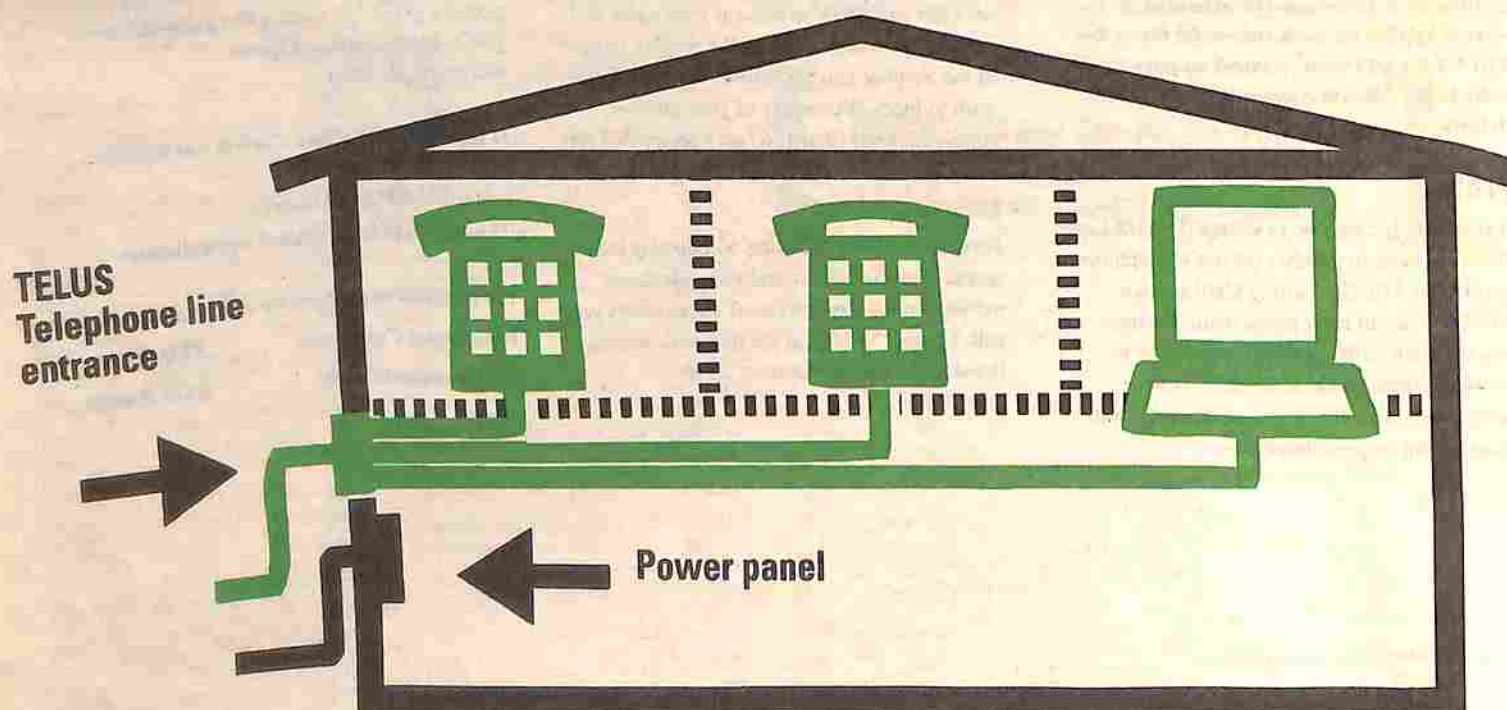

TELUS Communications Inc.

TELUS SmartTouch Services

Call Again

This service is available on all single lines. The cost is only 35¢ per use.

With Call Again, your phone will keep trying a busy number until it's free. Once the line is free, you'll be notified with a special ring and the call will be put through.

To continue trying a busy number

- Listen for dial tone, then dial *66 (1166 on a rotary dial set).
- A recorded message will inform you that Call Again has been activated.
- Call Again will keep trying the last number you dialed for 30 minutes.
- Two attempts to notify you will be made before the request is cancelled.

A special announcement will notify you if:

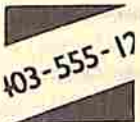

- The free line becomes busy again before you have a chance to get through.
- The number you are calling cannot be reached using Call Again.

If you're on the phone when the requested number becomes free

- Your phone will attempt to signal you for up to 30 minutes.
- If, after 30 minutes, you are still on the phone, your request is cancelled.

To cancel Call Again

- Listen for dial tone, then dial *86 (1186 on a rotary dial set).

Call Display

Call Display shows you your caller's number on your display screen after the first full ring.

"Private Number"

is displayed if the location where the call originates has "blocked" delivery of their telephone number.

"Unknown Number"

is displayed if Call Display is not available in the area where the call originated.

Please note:

- Even though the calling number may be displayed, it may not be set up to receive calls. For example, large corporations may have hundreds of numbers, many of which are used only for their outgoing calls. Calling one of these numbers will likely result in either a fast busy signal or no answer.

- If you're concerned about your number (including non-published numbers) being displayed to people you call, TELUS has a number of privacy options available. Call 310-2255 to discuss them further.
- Due to technical limitations, Call Display service may not be available in all areas.

Name Display

If you already enjoy TELUS Call Display, Name Display takes you one step further. In addition to displaying the number of your caller before you answer, it also displays the caller's name after the first ring.

Universal Selective Call Blocking

On a per-call basis, you can stop your name and number from being displayed. Every time you want to block them from appearing, simply dial *67 (dial 1167 on a rotary set) and the word "Private" will be displayed on the screens of people you call.

Permanent Name Blocking

If you wish to permanently block your name from appearing when you call, you may contact TELUS and have the words "Private Name" displayed on the screens of people you call. Your number will still appear.

Alternate Number Display

You may also choose to have an alternate number displayed, if you have more than one phone number. (This service is not available in all areas.)

Call Forwarding

Call Forwarding sends your calls to a number where you can be reached. This second phone may

be either a local or a Long Distance number, a friend's home, the office, or the cottage. You'll be responsible for any applicable TELUS Long Distance charges.

Please note that with Call Forwarding you can still place calls from the first phone, but you will not receive incoming calls as they are automatically forwarded to the second phone number. A short burst of ringing at your phone will remind you the Call Forwarding feature is activated.

To activate Call Forwarding

- Listen for dial tone, then dial 72# (dial 1172 on a rotary dial set). You'll hear three beeps, then a dial tone.

- Dial the number of the phone to which you want your calls forwarded. (For Long Distance numbers, remember to dial 1 + area code before the number.) If that phone is answered, the Call Forwarding is activated. If the phone was busy, or was not answered, hang up and repeat the activating procedure within two minutes. An intermittent dial tone will confirm that Call Forwarding is activated.

To deactivate Call Forwarding

- Call Forwarding can only be deactivated from the originating phone set.
- Listen for dial tone, then dial 73# (dial 1173 on a rotary dial set).
- After the two beeps, hang up.

Enhanced Call Forward Busy/ No Answer. To set the number of rings before calls are forwarded

- Lift handset of your telephone.
- Press *94.
- Listen for confirmation (three beeps followed by dial tone).
- Press the number of your ring selection (2 to 9).
- Listen for confirmation (two beeps).
- Hang up. (If you forget your choice, just reprogram your ring choice.)

Note: The ring selection that has been automatically set is three rings.

To turn off the Call Forward-Busy

(callers will now hear a busy tone)

- Lift the handset of your telephone.
- Press *91.
- Listen for confirmation (two beeps).
- Hang up.

To turn on the Call Forward-Busy

(incoming calls will forward when you are using the telephone)

- Lift the handset of your telephone.
- Press *90.
- Listen for confirmation (two beeps).
- Hang up.

To turn off the Call Forward-No Answer

(unanswered calls will continue to ring)

- Lift the handset of your telephone.
- Press *93.
- Listen for confirmation (two beeps).
- Hang up.

To turn on the Call Forward-No Answer

(incoming calls will forward when you are unavailable to answer)

- Lift the handset of your telephone.
- Press *92.
- Listen for confirmation (two beeps).
- Hang up.
